જાહેરનામું

સચિવાલય, ગાંધીનગર ૨૦મી જાન્યુઆરી, ૨૦૧૬.

ક્રમાંક જીયુ-૨૦૧૬-૨-જીપીસી-૧૧-૨૦૧૫-૩૨૩૦-ઈ.- આથી ગુજરાત સરકારને ગુજરાત રાજ્યમાં જાહેરહિતમાં કુદરતી ગેસ પરિવહન માટે સુરેન્દ્રનગર જિલ્લાના સાયલા તાલુકાના રતનપર ગામથી સુરેન્દ્રનગર જિલ્લાના મુળી તાલુકાના ભેટ ગામ સુધી (ચોટીલા થી અંજાર પાઈપલાઈન [સેક્શન : રતનપર - ભેટ] ), ગુજરાત સ્ટેટ પેટ્રોનેટ લિમિટેડ, (ગુજરાત સરકારના સાહસ - ગુજરાત સ્ટેટ પેટ્રોલિયમ કોર્પોરેશન લિમિટેડની ગૌણ કંપની) ગાંધીનગર દ્વારા ગેસ પાઈપલાઈન નાંખવી જોઈએ તે જરૂરી જણાય છે.

અને આથી, આવી પાઈપલાઈન નાંખવાના હેતુ માટે આ જાહેરનામાં સાથે જોડેલ અનુસૂચિમાં વર્ણન કરેલ જમીનોમાંના વપરાશકારનો હકક સંપાદીત કરવાનું જરૂરી જણાય છે.

આથી હવે ગુજરાત પાણીની અને ગેસની પાઈપલાઈન (જમીનમાંના વપરાશકારોનો હકક સંપાદન કરવા બાબત) અધિનિયમ - ૨૦૦૦ ની કલમ ૩ ની પેટા કલમ (૧) થી પ્રાપ્ત થયેલ સત્તા અન્વયે ગુજરાત સરકાર તેમાં વપરાશકારોનો હકક સંપાદીત કરવાનો ઈરાદો જાહેર કરે છે.

સદરહું અનુસૂચિમાં વર્ણન કરેલ જમીનમાં હીત ધરાવતી કોઈપણ વ્યક્તિ ગુજરાત સરકારના રાજપત્રમાં પ્રસિધ્ધ થયેલ જાહેરનામાંની નકલ સામાન્ય જનતાને ઉપલબ્ધ કરવામાં આવે તે તારીખથી (ત્રીસ) ૩૦ દિવસની અંદર સક્ષમ સત્તાધિકારી ગુજરાત સ્ટેટ પેટ્રોનેટ લિમિટેડ, જીએસપીએલ ભવન, ઈ-૧૮, ઈલેક્ટ્રોનિક્સ એસ્ટેટ, ક-૭ સર્કલ પાસે, સેક્ટર-૨૬, ગાંધીનગર - ૩૮૨ ૦૨૮ ને તેમાં વપરાશકારનો હકક સંપાદીત કરવા અંગેનો અથવા પાઈપલાઈન નાંખવા અંગેનો વાંધો કારણો સહિત લેખિતમાં રજૂ કરી શકશે.

જાહેરનામું

સચિવાલયલ આંધીનગરલ તારીખ: ૨૦મી જાન્યુઆરી, ૨૦૧૬.

ક્રમાંક: અયુ/૨૦૧૬/૩/અએસપી/૧૧-૨૦૧૫/૩૨૫૮/ઈ.- ગુજરાત સરકારને ગુજરાત રાજ્યમાં જાહેરહિતમાં કુદરતી ગેસ પરિવહન માટે કરણ જીલ્લાના ભચાઉ તાલુકાના શીકારપુર ગામથી કરણ જીલ્લાના અંજાર

તાલુકાના રાતાતળાવ ગામ સુધી (ચોટીલાથી અંજાર પાઈપલાઈન (સેક્શન: શીકારપુર-રાતાતળાવ) ગુજરાત સ્ટેટ પેટ્રોનેટ લીમિટેડ, (ગુજરાત સરકારના સાહસ ગુજરાત સ્ટેટ પેટ્રોલિયમ કોર્પોરેશન લીમિટેડ ની ગૌણ કંપની) ગાંધીનગર દ્વારા પાઈપલાઈન નાંખવી જોઈએ તે જરૂરી જણાય છે.

અને આથી, આવી પાઈપલાઈન નાંખવાના હેતુ માટે આ જાહેરનામા સાથે જોડેલ અનુસુચિમાં વર્ણન કરેલ જમીનોમાંના વપરાશકારોનો હકક સંપાદીત કરવાનું જરૂરી જણાય છે.

આથી, હવે ગુજરાત પાણીની અને ગેસની પાઈપલાઈન (જમીનોમાંના વપરાશકારોનો હકક સંપાદન કરવા બાબત) અધિનીયમ, ૨૦૦૦ની કલમ -૩ની પેટા કલમ - (૧) થી પ્રાપ્ત થયેલ સત્તા અન્વયે ગુજરાત સરકાર તેમાં વપરાશકારોનો હકક સંપાદીત કરવાનો ઇરાદો જાહેર કરે છે.

સરદહું અનુસુચિમાં વર્ણન કરેલ જમીનમાં હિત ધરાવતી કોઈપણ વ્યક્તિ ગુજરાત સરકારના રાજ્યપત્રમાં પ્રસિધ્ધ થયેલ જાહેરનામાંની નકલ સામાન્ય જનતાને ઉપલબ્ધ કરવામાં આવે તે તારીખથી ૩૦ (ત્રીસ) દિવસની અંદર સક્ષમ સત્તાધિકારી ગુજરાત સ્ટેટ પેટ્રોનેટ લી, જીએસપીએલ ભવન, ઇ-૧૮, ઇલેક્ટ્રોનિક એસ્ટેટ, ૬-૭, સર્કલ નજીક, સેક્ટર-૨૬, ગાંધીનગર-૩૮૨૦૨૮ ને તેમાં વપરાશકારોનો હકક સંપાદીત કરવા અંગેનો અથવા પાઈપલાઈન નાંખવા અંગેનો વાંધો કારણો સહિત લખિતમાં રજુ કરી શકશે.

Provided that incomplete or defective nomination paper or incomplete declaration in a nomination paper shall be deemed to be a defect of substantial character.

- (2) A person shall be entitled to file his nomination as a candidate for election if he is qualified to be chosen to fill that seat under the provision of Act and his name is entered in the final list of voters.
- (3) The nomination paper shall be supplied by the Returning Officer to any voter on demand.

18 *Presentation of Nomination Paper and Requirements for Valid Nominations*.—(1) Every nomination of candidate in Form IIA shall contain full particular of the candidate and be subscribed by two voters of his constituency, one of whom shall be a proposer and the other shall be a seconder; and bear the signature of the candidate in token of his willingness to be so nominated, on or before the date appointed under rule 16, and shall be delivered, either in person or by his proposer, to the Returning Officer during the time and at the place specified in the order made under the said rule.

- (2) Any person who is not subject to any disqualification as a voter under the provision of the Act, or the rules and whose name is entered in the final list of voters for the constituency, for which the candidate is to be nominated, may subscribe as proposer and seconder.
- (3) On the presentation of a nomination paper, the Returning Officer shall satisfy himself that the names and the numbers of the candidate and his proposer and seconder as entered in the nomination paper are the same as are published in the final list of voters referred to in sub rule (4) of rule 9.
- (4) The Returning Officer may condone any clerical or technical error in the nomination paper in regard to the said names or numbers to be corrected in order to bring them into conformity with the corresponding entries in the list of voters, and where necessary, any minor clerical or printing error in the said entries may be condoned.

19 *Notice of Scrutiny of Nomination Papers*.—The Returning Officer shall, on receiving the nomination paper (in Form IIA) under rule 18 acknowledge the receipt thereof in Form IIB and inform the person or persons delivering the same, of the day, time and place fixed for the scrutiny of nominations and shall enter on the nomination paper, its serial number and shall sign thereon, stating the date on which and the hour at which the nomination paper has been delivered to him and shall, as soon as may be thereafter cause to be affixed in some conspicuous place in his office, a notice of the nomination containing descriptions similar to these contained in the nomination paper, both of the candidate and of the proposer in Form II C(1).

20 *Scrutiny of Nomination Papers*—(1) On the date fixed for the scrutiny of nomination papers under rule 19, the candidates, their election agents, one proposer of each candidate and one other person duly authorized in writing by each candidate may attend at the time and place appointed in this behalf and the Returning Officer shall give them reasonable facilities for examining the nomination papers of all candidates which have been delivered under rule 18.

- (2) The Returning Officer shall then examine the nomination papers and decide all the objections which may have been received in respect of any nomination and may, either on such objection or on his own motion, after making such inquiry as he deems fit, may reject any nomination.
- (3) Nothing contained insub-rule (2), shall be deemed to authorize the rejection of the nomination of any candidate on the ground of any irregularity in respect of a nomination paper, if the candidate has been duly nominated by means of another nomination paper in respect of which no irregularity has been committed.
- (4) The Returning Officer shall hold the scrutiny on the date appointed in this behalf under rule 19 and shall not allow any adjournment of the proceedings, except when such proceedings are interrupted or obstructed for reasons beyond his control.

Provided that in case any objection is raised by the Returning Officer or is made by any other person, the candidate concerned may be allowed time to rebut it not later than the next day, and the Returning Officer shall record his decision on the date to which the proceedings have been adjourned.

- (5) The Returning Officer shall endorse on each nomination paper his decision accepting or rejecting the same and if the nomination paper is rejected, he shall record in writing a brief statement of his reasons for such rejection.
  - (6) For the purposes of this rule, the production of a certified copy of any entry made in the list of voters of the relevant constituency shall be conclusive evidence of the right of any voter named in that entry to contest election, unless it is proved that the candidate is disqualified.
- 21 *Publication of List of Valid Nominations*—Immediately after all the nomination papers have been scrutinized and decision accepting or rejecting the same has been recorded, the Returning Officer shall prepare a list, in Form II-C2 of candidates whose nominations have been accepted and shall affix the list on his notice board recording the date on which and the time at which the list was so affixed.
- 22 *Appeal*—(1) Any person aggrieved by a decision of the Returning Officer either rejecting his own nomination / candidature or accepting the nomination of any other candidate, may prefer an appeal against the order of the Returning Officer to the Election Authority within three days from the date on which the notice containing the names of the candidates accepted by the Returning Officer is affixed on the notice board under rule 21; and shall ordinarily furnish on the same day to the Returning Officer a copy of the appeal of the petitioner together with as many copies of the petition as there are candidates whose nomination papers have been accepted excluding himself.
- (2) The decision of the Election Authority on appeal preferred under sub-rule (1) shall be final.
- 23 *Withdrawal of Candidature*—(1) Any candidate may withdraw his candidature by giving a notice in writing, subscribed in FORM-II-D and delivered by him, to the Returning Officer,—
- (a) on the day immediately following the day after the expiry of the period referred to in sub-rule (2) of rule 14, where no appeal is presented under rule 22; or
  - (b) on the day next following the day on which the decision of the Returning Officer is given, where such appeal is preferred.
- (2) The notice shall be delivered to the Returning Officer before 3.00 O'clock in the afternoon on the last date fixed under rule 14 for withdrawal of candidature.

- (3) Notice may be given either by the candidate in person or by his proposer.
  - (4) No person who has given a notice of withdrawal of his candidature under sub-rule (1) shall be allowed to cancel the notice.
  - (5) The Returning Officer shall, on being satisfied as to the genuineness of a notice of withdrawal and the identity of the person delivering it, under sub-rule (3), cause the notice to be affixed on the notice board of his office.
- 24 *Preparation of List of Contesting Candidates*—(1) On the day next succeeding the last date fixed under rule 14 for withdrawal of candidature, the Returning Officer shall prepare and publish in Form III-A, a list of contesting candidates, whose nomination papers have been finally accepted and who have not withdrawn their candidature within the specified period.
- (2) Subject to the provision of sub-rule (3), the said list shall contain the names in alphabetical order in Gujarati and the address of the contesting candidates as given in the nomination papers.
  - (3) The alphabetical order referred to in sub-rule (2) shall be determined with reference to the surnames of the candidates and the proper names of other candidates.
- 25 *Publication of List of Contesting Candidates*—As soon as the copy of the list of contesting candidates from each constituency is ready, the Returning Officer shall immediately cause it to be published and affixed on the notice board of his office and shall also supply a copy thereof to each of the contesting candidates and, on demand, to his election agent.
- 26 *Appointment of Election Agent and Revocation of Appointment*—(1) If a candidate desires to appoint any person to be his election agent, such appointment shall be subject to the provision of sub-rule (3) be made by him in Form III-B. The candidate shall give notice of such appointment by delivering or forwarding a letter of such appointment, to the Returning Officer at the time of preparation of the nomination paper. The candidate shall also deliver a duplicate copy of the letter of appointment to the election agent appointed by him.
- (2) The appointment of the election agent may be revoked by the candidate at any time by a declaration in writing signed by him and lodged with the Returning Officer in Form III-C. Such revocation shall take effect from the date on which it is so lodged. In the event of such revocation or of the death of any election agent, whether that event occurs before or during the election, the candidate may appoint another person to be his election agent, and notice thereof shall be given to the Returning Officer, in the same manner as specified in the case of appointment of the first election agent.
  - (3) No person, who is subject to any disqualification as a voter under the rules or whose name is not entered in the list of voters, shall be appointed as an election agent.
  - (4) Each candidate may appoint his election agent for every polling station in Form III-D and such appointment may be cancelled by giving notice in Form III-E, to the Returning Officer.
- 27 *Countermanding of Poll on Death of Candidate Before Poll*—If a contesting candidate dies and a report of his death is received by the Returning Officer before the commencement of the poll, the Returning Officer shall, upon being satisfied of the event of the death of the candidate, countermand the poll and all proceedings with reference to the election shall be commenced afresh in all respects for a fresh election:

Provided that—

- (a) no further nomination shall be necessary in the case of a person who was a contesting candidate at the time of the countermanding of the poll; and
  - (b) no person who has given a notice of withdrawal of his candidature under rule 23, before the countermanding of the poll shall be ineligible for being nominated as a candidate for the election after such countermanding.
- 28 *Uncontested Elections*—If, after the expiry of the period within which candidatures may be withdrawn under rule 23, the number of candidates in the constituency whose nominations have been accepted is equal to or less than the number of seats to be filled, the Returning Officer shall forthwith declare such candidate or all such candidates to be duly elected to fill the seat or the relevant number of seats, as the case may be, and shall complete and certify the declaration in Form IV.
- 29 *Procedure for Conduct of Election*—The procedure prescribed in the Municipal Corporations, and Nagarpalikas (Qualification, Election and Appointment of Nominated Councilors) Rules, 1995 for the purpose of conduct of election, including counting of votes, of Councilors, shall, mutatis-mutandis, apply in respect of the elections of the elected members of the Metropolitan Planning Committee.
- 30 *Declaration of Result*—When the counting of votes has been completed, the Returning Officer shall, then, declare the result of the candidates having been elected in Form-V and shall send signed copies thereof immediately, to the Election Authority.
- 31 *Publication of Names of Elected Members of Committee*—(1) The Election Authority shall publish the names of all elected members of the Metropolitan Planning Committee by causing a list of such names together with their permanent addresses and the names of the constituencies from which they are elected to be pasted on the notice board or at any prominent place in his office.
- (2) The Election Authority shall send an entire list of elected members to the State Government.
- 32 *Filling of Casual Vacancies*.—In the event of any vacancy occurring on account of death, resignation, disqualification or for any other reason, the member secretary of Committee shall forthwith communicate the occurrence of the vacancy to the Election Authority of the Metropolitan Area and such vacancy shall be filled in by holding bye-election in the like manner.

તારીખ: ૩/૨/૨૦૧૫

**ક્રમાંક : ગુ-૨૦૧૬-૧૧-ગ્રામીણ-૧૧-૨૦૧૫-૩૨૭૫-ઈ.**—ગુજરાત સરકારને ગુજરાત રાજ્યમાં જાહેરહિતમાં કુદરતી ગેસ પરિવહન માટે નામ: રાતા તળાવ, સાપેડા, અંજાર સીમ, ભાકોઈ, મારીગણા, ભિગાળ, વાડા, હમીરપર, મોટા લોહારીયા, ખેડોઈ, મથડા, ચંદ્રોડા તા: અંજાર, જિલ્લો: કચ્છ થી ગામ: વાઘુરા, બગડા, કુકોડી, રાતડીયા, રાઘા, ગુદાલા, બારોઈ, ગોયરસમા તા: મુન્ના, જિલ્લો: કચ્છ માટે ગુજરાત સ્ટેટ પેટ્રોનેટ લીમિટેડ, (ગુજરાત સરકારના સાહસ ગુજરાત સ્ટેટ પેટ્રોલિયમ કોર્પોરેશન લીમિટેડ ની ગોણી કંપની) ગાંધીનગર દ્વારા પાઈપલાઈન નાંખવી જોઈએ તે જરૂરી જણાય છે.

અને આથી, આવી પાઈપલાઈન નાંખવાના હેતુ માટે આ જાહેરનામા સાથે જોડેલ અનુસૂચિમાં વર્ણન કરેલ જમીનોમાંના વપરાશકારોનો હકક સંપાદીત કરવાનું જરૂરી જણાય છે.

આથી, હવે ગુજરાત પાણીની અને ગેસની પાઈપલાઈન (જમીનોમાંના વપરાશકારોનો હકક સંપાદન કરવા બાબત) અધિનિયમ, ૨૦૦૦ની કલમ-૩ની પેટા કલમ-(૧) થી પ્રાપ્ત થયેલ સત્તા અનુસાર ગુજરાત સરકાર તેમાં વપરાશકારોનો હકક સંપાદીત કરવાનો ઇરાદો જાહેર કરે છે.

સરદાર અનુસૂચિમાં વર્ણન કરેલ જમીનમાં હિત ધરાવતી કોઈપણ વ્યક્તિ ગુજરાત સરકારના રાજ્યપત્રમાં પ્રસિધ્ધ થયેલ જાહેરનામાંની નકલ સામાન્ય જનતાને ઉપલબ્ધ કરવામાં આવે તે તારીખથી ૩૦ (ત્રીસ) દિવસની અંદર સક્ષમ સત્તાધિકારી ગુજરાત સ્ટેટ પેટ્રોનેટ લી, જીએસપીએલ ભવન, ઈ-૧૮, ઇલેક્ટ્રોનીક એસ્ટેટ, ૬-૭, સર્કલ નજીક, સેક્ટર-૨૬, ગાંધીનગર-૩૮૨૦૨૮ ને તેમાં વપરાશકારોનો હકક સંપાદીત કરવા અંગેનો અથવા પાઈપલાઈન નાંખવા અંગેનો વાંધો કારણો સહિત લખિતમાં રજૂ કરી શકશે.

- (8) "booster fire pump" means a mechanical /electrical device which boosts up the water pressure at the top level of a multi-storied/high rise building and which is capable of a pressure of 3.2 kg/cm<sup>2</sup> at the nearest point.
- (9) "competent authority" means any person or persons or Authority or Authorities authorized by the Urban Development Authority or the Area Development authority as the case may be, to perform such functions as may be specified.
- (10) "Combustible material" means that material which when burnt adds heat to a fire when tested for combustibility in accordance with the IS : 3808-1966 Method of Test for Combustibility of Building Material, National Building Code.
- (11) "corridor" means a common passage or circulation space including a common entrance hall.
- (12) "down comer" means an arrangement of fire fighting within a building by means of down comer pipe connected to terrace tank through terrace pump, gate valve and non-return valve and having mains not less than 100 mm internal diameter with landing valve on each floor handling. It is also fitted with inlet connections at ground level for charging with water by pumping service appliances and air release valve at roof level.
- (13) "dry riser" an arrangement of the firefighting within the building by means of vertical rising mains not less than 100 mm internal diameter with landing valves on each floor landing which is normally dry but is capable of being charged with water usually by pumping from fire service appliances.
- (14) "erector of pandal" means a person or an association of persons, whether corporate or otherwise, who erects or makes a pandal or any structure for occupation of people on a regular or temporary basis;
- (15) "emergency lighting/lighting system" means a complete but discrete emergency lighting installation from the stand by power source to the emergency lighting lamp(s) for the equipment and appurtenant used for fire services, e.g. self-contained emergency luminaries.
- (16) "escalator" means a power driven inclined continuous stairway used for raising or lowering passengers.

- (17) "enclosed Staircase" means a staircase separated by fire resistant walls and doors from the rest of the building.
- (18) "escape lighting" means that part of emergency lighting which is provided to ensure that the escape route is illuminated at all material times, for example, at all times when persons are on the premises, or at times the main lighting is not available, either for the whole building or for the escape routes.
- (19) "escape route" mean any corridor, staircase or other circulation space, or any combination of the same, by means of which a safe place in the open air at ground level can eventually be reached.
- (20) "exit" means a passage, channel or means of egress from any building, story or floor area to a street or other open space of safety; horizontal exit, outside exit and vertical exist having meanings at (i), (ii) and (iii) respectively as under:
- (i) "horizontal exit" means an exit which is a protected opening through or around a fire wall or bridge connecting two or more buildings.
  - (ii) "outside exit" means an exit from a building to a public way, to an open area leading to a public way or to an enclosed fire resistant passage leading to a public way.
  - (iii) "vertical exit" means an exit used for ascending or descending between two or more levels, including stairways, smoke-proof towers, ramps, escalators and fire escapes.
- (21) "external wall" means an outer wall of a building not being a party wall even though adjoining a wall of another building and also means a wall abutting on an interior open space of any building.
- (22) "fire authority" means the chief fire officer or any other person authorized by the competent authority.
- (23) "fire and/or emergency alarm system" means an arrangement of call points or detectors, sounders and other equipment for the transmission and indication of alarm signals working automatically or manually in the event of fire.
- (24) "fire lift" means a special lift designed for the use of fire service personnel in the event of fire or other emergency.
- (25) "fire proof door" means a door or shutter fitted to a wall opening, and constructed and erected with the requirement to check the transmission of heat and fire for a specified period.
- (26) "fire pump" means a machine, driven by external power for transmitting energy to fluids by coupling the pump to a suitable engine or motor, which may have varying outputs/capacity but shall be capable of having a pressure of 3.2 kg/cm<sup>2</sup> at the topmost level of multi-story or high rise building.

- (27) "fire pump-booster fire pump" means a mechanical/electrical device which boots up the water pressure at the top level of a multi-storied/high-rise building and which is capable of a pressure of 3.2 kg/sqcm at the nearest point.
- (28) "fire resistance" means the time during which a fire resistant material i.e. material having a certain degree of fire resistance, fulfils its function of contributing to the fire safety of a building when subjected to prescribed conditions of heat and load or restraint. The fire resistance test of structures shall be done in accordance with TS: 3809-1966 Fire Resistance Test of Structure.
- (29) "fire resistance rating of the building" means the time that a material or construction will withstand the standard fire exposure as determined by fire test done in accordance with the standard methods of fire tests of material/structures.
- (30) "fire separation" means the distance in meter measured from any other building on the site or from another site, or from the opposite side of a street or other public space to the building.
- (31) "fire service inlet" means a connection provided at the base of a building for pumping up water through in-built fire-fighting arrangements by fire service pumps in accordance with the recommendation of the Chief Fire Officer.
- (32) "fire staircase" means an enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both the floor area and the staircase by fire resisting doors.
- (33) "fire stop" means a fire resistance material or construction having a fire resistance rating of not less than the separating elements and installed in concealed spaces or between structural elements of a building to prevent the spread of public propagation of fire and smoke through walls, horizontal or vertical piping through cable ducts, ceiling and the like as per laid down criteria and having fire resistance capacity of at least 2 hours.
- (34) "fuel station" means a place of retail business engaged in supplying and dispensing of fuel products to consumers essential for the normal operation of automobiles.
- (35) "GDCR" means the general development control regulations made under clause (m) of sub-section (2) of section 12 of the Gujarat Act;
- (36) "hazardous material" means:-
- (i) radioactive substances;
  - (ii) material which is highly combustible or explosive and/or which may produce poisonous fumes or explosive emanations or storage, handling,
  - (iii) processing or manufacturing of which may involve highly corrosive, toxic obnoxious alkalis or acids or other liquids;

- (iv) other liquids or chemicals producing flame, fumes, explosive, poisonous, irritant or corrosive gases, or which may produce explosive mixtures of dust or fine particles capable of spontaneous ignition.
- (37) "height of building" means the vertical distance measured from the average plot level and up to the top of the finished level of the top most floor slab or in case of flat roofs up to the midpoint of the height of the slopping roof excluding the genuine stair cabin, water tank, and lift room. The height of the slopping roof shall be taken as an average height of the relevant floor.
- (38) "lift /elevators" means a mechanically guided car, platform or transport for persons and materials between two or more levels in a vertical or substantially vertical direction.
- (39) "lift well" means unobstructed space within an enclosure provided for the vertical movement of the lift car(s) and any counter weight(s), including the lift pit and the space for top clearance, and maintenance.
- (40) "means of egress" A continuous and unobstructed way of travel from any point in a building or structure to a place of comparative safety.
- (41) "occupant load" means the number of persons for which the means of egress of a building or portion thereof is designed
- (42) "non-combustible" means not liable to burn or add heat to a fire when tested for combustibility in accordance with the IS-3808-1966 Method of Test for Combustibility of Building Materials.
- (43) "pandal" means a temporary structure with roof or walls made of straw, hay, ulu grass, golpatta, hogla, darma, mat, canvas, cloth or other like material which is not adopted for permanent or continuous occupancy;
- (44) "permanent open air space" means air space permanently open -
- (45) "premises" means any land or any building or part of a building and includes the garden ground and outhouse, if any, appertaining building or part of a building; and any land or any building or part of a building appurtenant thereto which is used for storing explosives explosive substance and dangerously inflammable substance;
- (46) "pressurization " means the establishment of a pressure difference across a barrier to protect a-stairway, lobby, escape route or room of a building from smoke penetration
- (47) "refuge area" means an area where persons unable to use stairways can remain temporarily and await instructions or assistance during emergency evacuation situation
- (48) "roof exits" means of escape on to the roof of a building where the roof has access to it from the floor, the exit shall have adequate cut-off within the building from staircase below

- (49) "smoke-stop door" means a door for preventing or checking the spread of smoke from one area to another.
- (50) "stair cover" means a structure with a covering roof over a staircase and its landing built to enclose only the stairs for the purpose of providing protection from the weather, and not to be used for human habitation.
- (51) "travel distance" means the distance to be traveled from the remotest point on a floor of a building to a place of safety be it a protected escape route, external escape route or final exit i.e. vertical exit, horizontal exit or an outside exit measured along the line of travel.
- (52) "ventilation" means supply of outside air into or the removal of inside air from an enclosed space.
- (53) "venting fire" means the process of including heat and smoke to level a building as quickly as possible by such paths that lateral spread of fire and heat is checked, firefighting operations are facilitated and minimum fire damage is caused.
- (54) "wet riser" an arrangement for firefighting within the building by means of vertical rising mains not less than 100 mm nominal diameter with landing valve on each floor /landing for firefighting purposes, and permanently charged with water from a pressurized supply.

## CHAPTER II

### PROVISIONS FOR TEMPORARY STRUCTURES AND PANDALS

#### 3. Procedure for fire prevention and life safety in temporary structures & pandals

- 3.1. Every owner or occupier of such temporary premises or erectors of pandals, to take such fire prevention and fire safety measures as may be required under these regulations shall be deemed to be self-regulators for taking fire prevention and fire safety measures.
- 3.2. The erector shall display at a prominent place in the premises, a declaration in the prescribed form and under his own signature to the effect that he has taken all the prescribed fire prevention and fire safety measures therein.
- 3.3. The fire authority can enter and inspect any temporary structure about the correctness of the declaration, point out the shortcomings, if any, with directions to remove them within a specified time.
- 3.4. If the directions of the inspecting officer are not complied with within the time so given, the, inspecting officer may seal the panda! or dismantle such structure and such costs incurred shall be recovered from such defaulter. Even after such directions, the owner or the occupier continues to disobey the directions, the fire authority, may a fine up to Rs.50,000 or for continuing the offence, further fine up to Rs.500/day.

- 3.5. Any false declaration shall be deemed to have committed an criminal offence punishable under this Indian penal code.
- 3.6. In case where the use of pandal or the temporary structure is meant to attract public gathering, then the erector of the pandal or the owner or the occupier of temporary structure shall submit:-
  - (1) a layout plan indicating access to pandal,
  - (2) the area of stalls and other uses.
  - (3) the plans showing the construction at the sites.

#### 4. Requirements for temporary structures & pandals

##### 4.1. General Requirements:

- (1) If a pandal is constructed then it shall be of fire resistant material and be open from two sides or provide two emergency exits marked "EMERGENCY EXIT".
- (2) Minimum height of the ceiling of the pandal should not be less than 3.00 meters.
- (3) No structure shall be erected under any live electrical line. It shall be minimum 15 mts away from the railway lines, electrical sub stations, furnaces and other hazardous places.
- (4) 3.0 mts margins shall be kept on all sides. Minimum width of the exits on all sides of the pandals shall be 1.5 mts.
- (5) All the space used in and outside the public gathering place shall be properly rolled and made into a flat surface and entry I exit shall have a leveled surface without obstruction.
- (6) Kitchens, if any shall be constructed 15 meters away from the pandal and be built by using tin sheets.
- (7) No combustible material like wood shavings, straw, highly inflammable and explosive chemicals and similar materials should be permitted to be stored in the vicinity or inside the pandal.
- (8) No fireworks display with open flames of any kind should be permitted close to the temporary structure/ pandal.
- (9) All the spaces used in and outside the public gathering place shall be properly rolled and made into a flat surface and entry/exit shall have a level surface without obstruction.

4.2. Open Space: 3.0 meters margin should be kept on all sides-minimum. Width of exits on all sides of the pandal shall be minimum 1.5 m

##### 4.3. First-aid firefighting arrangements:

- (1) A 200 liter water barrel along with water buckets I sand buckets shall be placed at each 50 mts distance or more if required.

- (2) Dry chemical powder, water CO2 and CO2 extinguishers shall be placed at locations required in required numbers.

4.4. Requirements for Power Supply:

Distance from Electrical wires and hazardous installations -No structure should be erected underneath any live electrical line. It should be Min. 15 meters away from railway lines, electric substations, furnaces or other hazardous places (if required the distance may be increased as directed by the CFO).

4.5. Electrical Wiring:

- (1) Electrical wires should pass through PVC conduits and not contact any flammable material. No loose wiring shall be allowed and all end shall be properly taped and insulated.
- (2) Big lights (halogen I halides) shall be at least 60cms, away from the rides or any metal structure temporarily constructed.
- (3) Heavy cable connections shall be connected by ceramic connectors and then insulated along with the fuses. Power control switches, MCB or ELCB shall be installed for each specific use.
- (4) A certificate with photograph from a registered electrical engineer shall have to be produced to ensure proper load distribution and wiring in case of panda having size more than 500sq.mt
- (5) All light fittings and lamps installed shall not contact cloth or any other flammable material.
- (6) Standby generators of appropriate capacities shall be kept ready at the site in case of pandal having size more than 500sq.mt

4.6. Availability of trained firefighting staff: -

- (1) Every security guard and other members shall have a torch and shall ready all the time during dark hours of operation.
- (2) The competent authority can enter and inspect the temporary structure about the correctness about the declaration, point out the short comings, if any, with directions to remove them within a specified time.

### CHAPTER III- PROVISIONS FOR BUILDINGS

5. Procedure to get permission

- 5.1. For fire safety, notwithstanding anything contained in any regulations, any applicant, seeking permission in building where a fire safety officer is required to be appointed, shall along with the required documents, make an application, in the Form A, to the fire authority. The application shall be countersigned by the applicant, the architect, the structural engineer and a fire expert.

- 5.2. On receipt of the application made by the applicant sub clause (I) above, the fire authority shall, within a period of 30 days months, scrutinize the same and after making such inquiry as it may deem fit, is of the opinion that the development proposed fulfills the requirements for fire prevention and life safety, as required under these regulations, shall issue "no-objection certificate" in the prescribed form.

**6. Fire Expert:**

**6.1. Registration:**

- (1) On an application from any fire expert, the competent authority may for its jurisdiction register fire expert for a period of one year. The registration shall be valid for the period of five years or part thereof and shall be renewable or part thereof.
- (2) The registration fee if any shall be payable as prescribed by the Competent Authority from time to time.
- (3) The Competent Authority may black-list the fire expert in case of serious defaults or repeated defaults.
- (4) A registration shall be liable to be revoked temporarily or permanently by the Competent Authority if the registered person is found guilty of negligence or default in discharge of his responsibilities and duties or of any breach of any of these Regulations.
- (5) Provided that he shall be given a show cause notice and afforded reasonable opportunity of being heard by the Competent Authority for the purpose of these Regulations.

**6.2. Qualification and Experience:**

Shall be equivalent to that required for the direct appointment on the post of Deputy Fire Officer Ahmedabad Municipal Corporation.

**6.3. Scope Work & Competence:**

- (1) With respect to the requirements required to be provided under these regulations:
  - (a) Verify the building design, the layout plan and the submission and working drawings,
  - (b) Supervision while execution of construction work to ensure that the facilities with respect to these regulations are provided as per specifications & drawings, and
  - (c) Submit certificate of supervision, progress report & certificate of completion

**6.4. Duties & Responsibilities:**

- (1) General duties and responsibilities of the Fire Expert shall be mutatis mutandis to GDCR.
- (2) He/she shall be responsible for making adequate arrangements to ensure not only that the work is executed as per these regulations but also is confirmation with the

stipulations of the National Building Code and the B.S.I, standard s and shall obtain N.O.C. from the fire authority before applying for occupation certificate.

## **7. Fire Prevention in Buildings**

### **7.1. General requirements:**

- (1) Open spaces on road sides shall be as under:
- (2) Provided that for buildings having height more than 18.0 mts, the provisions of special structures Chapter-vi of these regulations shall be applicable
- (3) For high rise building above 18 meters the open space required shall be as per Table 10, under regulation No 24.1

### **7.2. Construction**

#### **(1) Types Of Construction**

The types of construction according to fire resistance shall be classified in to four Categories, namely, type 1 construction, Type 2 construction, Type 3 construction and Type 4 construction as per Table 1 given under 3.3. 1 Part 4 NBC -second revision. The Fire resistance test for structural elements shall be done in accordance with IS-3808: 1979. The fire resistance rating of various building components such as wall, columns, beams and floors are given in Table2 to Table 15 part 4 NBC-second revision.

#### **(2) Steel Framed Constructions**

Load bearing steel beams and column s of buildings having total covered area of 500 m<sup>2</sup> and above shall be protected against failure/ collapse of structure in case of fire. This could be achieved by covering the exposed steel supporting members by suitable fire resistance rated materials like concrete, vermiculite (Hydrous silicate of Aluminum, Magnesian or Iron) etc as per IS-15103:2002

### **7.3 Electrical Installations for fire purposes:**

- (1) Electric cable/wires used shall be of 700 volt grading with Mechanical circuit breaker and earth Leak Circuit Breaker (MCB and ELCB).
- (2) Electrical Installations form fire safety point of view shall comply with IS-- I 646 : J 997. Use of fire resistance cables and wires. Subject to any of the above regulations every person who undertakes construction of a building and/ or who designs the structural member of the building shall comply with the provisions of National Building Code prevailing at the relevant time or the provisions of the Indian standard Specifications published form time to time.
- (3) Every person who undertakes the construction work on a building or directs or supervises such work shall be responsible and shall ensure use of sound and good quality building materials, properly put together for optimum safety. He shall be liable for all consequences arising out of breach of these of these regulations.

### **7.4. Elevators (LIFTS) I Escalators:**

- (1) Lift shall be provided in all buildings as prescribed hereunder:
- (2) The planning and design of lifts including their number, type and capacity depending on the occupancy of the building, the population on each floor based on the occupant load and the building height shall be in accordance with section 5- installation of lifts and escalators, national building code of India.
- (3) In case of Building having height more than 13.0 mts from ground level, lift shall be provided and notwithstanding anything contained in the development control regulations in case of building with 21 meters or more in height, at least two lifts shall be provided. From these lifts at least one of them shall be designed as fire lift as specified in NBC.
- (4) Lift shall be provided at the rate of one lift for 20 dwelling units of all the floors, or part thereof for residential buildings and at the rate of one lift per 1000.00 sq.mts. or part thereof of built-up area for non-residential buildings.
- (5) The tenement and built-up area on ground floor and two upper floors shall be excluded in computing the above requirement.
- (6) Lift shall be provided from ground floor or lower level and shall have minimum capacity of six persons. On the basis of detailed calculations based on the relevant provisions of National Building Code, the number of lifts can be varied.
- (7) Minimum internal dimensions for passenger lifts shall be 1500 mm x 1500 mm. A clear landing area in front of the lift doors shall be 1800mm x 1800mm and clear opening width of the doors shall be of minimum 900 mm. A handrail of 600 mm length at 1000 mm height from the floor shall be provided.
- (8) The time of an automatically closing door should be minimum 5 seconds and the closing speed should not exceed 0.25 m/sec. The interior of the cage shall be provided with a device that audibly indicates the floor the cage has reached and indicates that the door of the cage for entrance/exit is either open or closed.
- (9) Maintenance:
  - (a) The lift installation should receive regular cleaning, lubrication adjustment and adequate servicing by authorized competent persons at such intervals as the type of equipment and frequency of service demand. In order that the lift installation is maintained at all times in a safe condition, a proper maintenance schedule shall be drawn up in consultation with the lift manufacturer and rigidly followed. A log book to record all items relating to general servicing and inspection shall be maintained.
  - (b) The electrical circuit diagram of the lift with the sequence of operation of different components and parts shall be kept readily available for reference by persons responsible for the maintenance and replacement, where necessary, to the satisfaction of the competent authority.
  - (c) Any accident arising out of operation of maintenance of the lifts shall be duly reported to the competent authority.

## 7.5 Exit Requirements :

### (1) General Exit Requirements

- (a) An exit may be a doorway, corridor, passageway(s) to an internal staircase, or external staircase, or to a veranda or terrace(s), which have access to the street, or to roof of a building or a refuge area. An exit may also include a horizontal exit leading to an adjoining building at the same level.
- (b) Lifts and escalators shall not normally be considered as exits.
- (c) Every exit, exit access or exit discharge shall be continuously maintained free of all obstructions or impediments for full use in the case of fire or other emergency.
- (d) Every building meant for human occupancy shall be provided with exits sufficient to permit safe escape of occupants, in case of fire or other emergency.
- (e) In every building or structure, exits shall comply with the minimum requirements of this part, except those not accessible for general public use.
- (f) No building shall be so altered as to reduce the number, width or protection of less than that required.
- (g) Exits shall be clearly visible and the route to reach the exits shall be clearly marked and signs posted to guide the occupants of the floor concerned. Signs shall be illuminated and wired to an independent electrical circuit on an alternative source of supply. The color of the exit signs shall be green.
- (h) The floors of area covered for the means of exit shall be illuminated to values not less than 1 ft candle (10 lux) at floor level. In auditoriums, theatres, concert halls and such other places of assembly, the illumination of floor exit/ access may be reduced during period of performances to value not less than 1/5 ft candle (2 lux)
- (i) Fire doors with 2 hour fire resistance shall be provided at appropriate places along the escape route and particularly at the entrance to lift lobby and stairwell where a funnel or flue effect may be created, inducing an upward spread of fire and smoke.
- (j) All exits shall provide continuous means of egress to the exterior of a building or to an exterior space leading to a street.
- (k) Exits shall be arranged that they may be reached without passing through another occupied unit.

### (2) Illumination of means of Exit

- (a) Staircase and corridor light shall conform to the following:
- (b) The staircase and corridor lighting shall be on separate circuits and shall be independently connected so that they could be operated by one switch installation on

the ground floor easily accessible to firefighting staff at any time irrespective of the position of the individual control of the light points, if any. It should be miniature circuit breaker type of switch so as to avoid replacement of fuse in case of crisis;

- (c) Staircase and corridor lighting shall also be connected to alternative supply. The alternative source of supply may be provided by battery continuously trickle charged from the electric mains; and
- (d) Suitable arrangement shall be made by installing double throw switches to ensure that the lighting installed in the staircase and the corridor does not get connected. Double throw switch shall be installed in the service room for terminating the stand-by supply.

(3) External Stairs

- (a) An external staircase is desirable to be provided for high rise buildings and special buildings, if the safe travel distance for exit not maintained. External stairs, when provided shall comply with the following:
- (b) External stairs shall always be kept in sound operable conditions.
- (c) All external stairs shall be directly connected to the ground.
- (d) Care shall be taken to ensure that no wall opening or window opens on to an external stairs.
- (e) The route to the external stairs shall be free of obstructions at all time.
- (f) The external stairs shall be constructed of non- combustible materials, and any doorway leading to it shall have the required fire resistance.
- (g) No external staircase, used as a fire escape, shall be inclined at an angle greater than  $45^{\circ}$  from the horizontal.
- (h) External stairs shall have straight flight not less than 1250 mm wide with 250 mm treads and risers not more than 190 mm. The number of risers shall be limited to 15 per flight.
- (i) Handrail s shall be of height not less than 700 mm and not exceeding 850 - 900 mm. There shall be provisions of balusters with maximum gap of 150 mm.

(4) Horizontal Exits

- (a) The width of horizontal exit shall be same as for the exit doorways.
- (b) A horizontal exit shall be equipped with at least one fire I smoke door of minimum two -hour fire resistance of self-closing type. Further, it should have direct connectivity to the fire escape staircase for evacuation.
- (c) Where there is a difference in level between connected areas for horizontal exits, ramps, not more than 1 to 10 slope shall be provided; steps shall not be used.
- (d) Doors in horizontal exits shall be open able at all times from both sided.

### 7.6. Fire Access Stair Cases

- (1) Staircases to abut on outer wall or be external part of to the building are naturally cross ventilated.
- (2) The stairs should not have opening to any part of the building. At least one staircase shall be on external walls of building and shall open directly to the exterior, interior open space or to an open plan of safety. Further, the provision or otherwise of alternative staircases shall be subject to the requirements of travel distance being compiled with. It shall be 20 mt. for hazardous use, 25 mt for residential use and 30 mt. for non-residential use.

### 7.7. Doorways

- (1) Every exit doorway shall open into an enclosed stairway compartmented from rest of building or a horizontal exit of a corridor or passageway providing continuous and protected means of egress.
- (2) No exit doorway shall be less than 1000 mm in width except assembly buildings where door width shall be not less than 2000 mm. All Doorways shall be not less than 2000 mm in height.
- (3) Exit doorways shall open outwards, that is, away from the room, but shall not obstruct the travel along any exit. No door, when opened, shall reduce the required width of stairway or landing to less than 900 mm. overhead or sliding doors shall not be installed.

Note: In the case of building where there is a central corridor, the doors of rooms shall open outward and flush to the wall to permit smooth flow of traffic in the corridor.

- (4) Exit door shall not open immediately upon a flight of stairs. A landing equal to at least the width of the door (not less than 900mm) shall be provided in the stairway at each doorway. The level of landing shall be the same as that of floor, which it serves. Manual door should incorporate kick plate 300 mm high to withstand impact of wheelchair footrest where doors are glazed. Door handle and locks should be positioned between 900-1000 mm from floor level.
- (5) Exit doorways shall be open able from the side, which they serve without the use of a key.(panic bar)
- (6) Mirrors shall not be placed in exit doors to avoid confusion regarding the direction of exit.

### 7.8. Corridors and Passageways & Stairs:

- (1) Flight :-No flight shall contain more than 12 16 risers, but in residential buildings, in narrow plots and in high density Housing a single flight staircase may be permitted.
- (2) Risers: - The maximum height of a riser shall be 19 16 19cm. in a residential building and 16 cm. in any other occupancy. However, on an internal stairway within a dwelling unit a riser may be 25 cm. high.

- (3) Treads:- The minimum width of the tread without nosing shall be 25 cm. for staircase of a residential building, other than fire escapes. In other occupancies the minimum width of the tread shall be 30 cm. It shall have a non-slippery finish and shall be maintained in that fashion.
- (4) Head room: The minimum head room in a passage under the landing of a staircase under the staircase shall be 2.2 m.
- (5) Floor indicator: The number of each floor shall be conspicuously painted in figures at least 15 cm. large on the wall facing the flight of a stairway or at such suitable place as is distinctly visible from the flights.
- (6) Hand Rail: Hand rail a minimum height of 0.9 m. from the center of the tread shall be provided.
- (7) For all residential and non-residential building except individual detached building minimum clear width of lobbies or corridor shall be as shown in the table below:

Sr. No.	Type of occupancy		Minimum width of Stairway/ Staircase Corridor(in meters)
1	Residential building	(a) Low rise	1.2
		(b) Hotels and High rise	1.5
2	Educational building	(a) Up to 24m. high	1.5
		(b) Over 24m. high	2.0
3	Institutional buildings (i.e. hospital)	(a) Upto 10 beds	1.5
		(b) Over 10 beds	2.0
4	Assembly buildings		2.0
5	Mercantile, business, industrial storage, hazardous	(a) Low rise	1.5
		(b) High rise	2.0

#### 7.9. Internal/Additional Staircases:

- (1) Additional stairs shall be constructed of non-combustible materials throughout.
- (2) A staircase shall not be provided around a lift shaft unless provided with fire stop door of one hour rating at every floor level and no other openings in the inside walls
- (3) Hollow combustible construction shall not be permitted.
- (4) No gas piping, electrical panels or AC ducts shall be allowed in the stairway. However service shafts/ ducts may be permitted. Electrical Shafts/ ducts shall have not less than 2hour fire resistance. For other service shafts/ ducts, the fire resistance shall be not less than 1hour.
- (5) Notwithstanding the detailed provision for exits, the following minimum width shall be provided for staircases-

Type of Occupancy	Width of Internal stair in mts
Residential building, Hotel building, Educational building, Institutional buildings, (i.e. hospital), Mercantile, business, storage industrial, hazardous, buildings.)	
Height up to 25 m	1.2
Height > 25m	2.0
Assembly buildings	2.0
Note:-	
a. In case of low-rise apartment type building, minimum stair width for more than 6 tenements on each floor shall be 1.5 mts.	
b. No winders shall be allowed except in case of individual dwelling unit	

- (6) The minimum width of tread without nosing shall be 250 mm for internal staircase of residential buildings, other than fire escapes. This shall be 300 mm for assembly, hotels, educational, institutional, business and other buildings. The treads be constructed and maintained in a manner to prevent slipping.
- (7) The maximum height of riser shall be 190 mm for residential buildings and 160 mm for other buildings and the number shall be limited to 12 per flight.
- (8) Continuous handrails shall be provided on both sides including the wall (if any) at two levels: upper at 850 mm - 900 mm and lower at 700 mm. to be measured from the base of the middle of the treads to the top of handrails. Balusters/ Railing shall be provided in such a way that the width of staircase does not reduce. The maximum gap between balusters shall be 150 mm.
- (9) All steps, edges must have a contrasting color band of 50 mm width stretched entirely across the step width for uses other than residential use.
- (10) Soffit (underside /open area under the stairs) of the stairs and ramps should be enclosed or protected with rails or raised curbs or marked with a tactile surface (11).
- (11) The design of staircase shall also take into account the following:
  - (a) The minimum headroom in a passage under the landing of a staircase and the stair shall be 2.2 m.
  - (b) No living space, store or other fire risk shall open directly into the staircase or staircases.
  - (c) External exit door of staircase enclosure at ground level shall open directly to the open spaces.
  - (d) The main and external staircases shall be continuous from ground floor to the terrace level.
  - (e) Lifts shall not open in staircase.
  - (f) No combustible material shall be used for decoration/ wall paneling in the staircase.
- (12) Beams/ columns and other building features shall not reduce the head room/ width of the staircase.

- (13) The exit way with arrow indicating the way to the escape route shall be provided at a height of 1.8 m from the floor level on the wall and shall be illuminated by electric light connected to corridor circuits. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy - equipments. Further, all landings of floor shall have floor indicating the number of floor as per byelaws. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of size not less than 0.5 m x 0.5 m.
- (14) Individual floors shall be prominently indicated on the wall facing the staircases.
- (15) In case of single staircase, it shall terminate at the ground floor level and the access to the basement shall be by a separate staircase.

#### 7.10. Cellar:

In a building unit, the cellar may be permitted on the following conditions:

- (a) Clear width of the stair leading to the cellar shall not be less than the width of the regular staircase leading to upper floors.
- (b) No stairs to be constructed under these regulations shall consist of any wooden material.
- (c) Adequate opening for ventilation should be provided as directed by Competent Authority. The materials of the construction and fixtures of the cellar should be of fire resisting nature and in no case; wood shall be used as structural part of the cellar or any fixtures thereof. The extent of ventilation shall be the same as required by the particular occupancy for which the basement is used. Any deficiency must be made well by resort to a mechanical system, viz. blowers, exhaust fans, air conditioning system, according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code.
- (d) Uses permitted: - parking, safe deposit vault, A.C. Plant, storage other than inflammable material. MRI or X-Ray room in hospital.
- (e) Staircase at a distance of different occupancies shall have to be provided to reach the lower most floor of the cellar.
- (f) Stairs in the basement shall only lead to the ground or first floor. It shall not lead to upper floors so that it becomes a part of the staircase leading to the terrace of the building.
- (g) In a building unit where more than two lifts are required to be provided as per this regulation, minimum two lifts shall be provided to reach the lower most level of the cellar.

#### 7.11. Ramps:

Ramp for basement or storied parking: - For parking spaces in a basement and upper at least two ramps of adequate width and slope shall be provided preferably at the opposite end. Such ramps may be permitted in the side and rear marginal open spaces, after leaving sufficient space for movement of firefighting equipments.

## 7.12. Loft:

The loft at a minimum height of 2.1 mts. from floor level not exceeding 30% floor area of the room may be allowed in any room.

## 7.13. Control of development on terrace &amp; basements/cellar:

- (1) No development, including use, shall be permitted on the terrace & basement space which is located at egress of the stair leading to terrace should be kept open. Storage in such space either temporary or permanent shall not be permitted
- (2) Uses permitted: - parking, safe deposit vault, A.C. Plant, storage other than inflammable material, MRI or X-Ray room in hospital

## 7.14. Emergency and Escape Lighting

- (1) The emergency lighting shall be provided to be put on within one second of the failure if the normal lighting supply and shall be of independent of main supply
- (2) Escape lighting luminaries should be sited to cover the following locations
  - a. At each exit door,
  - b. Near each staircase so that each flight of stairs receives direct light,
  - c. Near any other change of floor level,
  - d. Outside each final exit and close to it,
  - e. Near each fire alarm call point,
  - f. Near fire fighting equipment and,
  - g. To illuminate exit and safety signs as required by the enforcing authority.

h.Note:\* For the purpose of this clause 'near' is normally considered to be within 2m measured horizontally.
- (3) Emergency lighting systems shall be designed to ensure that a fault or failure in any one luminaries does not further reduce the effectiveness of the system.
- (4) The luminaries shall be mounted as low as possible, but at least 2m above the floor level.
- (5) Signs are required at all exits, emergency exits and escape routes, which should comply with the graphic requirements of the relevant Indian standards.
- (6) Emergency lighting luminaries and their fitting shall be fire resistance type.
- (7) It is essential that the wiring and installation of the emergency lighting systems are of high quality so as to ensure their perfect serviceability at all times.
- (8) The emergency lighting system shall be capable of continuous operation for a minimum duration of 1 hour and 30 minutes.
- (9) The emergency lighting system shall be well maintained by periodical inspections and tests so as to ensure their perfect serviceability at all times.

(10) Electric supply for fire pump/fire lift should be provided separately and not get switched off along with the main supply of building.

(11) Electrical services

- a. These shall conform to those given in C-1.12 Part 4 NBC Second revision and the IS; 1646-1999 and particular attention is drawn to the following:
- b. The electric distribution cable/wiring shall be laid in a separate duct. The duct shall be sealed at every floor with non-combustible materials having the same fire resistance as that of the duct. Low and medium voltage wiring running in shaft and in false ceiling shall run in separate conduits.
- c. Separate circuits for fire fighting pumps, lifts, staircases, corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes, so that fire in one circuit will not affect the others. Such circuits shall be protected at origin by an automatic circuit breaker with it's no-volt coil removed. Master switches controlling essential service circuits shall be clearly labelled.
- d. An independent and well ventilated electrical service room shall be provided on the ground level or first basement with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensees service and alternative supply cables. The doors provided for the service room shall have fire resistance of not less than 2 hours.

Note :- If service room is located at the first basement, it should have automatic fire extinguishing system

- e. Suitable circuit breakers shall be provided at the appropriate points.

(12) Emergency Power Supply

- a. For every building having height more than 45 m, A stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, pressurization fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply. The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the main electrical pump. Where parallel HT/LT supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with Authority.

#### 7.15. Water Supplies

In addition to normal requirements for the purpose of fire the following shall be applicable.

(1) Water storage tanks

- a. Under ground water tank of at least one lakh litres capacity and accessible for fire fighting vehicles. The covering slab shall be able to withstand the total

- (2) The ducting shall be constructed of substantial gauge metal as per IS: 655-1963-Specification for Metal Air Ducts.
- (3) Wherever the ducts pass through firewalls or fire walls or floors, the opening around the ducts shall be sealed with materials having fire resistance rating of the compartment.
- (4) The materials used for insulating the duct system (inside or outside) shall be of non-combustible material. Glass wool shall not be wrapped or secured by any material of combustible nature.
- (5) The air-handling units shall be separate for each floor and air ducts for every floor shall be separate and in no way interconnected with the ducting of any other floor.
- (6) If the air-handling unit serves more than one floor, the conditions given below shall be complied in addition to the recommendations above.
- (7) Proper arrangements by way of automatic fire dampers, working on fusible link/or smoke detector principle for isolating all ducting at every floor from the main riser, shall be made.
- (8) When the automatic fire alarm operates, the respective air-handling.
- (9) Units of the air-conditioning system shall automatically be switched off.
- (10) Where plenum is used for return air passage, ceiling and its fixtures shall be of non-combustible material.

#### **11. Sub- Stations**

- (1) The sub-station shall have separate fire resisting walls/surroundings and shall necessarily be located at the periphery of the floor having separate access preferably from fire escape staircase.
- (2) The outside walls, ceiling and floor including doors and windows to the sub-station area shall be of 2h fire rating.
- (3) A sub-station or a switch-station with oil- filled equipment must not be located in the building. When housed inside the building, The transformer shall be of premises by walls/doors/cut outs having fire resistance rating of 4h
- (4) The Sub-Station area needs to be maintained at negative air pressure and area in substation shall not be used as storage/dump areas.
- (5) No transformer shall be allowed inside the building.
- (6) Substation to be provided at rear corner of a building unit after leaving enough open space around the building for fire fighting requirements

#### **12. Boilers and Boiler rooms**

- (1) The boiler shall be installed in a fire resisting room of 4h fire resistance rating, and this room shall be situated on the periphery of the building and in no case in basement, dike shall be provided at the lower level

- (2) Foam inlets shall be provided on the external walls of the building near the ground level to enable the fire services to use foam in case of fire.

### 13. Fire Control Rooms

- (1) For building height having more than 45m and floor area 5000 sq.mt and more on each floor, there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floors and facilities for receiving the message from different floors. Details of all floor plans along with the details of fire fighting equipment and installations shall be displayed in the fire control room. The fire control room shall also have facilities to detect the fire on any floor through indicator board's connection; fire detection and alarm system on all floors. The fire staff in charge of the fire control room shall be responsible for maintenance of the various services and the fire fighting equipment and installations in coordination with security, electrical and civil staff of the building.

### 14. Fire Officer

For hotels, business and mercantile use and for building height having more than 40m and floor area 5000 sq.mt and more on each floor, a qualified Fire Officer with experience of not less than 3years + two fire men shall be appointed who will be available on the premises.

### 15. Fire Drills

- (1) Fire Notices/Orders shall be prepared to fulfill the requirements of fire fighting and evacuation from the building in the event of fire and other emergency. The occupants shall be made thoroughly conversant with their action in the event of emergency, by displaying fire notices at vantage points and also through regular training. Such notices should be displayed prominently in broad letters.
- (2) For guidelines on fire drill and evacuation procedures reference may be made to Annex E of part 4 NBC second revision.

### 16. Fire Lifts

- (1) To enable fire services personnel to reach the upper floors with the minimum delay, one fire lift per 1200 m<sup>2</sup> of floor area shall be provided and shall be available for the exclusive use of the firemen in an emergency.
- (2) The lift shall have a floor area of not less than 1.4 m<sup>2</sup>. It shall have loading capacity of not less than 545 KG (8 persons lift) with automatic closing doors of minimum 0.8m width.
- (3) The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shaft. Lights and fans in the elevators having wooden paneling or sheet steel construction shall be operated on 24 volt supply.
- (4) Fire fighting lift should be provided with a ceiling hatch for use in case of emergency,

- (5) In case of failure of normal electric supply, it shall automatically change over to alternate supply. For apartment houses, this changeover of supply could be done through manually operated changeover switch. Alternatively, the lift shall be so wired that in case of power failure, it comes down at the ground level and comes to stand-still with door open.
- (6) The operation of fire lift should be by a simple toggle or two -button switch situated in glass- fronted box adjacent to the lift at the entrance level. When the switch is on, landing call points will become inoperative and the lift will be on car control only or on a priority control device. When the switch is off, the lift can be used by the occupants in normal times.
- (7) The words 'Fire Lift' shall be conspicuously displayed in fluorescent paint on the lift landing door at each floor level.
- (8) The speed of the fire lift shall be such that it can reach the top floor from ground level within one minute.

#### 17. Refuge Area

- (1) Following provisions shall apply:
- (2) Refuge area shall be provided on the external walls/ periphery of the floor preferably on a cantilever projection , open to air at least on one side, protected with suitable railings and shall have direct access to fire ladder
- (3) Minimum area of 15 m<sup>2</sup> on external wall with minimum width of 0.75 m at every 18 m height ;for floor area up to 1000 m<sup>2</sup>
- (4) If floor area > 1000 m<sup>2</sup>, another Refuge Area on another end of the floor.
- (5) For floors above 25 m and up to 39m-One refuge area on the floor immediately above 25 meter.
- (6) For floors above 39 meter-One refuge area on the floor immediately above 39 m and so on after every 15m
- (7) Note- Residential flats in multi-storeyed buildings with balcony need not be provided with refuge area, however flats without balcony shall be provided with refuge area as given above.

#### 18. Basements

- (1) These shall conform to those given in C-1:6 Part 4 NBC second revision and particular attention is drawn to the following:
- (2) The staircase of basements shall be of enclosed type having fire resistance of not less than 2 hours and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such position that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storey's of the building. It shall communicate with basement through a lobby provided with fire resisting self closing doors of one hour resistance . If the travel distance exceeds the desired level, additional staircases shall be provided at proper places.

- (3) Mechanical extractors for smoke venting shall be designed to permit 6 changes per hour in case of fire or distress call. For normal operations, air changes schedule shall be as given in part 8 NBC building services, section 3.
- (4) Discharge apparatus of all natural draft smoke vents shall be so arranged as to be readily accessible for opening by fire service personnel.
- (5) Use of basement for kitchen shall not be permitted. Building services such as, boiler rooms in basement shall comply with the provisions of the IE Act/ Rules.

**19. Terrace drainage :-**

- (1) In all non-residential buildings for the effective drainage of water which is likely to accumulate when the event of fire the drainage should be design for double the capacity what would have been required as per the GDCR.

**20. Materials for interior decoration**

- (1) Only materials conforming to class 1 flame spread classification as per IS: 12777-1989 shall be used. Materials which are combustible in nature and may spread toxic fumes or gases shall not be used for interior decoration or furnishings etc.
- (2) Glass of facade for high rise building shall be of 1 hour fire resistance

**21. Electrical installations:**

- (1) The planning, design and installation of electrical installation, air-conditioning and heating work shall conform to the provisions of part viii building services, section 2-electrical installations, section 3-air-conditioning and heating, national building code of India.

**22. Fire Safety of Existing Buildings**

- (1) The Owner/ developer/ occupants shall have the assessment of fire safety system of an existing building/structure damaged/undamaged carried out at stipulated periodical intervals through expert(s) chosen from a panel of experts identified by the Competent Authority. The intervals for maintenance and inspection shall be specified by Chief Fire Officer, usually every 6 months
- (2) The owner/developer/occupant on advice of such expert(s) shall carry out such repair/restoration and strengthening/retrofitting of the building found necessary so as to comply with the safety standards laid down in the national building code and the Indian standards as specified.
- (3) In case, the owner/developer/occupant does not carry out such action, the Competent Authority or any agency authorized by the competent authority may carry out such action at the cost of owner/developer/occupant.
- (4) The Competent Authority may direct the owner/developer/occupant, whether the building could be occupied or not during the period of compliance.

**CHAPTER IV- SPECIAL REGULATIONS FOR SPECIAL BUILDINGS****23. Requirements for Fire Protection for buildings having height 18 or more**

- (1) The builder has to provide for any other requirement for fire protection or Safety as may be required by the Chief Fire Officer when the building is complete for NOC to be issued.
- (2) Documents required for Issuing a NOC:
  - a. Letter of request for inspection.
  - b. Copies of receipt of charges paid for inspection and NOC.
  - c. Test certificate of extinguishers , check and refilled.
  - d. Copies of fitness certificate from inspector of lifts for all lifts.
  - e. Annual Maintenance contract signed and Notarized on Rs. 100 stamp.
  - f. Letter of acceptance from both the parties to contract.
  - g. Photographs and video of the site inspection and testing.

**24. Requirements for buildings having height 18 to 40 mts. (both inclusive)****24.1. Hydrant system:**

- (1) ON/OFF switches located near the hose reel hose or hydrant outlet, at each floor for the main Fire- Pump at the underground water tank with a capacity to discharge 900 liters per minute at 3 bar pressure as measured at the terrace level should be installed.
- (2) The Riser for the buildings exceeding 18 meters height should not be of less than 150mm. internal diameter. The riser should be connected to the bottom of the terrace tank with a stop valve and a NRV to act as a downcommer.
- (3) One riser is required for every 1000sq . meters floor area and if the building is divided into two or more parts then each part should have a separate riser with all the fittings at each floor level.
- (4) Each floor should have one hydrant outlet with a coupling for attaching a 63mm. dia. hose.
- (5) 25mm. bore Hose-reel hose with 8mm, shut-off nozzle at each floor landing. The length of the hose reel hose should be enough to reach the furthest corner of the floor.
- (6) Hose-box with 15 meters long 63mm. dia. hose and 12.5mm bore nozzle at alternate floors. The hose-reel hose should be coupled to the Riser.
- (7) Fire-service inlet should be installed at a point near the entry to the premises where a fire service vehicle can approach easily.
- (8) The Overhead tank shall be of a capacity of not less than 20,000 liters.
- (9) The underground tank shall be of not less than 1,00,000 liters.

## 24.2 Fire lift:

- (1) The Fire-lift and all the lifts should have a provision to ground automatically in case of electricity failure. Each building should have at least one lift as a Fire- lift and if the building is divided into two or more parts then each part should have a Fire-lift. Lift-well should have blowers to pressurize the lift-well so connected that it will automatically operate when alarm call point is operated, so that it prevents the lift well getting smoke logged.

## 24.3 Fire alarm:

- (1) Fire alarm calls point to be installed at each floor with sounders capable of being heard all throughout the building.

## 24.4 Fire Extinguishers:

- (1) One CO<sub>2</sub> extinguisher of 4.5kg and one extinguisher of 5kg DCP to be installed on each floor in case of commercial building

AND/OR

Two CO<sub>2</sub> extinguishers of 2kg capacity on eac floor and 5kg DCP extinguisher on alternate floors in case of residential buildings

- (2) If the building is divided into two or more parts then each part should have these extinguishers installed.

## 24.5 Staircase:

- (1) The staircase has to be open from at least one or two sides but if the staircase is in the center core of the building it has to be pressurized to prevent it getting smoke logged and open for two sides.
- (2) The riser/ downcommer should be located in the staircase or close to it to make it easily approachable in case of fire from the floor below or above.

## 24.6 Basement:

- (1) The basement of 200 sq. meters or more should be protected with;
  - a. Automatic sprinkler system with at least one sprinkler head for one car parking space
  - b. Additionally be protected by a Hydrant outlet and two 25mm. bore Hose- reel hoses with 8 mm. bore nozzles at each basement level.

## 24.7 Lightning arrester:

- (1) A lightning arrester should also be installed and be properly earthed to prevent damage to the building when the lightning strikes.

**25. Requirements for Fire Protection for buildings having height more than 40 mts**

- (1) Open space: Adjacent to the building 8 metres, motorable open to sky with atleast 40 ton load bearing capacity. Opening /gates to the premises atleast 8 metres wide.

The rescue I fire fighting vehicles should be able to approach all sides of the building.

(2) Fire fighting system:

Ultra high pressure fire fighting system, having the specifications stated here under shall have to be provided.

- a. Specification: The wet, ultra high pressure system shall comprise of ultra-high pressure (six plunger, 150 lpm @ 100 bar) pump working at not more than 1000 rpm connected to an electric motor of 1000 rpm. Only, feeding a 25mm. SS. Pipe of seamless construction and joints shall be argon welded.
- b. Each floor (Basement I ground I all higher floors) shall have, a 16mm. dia. R-II hose with 40 lpm. fog gun working at 100 bar pressure and be able to give a throw of 20 metres. There shall be a hose reel at each floor & shall be located at easily approachable place and shall be long enough to reach the extreme end of the floor.
- c. The pump shall be fed by a 10,000 liters water tank containing clean drinking quality soft water. The high pressure pump along with the tank may be located at the ground I basement I terrace level, there shall be appositive feed to the pump. The discharge line at the pump shall be fitted with a pressure regulator and a high pressure by-pass valve to make the system safe.
- d. A quick release adaptor at the ground floor shall be installed where fire service vehicle can be connected to the high pressure system line.

(3) Hydrant System:

The system shall be with a 150mm. internal dia. Riser with hydrant landing valves at each floor (Basement I ground I all higher floors). An air vent valve at the top most level. The riser shall be of 'C' class pipes and welded to fine finish and coated with anti-corrosive paint and coloured RED. All hydrant valves used shall be of SS. The hydrant pipe shall also be connected to the bottom of the terrace tank with a NRV and a stop valve.

(4) Sprinkler system:

The entire building (each floor including the basement, ground and all higher floors) shall be sprinklered. One sprinkler head (57 degree Celsius for every 10 sq. metres, only A separate line for the sprinklers shall be installed and connected to the base of the terrace tank with a shut-off valve and a NRV. The sprinkler system shall be fed from the underground tank with a separate pump and a sprinkler system installed with a gong valve (TYCO or similar type) and an Electrical flow switch for automatic operation. Fatihest end at each floor shall have a drain valve for the system to be tested. The tank supplying water to the sprinkler system shall be of 1,50,000 liters capacity installed with a pump of 2200

1pm @10 bar. Residential buildings are exempted from sprinklers on higher floors but must for basements and commercial floors.

(5) Fire lift:

All lifts of the building shall be Fire lifts and shall have a provision to ground in case of electrical failure and shall be installed with a panic button and a talk-back system. The lift shall not be installed in the center of the building and the lift shaft shall be ventilated from the top with smoke extractors. The lift for the higher floors shall end at the ground level and not go to the basement.

(6) Staircase :

The staircase shall be of RCC construction & ventilated and shall be kept open except the parapet wall, all the space above the parapet wall shall be kept open. The staircase shall be designed & located at the exterior part of the building. The width of the staircase shall not be less than 2 metres. If the staircase is in the center of the building and is not ventilated then a fire escape staircase (fire tower) has to be installed on either sides of the building with travel distance not more than 30 metres.

(7) Fire alarm :

The fire alarm shall be of addressable type and automatic coupled to the smoke & fire detector. The detectors shall be at least one unit for each enclosure on every floor. The alarm shall be audible in all parts of the building. The alarm system shall be UL certified.

(8) Extinguishers :

Each floor shall have 2 units of CO2 extinguishers of 4.5kg. capacity and 1 unit of 5kg. capacity of Dry chemical powder. These units shall be for each 1000 sq. metres of floor area.

(9) Electric supply :

- a. Electric supply to the High pressure Fire pump, fire lift, Sprinkler pump all shall be supplied parallel to the building supply and should not get cut-off if the supply to the building is switched off.
- b. All the electric wiring used shall be of 900 volt grading and connected to each enclosure through a MCB for a particular load.

(10) Auto glow signage:

All exits, corridors and staircase shall have auto glow signs for people to escape in case of fires in darkness. Even the floors shall have guide marks guiding towards the staircase.

(11) Lightning arrester :

A lightning arrester shall be installed and properly earthed.

(12) Ventilation:

- a. All enclosures should have openable windows and vents to be opened in case of fire or smoke accumulation.
- b. If the floor or the building is centrally air-conditioned then a provision to stop the air handling unit should be provided and it shall be blocked by a damper and the same air duct should act as smoke extractors with the extraction fan switching on automatically, if a fire or smoke is detected.
- c. Ventilation of stair-cases:-  
Every stair case provided under the foregoing clauses shall be lighted and ventilated to the satisfaction of the Authority from an open air space not less than 1 sq.mt.
- d. Windows in stair-case Bay:  
There shall be provided a window or windows of an aggregate area of at least 1.2 sq. metres on each storey in such of the wall of the stair-case room which abuts on such 1 sq.mt. open air space to light and ventilate such staircase.

(13) Skip floor or refuge room :

- a. The building shall have 10th & 18th floor as skip floors, where there shall be no enclosures allowed and can have some utilities installed but shall house a refuge room adjacent to the staircase.
- b. The refuge room shall be of 2 hours fire resistance with 2 hours fire resistant, self-closing door, lighting, rest and drinking water facilities and the exterior wall of the room shall have door size glass opening for fire service ladders to approach.

(14) Basement:

- a. The basement shall not open in to the staircase or lift well directly. If so then it has to be protected by 2 hours fire resistant self closing doors. The basements shall be provided with natural ventilations and more than one basement shall have mechanical smoke extraction installed with a capacity of one air change every 10 minutes .

(26) Mixed Occupancy

- (1) Places of assembly in buildings of other occupancy, such as all rooms in hotels, restaurants in stores and assembly rooms in schools, shall be so located, separated or protected as to avoid any undue danger to the occupants of the place of assembly from a fire/smoke originating in the other occupancy. No mixed development shall be permitted with the buildings having height more than 45mt. OR

Commercial and residential use shall be separated by provision of skip floor/service floor.

- (2) Every place of assembly, every tier of balcony, and every individual room used as a place of assembly shall have exits sufficient to provide for the total capacity therein

as required such that door width for assembly building shall not be less than 2000 mm. for every 600 person.

- (3) Every palace of assembly shall have at least four separate exits as remote from each other as practicable.
- (4) Clear aisles not less than 1.2m in width shall be formed at right angles to the line of seating in such number and manner that no seat shall be more than seven seats away from an aisle.
- (5) Rows of seats opening to an aisle at one end only shall have not more than seven seats. Under the condition, where all these aisles do not directly meet the exit doors, cross- aisles shall be provided parallel to the line of seating so as provide direct access to the exit, provided that not less than one cross aisle for every 10 rows shall be required. The width of cross-aisles shall be minimum of 1 m. Steps shall not be placed in aisles to overcome differences in levels, unless gradient exceeds 1 in 10.
- (6) The fascia of boxes, balconies and galleries shall have substantial railings not less than 1000mm high above the floor. The railings at the end of aisles extending to the fascia shall be not less than 1000 mm high for the width of the aisle or 1100mm high at the foot of steps.
- (7) Cross aisles except where the backs of seats on the front of the aisle project 600mm or more above the floor of the aisle shall be provided with railings not less than 900mm high.
- (8) No turnstiles or other devices to restrict the movement of persons shall be installed in any place of assembly in such a manner as to interfere in any way with the required exit facilities.
- (9) In theatres and similar places of public assembly where persons are admitted to the building at a time when seats are not available for them are allowed to wait in lobby or similar place until seats are available, such use of lobby or similar space shall not encroach upon the required clear width of exits. Such waiting shall be restricted to areas separated from the exit ways by substantial permanent partition or fixed rigid railing not less than 105cm high. Exits shall be provided for such waiting spaces on the basis of 1 person for each 0.3m<sup>2</sup> of
- (10) Waiting space area. Such exits shall be in addition to exits specified for the main auditorium area and shall conform in construction and arrangement to the general rules of exits given above.
- (11) No display or exhibit shall be so installed or operated as to interfere in any way with access to any required exit, or with any required exit sign.
- (12) All displays or exhibits of combustible material or construction and all booths and temporary constructions in connection therewith shall be so limited in combustibility or protected so as to avoid any undue hazard of fire which might endanger occupants before they have opportunity to use the available exits, as determined by the authority.

- (13) Places of assembly in buildings of other occupancy may use exits common to the place of assembly and the other occupancy, provided the assembly area and the other occupancy are considered separately, and each has exits sufficient to meet the requirements of the code.
- (14) Exits shall be sufficient for simultaneous occupancy of both the place of assembly and other parts of the building, unless authority determines that the simultaneous occupancy will not occur.
- (15) At least half the required means of exit shall lead directly outdoors or through exit ways completely separated from exits serving other parts of the building.
- (16) The decoration of place of assembly shall be of non-flammable materials. Fabrics and papers used for such purpose shall be treated with an effective flame retardant material. Stage settings made of combustible materials shall likewise be treated with fire retardant materials of class I flame spread.
- (17) Seats in places of public assembly, accommodating more than 300 persons, shall be securely fastened to the floor except as permitted in (o) below. All seats in balconies and galleries shall be securely fastened to the floor, except that in nailed-in enclosures like boxes with level floors and having not more than 14 seats, the seats need not be fastened. Tapestry of the seats shall be fire resistance.
- (18) Chairs not secured to the floor may be permitted in restaurants, night clubs and other occupancies where fastening of seats to the floor may not be practicable, provide that in the area used for seating, excluding dance floor, stage, etc, there shall be not more than one seat for each 1.4m<sup>2</sup> of floor area and adequate aisles to reach exits shall be maintained at all times.
- (19) Seats without dividing arms shall have their capacity determined by allowing 450 mm per person.
- (20) The spacing of rows of seats from back shall neither be less than 850 mm nor less than 700mm plus the sum of the thickness of the back and the inclination of the back. There shall be a space of not less than 350mm between the back of one seat and the front of the seat immediately behind it as measured between plumb lines.
- (21) Rooms containing high-pressure boilers, refrigerating machinery other than domestic refrigerator type, or other service equipments subject to possible explosion shall not be located directly under or adjacent to required exits. All such rooms shall be effectively cut off from other parts of the building and provided with adequate vents to the outer air.
- (22) All rooms or areas used for storage of any combustible material or equipment, or for painting, refinishing, repair or similar purposes shall be effectively cut off from assembly areas or protected with a standard system of automatic sprinklers. They shall be located away from staircases.
- (23) Every stage equipped with fly galleries, grid irons and rigging for movable theatre type scenery shall have a system of automatic sprinklers over and under such stage areas or spaces and auxiliary spaces, such as dressing rooms, store rooms and

workshops. The proscenium opening shall be provide with a fire- resisting cut lain, capable of withstanding a lateral pressure of 4 KN/ m<sup>2</sup> over the entire area. The curtain shall have an emergency closing device capable of power and when so closed, it shall be reasonably tight against the passage of smoke.

- (24) The stage roof of every theatre using movable scenery or having a motion picture screen of highly combustible construction shall have a ventilator or ventilators in or above it, open able from the stage floor by hand and also opening by fusible links or some other approved automatic heat/ smoke actuated device, to give a free opening equal to at least one-eighth the area of the floor of the stage.
- (25) The proscenium wall of every theatre using movable scenery or decorations shall have exclusive of the proscenium opening, not more than two openings entering the stage, each not to exceed 2 m<sup>2</sup> and fitted with self- closing fire resistant doors.
- (26) Automatic smoke vents actuated by smoke detectors shall be installed above the auditorium or theatres, including motion picture houses, with capacity of 8 air change per hour.

#### **27. Institutional buildings**

- (1) These shall conform to those given in 6.3 Part 4NBC second revision, and particular attention is drawn to the following:
- (2) In building or sections occupied by bed-ridden patients where the floor area is over 280 m<sup>2</sup>, facilities shall be provided to move patients in hospital beds to the other side of a smoke barrier from any part of such building or section not directly served by approved horizontal exits or exits from first floor (floor 2) of a building to the outside.
- (3) Not less than two exits of one or more of the following types shall be provided for every floor, including basements, of every building or section:
  - a. Doors leading directly outside the building.
  - b. Stairways
  - c. Ramps.
  - d. Horizontal Exits and
  - e. Fire staircase.
- (4) All required exits as per table 17.8.a.i of corridor width
- (5) No building constructed in whole or in part of combustible materials shall be used to confine inmates in cells or sleeping quarters, unless automatic sprinkler protection is provided.

#### **28. Industrial buildings**

- (1) These shall conform to those given in SECTION 6.7 Part 4 NBC Second revision and particular attention is drawn to the following:
  - a. Exits shall be so located that it will not be necessary to travel more than 20m from any point to reach the nearest exit.

- b. From every point in every floor area, there shall be at least 2 exits accessible in two different directions: where floor areas are divided into rooms, there shall be at least two ways of escape from every room, however small, except toilet rooms, so located that the points of access thereto are out of or are suitably shielded from areas of high hazard.
- c. All high hazard industrial occupancies shall have automatic sprinkler protection or such other protection as is appropriate to the particular hazard, including explosion venting for any area subject to explosion hazard, designed to minimize danger to occupants in case of fire or other emergency before they have time to utilize exits to escape.

**29. Requirements for Special buildings - hotels I malls I multi-plex:**

- 1. All the enclosures should have sprinkler system with separate piping and a fire pump for the sprinkler system, (one sprinkler head to cover 10 sqmts).
- 2. Each enclosure should have smoke sensor attached to a central alarm system.
- 3. In centrally air-conditioned building there shall be smoke detectors to cut-off the air-handling unit of the ac system.
- 4. There shall be a powered ventilation system at the top most area (with electric wiring done externally) to start with the alarm system.
- 5. All the information deWhen the plan is approved, before the construction of the building these shall be printed along with each plan and line drawing of the system.
- 6. When the building is ready, the Fire officers should inspect the same and the inspection should be photographed and videographed and this shall be submitted to the sanctioning authority along with the inspection report and all the inspecting officers shall sign the report and the certificate issued to this effect.
- 7. Rs. 25001 charges are collected for each inspection. The party shall bear the cost of photo I video. Rs. 10001- charges towards issuance of NOC.
- 8. There shall be a written agreement between the owners of the building and the contractor installing the system and the agreement shall be Notarized.

**30. Storage buildings**

- (1) These shall conform to those given in section 6.8 Part 4 NBC second revision and particular attention is drawn to the following:
- (2) Every area used for the storage of hazardous commodities to be permitted at ground level only and shall have an exit within 20 m of any point in the area where persons may be present. This distance may be increased to 35m where automatic sprinkler protection provided.

**31. Building for hazardous use**

- (1) These shall conform to those given in 6.9 Part 4 NBC second revision and particular attention is drawn to the following:

## CHAPTER V- STRUCTURAL SAFETY AND SERVICES

### 32. Structural Design

32.1 The structural design of foundations, elements made of masonry, timber, plain concrete, reinforced concrete, pre-stressed concrete and structural steel shall conform to the provisions of part VI structural design section- I Loads, section-2 Foundation, section-3 Wood, section-4 masonry, section-S Concrete, section-6 Steel, National Building Code of India, taking into consideration the Indian Standards and Guidelines for hazard safety as given below:

#### 32.2 General Structural Safety:

(1) The following Codes shall have to be followed:

- a. IS: 456: 2000 "Code of Practice For Plain And Reinforced Concrete"
- b. IS: 800- 1984 " Code of Practice for General Construction in Steel"
- c. IS 875 (Part 2): 1987 Design loads (other than earthquake) for building and structures Part 2 imposed loads.
- d. IS 875 (Part 3): 1987 Design loads (other than earthquake) for building and structures Part 3 Wind Loads
- e. IS: 883 1966 "Code of Practice for Design of Structural Timber in Building"
- f. IS 1904: 1987 "Code of Practice for Structural Safety of Building- Foundations"
- g. IS 1905: 1987 "Code of Practice for Structural Safety of Building- Masonry Walls"

(2) For Earthquake Protection

- a. IS : 1893-1984 "criteria for earthquake resistant design of structures (fourth revision)"
- b. IS : 13920-1993 "ductile detailing of reinforced concrete structures subjected to seismic forces - code of practice"
- c. IS :4326-1993 "earthquake resistant design and construction of buildings - code of practice (second revision)"
- d. IS is: 13828-1993 "improving earthquake resistance of low strength masonry buildings- guidelines"
- e. IS: 13827-1993 "improving earthquake resistance of earthen buildings-guidelines",
- f. IS: 13935-1993 "repair and seismic strengthening of buildings guidelines"

- g. "Improving Earthquake Resistance of Buildings - Guideline", by Expert Group, Government of India, Ministry of Urban Affairs & Employment, published by Building Materials and Technology Promotion Council, 1998.
- (3) For Cyclone/Wind Storm Protection
  - a. IS 875 (3)-1987 "code of practice for design loads (other than earthquake) for buildings and structures, part 3, wind loads"
  - b. "Improving Wind/Cyclone Resistance of Buildings -Guideline", by Expert Group, Government of India, Ministry of Urban Affairs & Employment, published by Building Materials and Technology Promotion Council, 1998.
  - c. Note:
    - i. Wherever an Indian standard including those referred in the national building code or the national building code is referred, the latest version of the same shall be followed.
    - ii. In pursuance of the above, a certificate as indicated in form- 2(c) shall be submitted along with building plans/drawings and other building information schedule annexed thereto.

### 33. Quality Control Requirements

- 33.1. The quality of all materials and workmanship shall conform to accepted standards and Indian standard specifications and codes as included in part v building materials and part vii constructional practices and safety, national building code of India.
- 33.2. All borrow pits dug in the course of construction and repair of buildings, embankments etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stepped for discharge into a river, stream, channel or drain, and no person shall create any isolated borrow pit which is likely to cause accumulation of water that may breed mosquitoes.
- 33.3. Alternative materials, method of design and construction and tests:-
  - (1) The provisions of the regulations are not intended to prevent the use of any material or method of design of construction not specifically prescribed in them provided any such alternative has been approved, nothing of the provisions of these regulations is intended to prevent the adoption or architectural planning and layout conceived as an integrated development scheme. the competent authority may approve any such alternative if it conforms to the provisions of the relevant parts of the national building code, regarding material, design and construction, and the material, method, or work offered is, for the purpose intended, at least equivalent to that prescribed in these regulations in quality, -strength, compatibility, effectiveness, fire and water resistance, durability and safety.
  - (2) All buildings shall be constructed on a quality control requirements.

- (3) In case of existing building under construction based on approved building permission, structural safety requirements shall have to be observed, however, due to such structure I work of strengthening/retrofitting in the event of natural disaster if certain setbacks and margin get reduced, special permission may be granted on case to case basis .

#### 33.4 Tests:

- (1) Whenever there is insufficient evidence of compliance with the provisions of the regulations or evidence that any material or method of design or construction does not conform to the requirements of the regulations, in order to substantiate claims for alternative materials, design or methods of construction, the competent authority may require tests, sufficiently in advance, as proof of compliance, these tests shall be made by an approved agency at the expense of the owner as follows :-
- (2) Test Methods:- Test methods shall be as specified by the regulations for the materials or design or construction in question, if there are no appropriate test methods specified in the regulations, the competent authority shall determine the test procedure, for methods or tests for building materials, reference shall be made to the relevant Indian standards as given in the national building code of India published by the bureau of Indian standards.
- (3) Test result to be preserved :- copies of the result of all such tests shall be retained by the competent authority for not less than two years after the acceptance of the alternative material
- (4) The testing of the materials as per Indian standards shall be carried out by laboratories approved by the competent authority on this behalf.
- (5) The laboratory/agency shall work out in consultation with the construction agency a testing programme of materials such as cement, steel and quality of concrete including its mixing, laying and strength at site as well as in the laboratory.
- (6) This should cover various stages of construction from foundation to completion as per regulation, the laboratory shall maintain a duly authenticated report in a bound register, copy of which will be submitted to the construction agency, which will in turn forward the testing report to the competent authority.

#### 34. Structural Stability and Fire Safety of Existing Buildings

- (1) The competent authority shall have the assessment of structural and/or fire safety of an existing building/structure damaged/undamaged carried out at stipulated periodical intervals through expert(s) chosen from a panel of experts identified by the competent authority.
- (2) The owner/developer/occupant on advise of such expert(s) shall carry out such repair/restoration and strengthening/retrofitting of the building found necessary so as

to comply with the safety standards laid down in the national building code and the Indian standards as specified.

- (3) In case, the owner/developer/occupant does not carry out such action, the competent authority or any agency authorized by the competent authority may carry out such action at the cost of owner/developer/occupant.
- (4) The competent authority shall specify the period within which such compliance is to be carried out.
- (5) The competent authority may also direct the owner/developer/occupant, whether the building could be occupied or not during the period of compliance.
- (6) In case of existing building under construction based on approved building permission, structural safety requirements shall have to be observed, however, due to such structural work of strengthening/ retrofitting if certain setbacks and margin get reduced, special permission.

#### CHAPTER VI - MISCELLANEOUS

##### 35. Effect of other provisions of GDCR

- 35.1 With regard to procedure to be followed the manner of application, the documents to be submitted along with the applications, the protocols of drawings to be submitted, etc. unless otherwise prescribed, the provisions of GDCR of the appropriate authority shall apply *mutatis mutandis*.
- 35.2 Notwithstanding anything contained in any regulations or any relevant law, for the purpose of fire prevention and life safety, these regulations shall be applicable.
- 35.3 Having obtained NOC or permission under these regulations, shall not deem to have obtained permissions under other or relevant regulations or relevant law.

##### 36. Safety And Maintenance Of Buildings

- 36.1 It shall be the duty of every owner to maintain and keep in perfect working order, at all times, all the fixed fire protection systems, installations and first-aid fire extinguishers, as well as fire lifts and escape stairs, provided in the building.
- 36.2 At intervals of not more than 12 months, he shall submit a Certificate from the Fire Department or the I Registered/ Accredited Fire Protection Consultant certifying that all the requirements as stated above are properly maintained, and are in good - working condition

##### 37. Fire protection requirements during construction of buildings

- 37.1. Fire and life safety during construction: During the construction of any building or buildings or for development on the site, minimum safety measures, as specified in NBC Part 7, "Construction Practices and safety" shall be complied .

**Form - A**

1. Name of building
2. Address of the building
3. Name & address of the building/ promoter
4. Name & address of the owners/ occupiers of individual flats
5. Plot area
  - a) Title
  - b) Land use (in case of residential building indicate no of dwelling units)
6. Covered area (grade level)
7. Height of the building
8. Overall height (from grade level)
  - a) Whether setback areas are conforming to unified building bye law/AUDA regulations.
9. Number of basements (please indicate level below in each case)
  - a) If basement extends beyond building line, please indicate the load bearing strength of the roof of the basement
  - b) Area of basement
  - c) Whether any plaza is proposed? Is so, details of the level of piazza and ramps etc be indicated.
10. Number of floors (including ground floor)
11. Occupancy use (please mention separately for basement and floors)
12. Covered area of typical floor
13. parking areas (please give details)
14. Details of surrounding property/ features
15. Approach to proposed building, width of the road and connecting roads if any
16. Please give details of water supply available exclusively for fire fighting

17. Have wet risers been provided ?
18. If yes, please indicate the number of risers and internal diameter of each. One wet riser attached to the bottom of terrace tank with NRV & stop valve in down coming also.
19. Has any down comer been provided ? If so, please give details
20. Is a public or other water storage facility available nearby? If so, please give the capacity and distance from your building, also please indicate if it is readily accessible
21. Give any other information that you can regarding availability of water supply for fire fighting.
22. Are internal hydrants being provided? If so, please indicate :
  - a) No. Of hydrants on each floor including basements and terrace minimum one hydrant for every 1000 sq.mt of floor area.
  - b) Have these hydrants single or twin outlets? Bore not less than 25mm, through bore with 8mm shutoff nozzle to reach the farthest corner of the floor.
23. Are internal hydrants being provided? If so please indicate:
  - a) No of hose-reels on each floor including basements and terrace
  - b) Bore and length of hose reel tubing on each reel
  - c) Size (bore) and type of nozzle fitted to each hose reel.
  - d) Is the hose reel connected directly to the riser only?
24. Is the hose reel connected directly to the riser only ?

Are fire hoses being provided near each hydrant ? If so, please indicate

  - a) The type of hose
  - b) The size (bore) of hoses
  - c) The length of each hose
  - d) Total no of hoses provided near each hydrant
25. Are branch pipes being provided ? (not:- universal branch pipe conforming to is:2871 - 1983 is to be provided as per is:3844-1989, nozzle dia. 12.5mm.
26. Is the basement to use for car parking ?
  - a) Is it being sprinkled ?

- b) Whether any cubicles are proposed in the basement/
  - c) If so, the area of each cubicle. Whether segregation/ compartmentation of the basement is being provided? If so, please give details.
27. Is the building being equipped with automatic fire detection and alarm system? If so please indicate
- a) The type of detectors used
  - b) The standard to which the detectors conform
  - c) The code to which the installation conforms.
28. Are manual call boxes being installed in the building for raising an alarm in the event of outbreak of a fire? If so, please give details.
29. Is public address system being installed in the building with loudspeakers on each floor?
30. Is fire control room being provided in entrance lobby of the building? In the case of building having floor area of 5000 sq.mt or more and Height more than 30mt.
31. Is an intercom system being provided between the different floors and the fire control room in entrance lobby?
32. How many staircases are being provided in the building? Please indicate in each case
- a) Width of the stairway
  - b) Width of risers
  - c) Height of risers
  - d) If the treads are of non-slippery type.
33. What is the proposed average occupant load per floor?
34. How many lifts are being installed in the building? Please indicate in each case
- a) The floor between which the lift runs
  - b) The type of door fitted to the lift car and landing doors
  - c) Fire resistance rating of the lift car
  - d) Floor area of the lift car
  - e) Loading capacity of the lift car
  - f) Is communication system being installed in the lift car?
  - g) Is a fireman's switch being installed in the lift for grounding it in the event of a fire?
35. Are stationary fire pumps being installed for pressurizing the wet riser? If so please indicate
- a) The number of pumps
  - b) The size of suction and delivery connection each pump
  - c) The output of each pump

- d) The maximum head against which the pump can operate at the output mentioned me
  - e) Is the pump automatic in action?
36. Is a standby source of electric supply being provided ? If it is through a generator, please indicate :
- a) The capacity (output)
  - b) The function that can be maintained simultaneously by the use of generator such as operating lifts, fire pumps, emergency lighting etc
  - c) Will the generator be automatic in action or has to be started manually?
37. Are any yard hydrants being fed fi\*om the building's fire pump?
38. where more than one lift is being installed in a common enclosure, will individual lifts be separated by fire-resisting walls of 2 house fire rating?
39. Will the lift lobby or the stairway be pressurized? If so, give details.
40. Will the lift lobbies and staircases be effectively enclosed to prevent fire/ smoke entering them from outside at any floor?
41. Will all the exits and direction of travel to each exit be sing posted with illuminated signs?
42. Is false ceiling being provided in any portion of the building? If so please indicate and mention of the material being used for the false ceiling is combustible or non- combustible?
43. Will the building be centrally air-conditioned? If so please indicate,
- a) The material used for construction of and its fittings
  - b) The type of tinning used for ducts if any
  - c) The type of lagging used, if any for insulating any portion of the duct,  
Please also indicate how the lagging is secured.
  - d) If false ceiling is being installed please give infonnation as at 42 above.
  - e) If plenum is used as return air passage, Is it being protected with fire detectors? Please give details.
  - f) Is a separate AHU being provided for each floor?

- g) Whether automatic shutdown of AHU is coupled with detection system?
  - h) Is the ducting for each floor effectively is it continuous on more than one floor?
  - i) Will fire dampers be provided in acducting? if so, give details of their installation?
44. Where are the switch-gears and transformers being located? please indicate. Please indicate as it shall not be allowed inside the building.
- a) If the switchgears and transformers have been housed in separate compartments, effectively separated from each other and from other portions of the building by a 4 hours fire resistance wall?
  - b) What precautions will be taken to portions a possible fire in the transformers from spreading?
45. (i) Where electrical cables, telephone cables, dry I wet risers I down-comers pass through a floor or a wall, will the spaces (apertures) around the cables/ pipes be effectively sealed/ plugged with non-combustible , fire resisting material?
- (ii) Ventilation
- a) Whether natural ventilation is relied upon?  
If so give details of vents for stairwell, lift shaft etc
  - b) Whether mechanical ventilation is being proposed?  
If so, give details of proposed system indicating the number of air changes for the basements and other floor.
  - c) Whether mechanical ventilation is being coupled with automatic detection system?
46. please indicate the number and type of fire extinguishers which will be provided at various locations and the arrangement for the maintenance of the extinguishers
47. Please indicate if the fire extinguishers bear the isi certification mark?
48. Whether the refuge area is being provided ? If so, the floor on which it will be provided and the total area being provided floor-wise.
49. Is the building being protected against lightning? If so does the lightning protector conform to any code? Please give details.
50. Please confirm that the work has not been started on site and construction will be started only after final approval of the competent authority. Give position of construction at site.

**FORMS****1. FORMS FOR APPLICATION**

1.1. For high rise building and for special building like assembly, institutional, industrial storage and hazardous occupancy the following additional information shall be furnished/indicated in the following plans in addition to the items under clause 3.3.

- (1) Access to fire appliances/vehicles with details of clear motorable access way around the building and vehicular turning circle.
- (2) Size (width) of main and alternate staircase along with balcony approach, corridor, and ventilated lobby approach as the case may be.
- (3) Location and details of lift enclosures.
- (4) Location and size of fire lift.
- (5) Smoke stops lobby/door, where provided.
- (6) Refuse chutes, refuse chamber, service duct etc. where to be provided.
- (7) Vehicular parking space.
- (8) Refuse area, if any.
- (9) Details of building services, air-conditioning system with position or dampers, mechanical ventilation system, electrical services, boilers, gas pipes etc. where provided.
- (10) Details of exits including provision of ramps etc. for hospitals.
- (11) Location of generator, transformer and switch gear room where required.
- (12) Smoke exhaustor system, if any.
- (13) Details of fire alarm system network.
- (14) Location of centralised control, connecting all fire, suite, built-in fire protection arrangements and public address system etc. where required.
- (15) Location of dimension of static water storage tank and pump room.
- (16) Location and details of fixed fire protection installations such as sprinkles wet risers, house reels, drenchers, CO2 installations etc.
- (17) Location and details of first-aid firefighting equipment/installations.
- (18) Location for electric transformer.

No. AS/2016-7/DPC/152016/ 26 /Y :- In exercise of the powers conferred by section 11 of the Gujarat District Planning Committees Act, 2008 (Guj. 11 of 2008), the Government of Gujarat hereby makes the following rules, namely:-

1. **Short title** :- These rules may be called the Gujarat District Planning Committees Rules, 2016.
2. **Definitions**:- (1) In these rules, unless the context otherwise requires,-
  - (a) "Act" means the Gujarat District Planning Committees Act, 2008 (Guj. 11 of 2008);
  - (b) "list of voters" means the list of,-
    - (i) the elected members of the *District Panchayats*, and
    - (ii) the elected members, by whatever name called, of the municipalities in a district as prepared under rule 7;
  - (c) "polling station" in relation to an election means the place for taking poll of the election;
  - (d) "Returning Officer" means an officer appointed as such by the District Collector under sub-section (2) of section 4 of the Act.
- (2) The words and expressions used in these rules but not defined shall have the meaning respectively assigned to them in the Act.
3. **Constitution of District Planning Committees**:- (1) There shall be constituted a District Planning Committee for each District by the State Government in accordance with sub-section (1) of section 3 of the Act.
- (2) (i) The State Government shall, as soon as may be and within one month from the date of commencement of these rules, specify, by notification, in the *Official Gazette*, the total number of members of the Committee for each District.
- (ii) While determining the number of elected members for each District,-
  - (a) the State Government shall, take into consideration the figures of population of the rural area and of the urban area of a district in whole thousand, raising any such figures to next higher number in case of any residual figure of five hundred or more or ignoring any residual figure below five hundred, as the case may be;

- (b) for the purpose of any calculation, except that for final determination of the number, any figure upto the first place of decimal shall be ignored;
- (c) in order to arrive at the final determination, any digit of five or higher in the first place of decimal shall be rounded off to one and added to the whole number and any digit lower than five in the first place of decimal shall be ignored.

4. **Appointment of Election Authority.**— (1) For conduct of election of members of the committee, the State Government shall appoint the Collector of each District as the Election Authority for that District.

(2) Subject to the superintendence, control and directions of the Election Authority, the election shall be conducted by the Returning Officer.

5. **Appointment of Returning Officer.**— For the purpose of conduct of election of the members of the Committee, the Election Authority shall appoint an officer to be the Returning Officer.

6. **Appointment of Assistant Returning Officer.**— (1) The Election Authority shall appoint as many as Assistant Returning Officers for each constituency as he may deem fit.

(2) Every Assistant Returning Officer shall, subject to such control and restriction as may be imposed by the Returning Officer, be competent to perform all or any of the functions of the Returning Officer:

Provided that no Assistant Returning Officer shall perform any of the functions of the Returning Officer which relates to the scrutiny of nomination papers unless the Returning Officer is, due to unavoidable reasons, prevented from performing the said functions.

(2) The Returning Officer and Assistant Returning officer shall work under the general direction of superintendence of the Election Authority.

(4) It shall be the duty of the Returning Officer at an election to do all such acts and things as may be necessary for effectively conducting the elections in the manner provided by or under these rules.

7. **Preparation of List of Voters.**— (1) For the purpose of holding the election as required under sub-section (2) of section 3 of the Act, the Collector shall call upon District Development Officer of the District and the Chief Officer of the concerned Municipality to furnish to him a list of the elected members / Councillors of the District Panchayat and of the concerned Municipality respectively, before the date specified by him in that behalf.

(2) The authorities referred to in sub-rule (1) shall furnish full and true information (including disqualification, if any) within seven days from the date of the notice.

(3) On receipt of such list, the Collector shall verify and scrutinise the particulars furnished under sub-rule (2) and prepare a provisional list of voters separately for each constituency in Gujarati and every such list shall be published on the notice board of the Office of the Collector and respective offices of the District Panchayat and of the Municipalities. Any voter whose name is included in the list of voters may raise any objection in writing as to the omission or error which he finds in the notice and in the list of voters, to the Collector within three days from the publication of list of voters and the Collector shall, on verification of record, if he finds any omission or error, correct such omissions or error. The decision of the Collector shall be final.

(4) After the process under sub-rule (3) is over, the final list of voters on the basis of list prepared under sub-rule (3) shall be published by the Election Authority in the like manner in Form I and shall remain in force as the list of voters for the purpose of any bye-election, until it is revised by the Collector in the like manner.

8. **List of Voters be conclusive.**— Subject to any disqualification incurred by a person, the final list of voters published under sub-rule (4) of rule 7, shall be conclusive evidence of the voters' right to vote or, as the case may be, his right to be elected at an election.

9. **Polling Stations.**— The Returning Officer shall, with the previous approval of the Election Authority, provide polling stations at such place or places as may be convenient to conduct free and fair election and publish the list of polling stations.

10. **Appointment of Presiding Officer and Polling Officer.**— (1) The Returning officer shall appoint an officer of the Government or employee as the Presiding Officer for each polling station and such number of Polling Officers as may be deemed necessary to assist the Presiding Officer:

Provided that, if a Polling Officer is absent from the polling station, the Presiding Officer may, with the approval of the Returning Officer, appoint any Government officer or employee as a Polling Officer.

(2) A Polling Officer shall, if so directed by the Presiding Officer, perform all or any of the functions of the Presiding Officer under these rules.

(3) If the Presiding Officer is absent due to illness or other unavoidable circumstances, his functions at the polling station shall be performed by such Officer as may be authorised by the Returning Officer.

**11. Duties of Presiding Officer and Polling Officer.** - (1) It shall be the duty of the Presiding Officer at a polling station to keep order thereat and take all actions necessary to see that the poll is freely and fairly conducted.

(2) Each Polling Officer may, if so directed by the Presiding Officer, perform all or any of the duties assigned to the Presiding Officer under these rules.

(3) It shall be the duty of the Polling Officer at polling station to assist the Presiding Officer at such polling station in the performance of his functions for conducting free and fair election.

**12. Appointment of Dates for Various Stages of Election.** - (1) The Election Authority shall notify the dates of various stages of election to the Committee in Form I.

(2) The election programme referred to in sub-rule (1) shall not be published until the final List of Voters is published by the Collector under sub-rule (4) of rule 7. The stages of the election programme shall be notified taking into consideration the period specified in the Table below:

(2) The order referred to in sub-rule (1) shall be pasted on the notice boards of the offices of the District Panchayat and the Returning Officer, Municipalities and shall also be published in daily local newspapers in Gujarati, having wide circulation in the concerned area.

**14. Notice Inviting Nominations.** - Immediately on the issue of a public notice under rule 5 read with rule 12, the Returning Officer shall issue a public notice, in Form I (A).

- inviting nominations of candidates for such election and specifying therein the time and the place at which the nomination papers shall be delivered;
- time and the place for scrutiny of nominations; and
- time and the place at which the notice of withdrawal of candidature is to be delivered.

**15. Nomination of candidates.** - (1) Every nomination paper presented under rule 16 shall be in Form II;

Provided that incomplete or defective nomination paper or incomplete declaration in a nomination paper shall be deemed to be a defect of substantial character.

(2) A person shall be entitled to file his nomination as a candidate for election if he is qualified to be chosen to fill that seat under the provisions of Act and his name is entered in the final list of voters.

(3) The nomination paper shall be supplied by the Returning Officer to any voter on demand.

**16. Presentation of Nomination Paper and Requirements for Valid Nominations.**—(1) Every nomination of candidate in Form II shall contain full particulars of the candidate and be subscribed by two voters of his constituency, one of whom shall be a proposer and the other shall be a seconder; and bear the signature of the candidate in token of his willingness to be so nominated, on or before the date appointed under rule 12, and shall be delivered, either in person or by his proposer, to the Returning Officer during the time and at the place specified in the order made under the said rule.

(2) Any person who is not subject to any disqualification as a voter under the provisions of the Act, or the rules and whose name is entered in the final list of voters for the constituency, for which the candidate is to be nominated, may subscribe as proposer and seconder.

(3) On presentation of a nomination paper, the Returning Officer shall satisfy himself that the names and the numbers of the candidate and his proposer and seconder as entered in the nomination papers are the same as are published in the final list of voters referred to in sub-rule (4) of rule 9.

(4) The Returning Officer may condone any clerical or technical error in the nomination paper in regard to the said names or numbers to be corrected in order to bring them into conformity with the corresponding entries in the list of voters, and where necessary, any minor clerical or printing error in the said entries may be condoned.

**17. Notice of Scrutiny of Nomination Papers.**—The Returning Officer shall, on receiving the nomination papers (in Form II) under rule 16, acknowledge the receipt thereof in Form II A and inform the person or persons delivering the same, of the day, time and place fixed for the scrutiny of nominations and shall enter on the nomination papers, its serial number and shall sign thereon, stating the date on which and the hour at which the nomination paper has been delivered to him and shall, as soon as may be, thereafter cause to be affixed in some conspicuous place in his office, a notice of the nomination containing descriptions similar to those contained in the nomination paper, both of the candidate and of the proposer.

**18. Scrutiny of Nomination Papers.**—(1) On the date fixed for scrutiny of nomination papers under rule 17, the candidates, their election agents, one proposer of each candidate and one other person duly authorised in writing by each candidate may attend at the time and place appointed in this behalf and the Returning Officer shall give them reasonable facilities for examining the nomination papers of all candidates which have been delivered under rule 16.

(2) The Returning Officer shall then examine the nomination papers and decide all the objections which may have been received in respect of any nomination and may, either on such objection or on his own motion, after making such inquiry as he deems fit, may reject any nomination.

(3) Nothing contained in sub-rule (2), shall be deemed to authorise the rejection of the nomination of any candidate on the ground of any irregularity in respect of a nomination paper, if the candidate has been duly nominated by means of another nomination paper in respect of which no irregularity has been committed.

(4) The Returning Officer shall hold the scrutiny on the date appointed in this behalf under rule 17 and shall not allow any adjournment of the proceedings except when such proceedings are interrupted or obstructed for reasons beyond his control:

Provided that in case any objection is raised by the Returning Officer or is made by any other person, the candidate concerned may be allowed time to rebut it not later than the next day and the Returning Officer shall record his decision on the date to which the proceedings have been adjourned.

(5) The Returning Officer shall endorse on each nomination paper his decision accepting or rejecting the same and if the nomination paper is rejected, he shall record in writing a brief statement of his reasons for such rejection.

(6) For the purposes of this rule, the production of a certified copy of any entry made in the list of voters of the relevant constituency shall be conclusive evidence of the right of any voter named in that entry to contest election, unless it is proved that the candidate is disqualified.

**19. Publication of List of Valid Nominations.**—Immediately after all the nomination papers have been scrutinized and decision accepting or rejecting the same has been recorded, the Returning Officer shall prepare a list, in Form III of candidates whose nominations have been accepted and shall affix the list on the notice board of his office recording the date on which and the time at which the list was so affixed.

**20. Appeal.**—(1) Any person aggrieved by the decision of the Returning Officer either rejecting his own nomination / candidature or accepting the nomination of any other candidate, may prefer an appeal, against the order of the Returning Officer, to the Election Authority within three days from the date on which the notice containing the names of the candidates accepted by the Returning Officer is affixed on the notice board under rule 19; and shall ordinarily furnish on the same day to the Returning Officer a copy of the appeal of the petitioner together with as many copies of the petition as there are candidates whose nomination papers have been accepted excluding himself.

(2) The decision of the Election Authority on appeal preferred under sub-rule (1) shall be final.

**21. Withdrawal of Candidature.**—(1) Any candidate may withdraw his candidature by giving a notice in writing, subscribed in FORM IV and delivered by him to the Returning Officer,—

(a) on the day immediately following the day after the expiry of the period referred to in sub-rule (2) of rule 12, where no appeal is preferred under rule 20; or

(b) on the day next following the day on which the decision of the Returning Officer is given, where such appeal is preferred.

(2) The notice shall be delivered to the Returning Officer before 3.00 O'clock in the afternoon on the last date fixed under rule 12 for withdrawal of candidature.

(3) Notice may be given either by the candidate in person or by his proposer.

(4) No person who has given a notice of withdrawal of his candidature under sub-rule (1) shall be allowed to cancel the notice.

(5) The Returning Officer shall, on being satisfied as to the genuineness of a notice of withdrawal and the identity of the person delivering it, under sub-rule (2), cause the notice to be affixed on the notice board of his office.

**22. Preparation of List of Contesting Candidates.**—(1) On the day next succeeding the last date fixed under rule 12 for withdrawal of candidature, the Returning Officer shall prepare and publish in Form V, a list of contesting candidates, whose nomination papers have been finally accepted and who have not withdrawn their candidature within the specified period.

(2) Subject to the provision of sub-rule (3), the said list shall contain the names in alphabetical order in Gujarati and the address of the contesting candidates as given in the nomination papers.

(3) The alphabetical order referred to in sub-rule (2) shall be determined with reference to the surnames of the candidates and the proper names of other candidates.

**23. Publication of List of Contesting Candidates.**—As soon as the copy of the list of contesting candidates is prepared, the Returning Officer shall immediately cause it to be published and affixed on the notice board of his office and shall also supply a copy thereof to each of the contesting candidates and, on demand, to his election agent.

**24. Countermanding of Poll on Death of Candidate Before Poll.**—If a contesting candidate dies and a report of his death is received by the Returning Officer before the commencement of the poll, the Returning Officer shall, upon being satisfied of the event of the death of the candidate, countermand the poll and all proceedings with reference to the election shall be commenced afresh in all respects for a fresh election:

Provided that—

(a) no further nomination shall be necessary in the case of a person who was a contesting candidate at the time of the countermanding of the poll; and

(b) no person who has given a notice of withdrawal of his candidature under rule 21, before the countermanding of the poll, shall be ineligible for being nominated as a candidate for the election after such countermanding.

**25. Uncontested Elections.**—If, after the expiry of the period within which candidatures may be withdrawn under rule 21, the number of candidates whose nominations have been accepted is equal to or less than the number of seats to be filled, the Returning Officer shall forthwith declare such candidate or all such candidates to be duly elected to fill the seat or the relevant number of seats, as the case may be, and shall complete and certify the declaration in Form VI.

**26. Procedure for Conduct of Election.**—The procedure prescribed in The Gujarat Panchayats Elections Rules, 1994 and The Gujarat Municipalities (Conduct of Elections) Rules, 1994 for the purpose of conduct of election, including counting of votes of the members of District Panchayats and Councilors of Municipalities, shall, *mutatis-mutandis*, apply in respect of the elections of the members of the District Planning Committee.

27. **Declaration of Result.**—When the counting of votes has been completed, the Returning Officer shall, then, declare the result of the candidates having been elected in Form-VII and shall send signed copies thereof immediately to the Election Authority.

28. **Publication of Names of Elected Members of Committee.**—(1) The Election Authority shall publish the names of all elected members of the District Planning Committee by causing a list of such names together with their permanent addresses and the names of the constituencies from which they are elected to be pasted on the notice board or at any prominent place in his office.

(2) The Election Authority shall send an entire list of elected members to the State Government.

29. **Filling of Casual Vacancies.**—In the event of any vacancy occurring on account of death, resignation, disqualification or for any other reason, the Secretary of Committee shall forthwith communicate the occurrence of the vacancy to the Election Authority of the District Area and such vacancy shall be filled in by holding bye-election in the like manner.

30. **Meetings of Committee and procedure to be followed.**— (1) The Committee shall meet for the transaction of its business, as often as may be necessary, but not less than twice in a year.

(2) All meetings of the Committee shall be presided over by the Chairperson.

(3) The Chairperson or in his absence, the senior most member of the Committee authorised by the Chairperson, shall fix the day, time and place of the meeting and approve the items of the agenda for the meeting.

(4) At least ten days clear notice of the meeting before the date of meeting along with the agenda shall be given to the members by the Secretary of the Committee. The notice shall be delivered personally upon acknowledgement or transmitted through any secured and reliable method of communication as may be recognised under any law for the time being in force.

(5) An item not included in the agenda of the meeting of the Committee may be taken up for consideration with the permission of the Chairperson or in his absence, the presiding member.

31. **Place of Meeting.**— (1) All meetings of the Committee shall be held at the headquarters of the Committee or such other place as may be decided by Chairperson.

(2) The first meeting of the newly constituted Committee shall be held within thirty days from the date of the constitution of the Committee. The period of ninety days shall not intervene between its last meeting and the next meeting.

32. **Quorum for Meeting and Transaction of Business.**— (1) One-third of the total members shall form the quorum for the transaction of business at every meeting of the Committee.

(2) If there is no quorum within half an hour after the time appointed for the meeting of the Committee, the meeting shall be adjourned by half an hour on the same day and at the same place and there after the business on the agenda of the said meeting shall be transacted, irrespective of there is a quorum or not.

(3) If the business on the all agendas items of the meeting of the Committee cannot be transacted on the appointed day on which the meeting is held, the Chairperson of the Committee may convene the meeting on the subsequent day.

33. **Restrictions on Attending Meeting by Proxy.**— No proxy or a holder of power of attorney or letter of authority shall be eligible to attend a meeting of the Committee on behalf of any member of the Committee.

34. **Decisions of Committee.**— All decisions at a meeting of the Committee shall as far as possible be arrived at by general consensus. However, in case of disagreement amongst the members, the matter shall be decided by simple majority of the members present at the meeting. Every member shall have one vote and the voting shall be by rising of hands. In case of an equality of votes, the Chairperson shall have and exercise a second or casting vote.

35. **Minutes of Meeting.**— (1) The Secretary of the Committee shall record the minutes of proceedings of the meeting at the earliest but not later than three days on the conclusion of every meeting of the Committee and thereafter obtaining the approval of the Chairperson or, in his absence, the member presiding the meeting, as the case may be, enter the minutes in the book kept for the purpose.

(2) The minutes of each meeting shall contain the correct summary of the decisions arrived at the meeting.

(3) The minutes shall also contain,-

- (i) the names of the members present at the meeting,
- (ii) in the case of each decision taken at the meeting, the names of the members, if any, dissenting from or not concurring with the decision taken.

- (4) The minutes of the meetings of the Committee shall be evidence of the proceedings recorded therein.
- (5) The Secretary of the Committee shall after the approval of the minutes of the meeting by the Chairperson or, the member presiding the meeting, as the case may be, send the copy of the minutes as entered in the minutes book to every member of the Committee for his record and information.
- (6) The Secretary of the Committee shall also communicate, with the approval of the Chairperson or, the presiding member at meeting, the relevant extracts of the decisions taken at the meeting of the Committee or any of its sub-Committee to all concerned for necessary follow-up action and to monitor their compliance by evolving a suitable reporting system. Periodical reports on follow-up action shall be submitted to the Committee.

**36. Custody of Records of Committee.**— All records of the Committee shall be in the custody of the Secretary of the Committee.

**37. Maintaining order at Meeting of Committee.**— The Chairperson shall preserve the order at a meeting. The Chairperson may direct any member who refuses to obey his decision or whose conduct is, in his opinion grossly disorderly, to withdraw himself immediately from the meeting and any member so ordered shall withdraw himself immediately from meeting and shall absent himself during the reminder period of the day's meeting.

**38. Constitution of Sub-Committees.**— The State Government may constitute sub-committees consisting of members of the District Planning Committee and may include therein the experts nominated from the respected field by it for submitting reports after studying about the developmental requirements of that District.

**39. Forwarding of the Draft Development Plan.**— As soon as may be within one month from the date when the Committee adopts the Draft Development Plan for the district or within such date as the State Government may, by order specify, the Chairperson shall forward such Development Plan to the State Government.

### 3. DEVELOPMENT PERMISSION AND BUILDING USE PERMISSION

---

#### 3.1. Development Permission Required

Subject to provisions of Section 26, 27, 28, 34 and 49 of the Act, no person shall undertake any building or development activity in or over any and without obtaining a Development Permission prior to commencement of building or development activity. A Development Permission shall mean Permission for development granted by the Competent Authority.

#### 3.2. Development Permission Not Required

No Development Permission shall be required for undertaking building works listed in Schedule 1.

#### 3.3. "Grant of a Development Permission"

Grant of a Development Permission by the Competent Authority shall mean an acceptance by the Competent Authority that the development requirements of the proposed building, for which Development Permission has been granted, conforms to these Development Regulations, and that the person holding the Development Permission may undertake proposed development or construction of the proposed building within the limits of the Development Area in conformity with the Development Plan Proposals.

##### 3.3.1. It does not constitute acceptance of correctness, confirmation, approval or endorsement of:

- a. Title, ownership, and easement rights of the Building-unit for which the building is proposed;
- b. Variation in area from recorded areas of a Building-unit;
- c. Location and boundary of Building-unit;
- d. Workmanship, soundness of material and structural safety of the proposed building;
- e. Structural reports and structural drawings

and shall not bind or render the Competent Authority liable in any way in regard to (a), (b), (c) (d) and (e) above.

##### 3.3.2. "Liability"

Notwithstanding any Development Permission granted under the Act and these Regulations, any person undertaking any development work shall continue to be wholly and solely liable for any injury or damage or loss whatsoever that may be caused to anyone in or around the area during such construction and no liability whatsoever in this regard shall be cast on the Competent Authority or any officer/employee to whom power has been delegated.

#### 3.4. "Development Requirements"

Development Requirements of the following aspects shall be mandatory and may be examined by the Competent Authority for ensuring compliance of the development to these Regulations:

1. Permissible Ground Coverage
2. Permissible Floor Space Index

3. Permissible Height and the various floors
4. Permissible Open Spaces enforced under these Regulations - Common Plot, Marginal Open
5. Spaces, Setbacks and other open spaces.
6. Permissible Uses of Land and Buildings
7. Arrangements of stairs, lifts, corridors and parking
8. Minimum requirement of sanitary facility
9. Minimum Common Facility
10. Required light and ventilation
11. Minimum requirement of Fire Prevention and Safety, and Clearance from Chief Fire Officer as applicable.

### 3.5. "Lapse of Development Permission"

A Development Permission shall mean to have lapsed if construction of the building is not commenced within the period stipulated in Regulation No. 6.5.2

### 3.6. "Cancellation of Development Permission"

Cancellation of a Development Permission by the Competent Authority shall mean that the Development Permission shall no longer be valid, and that the permission granted by the Competent Authority to undertake construction stands withdrawn.

The Development Permission, if secured by any person by any misrepresentation or by producing false documents, will be treated as revoked and scrutiny fees paid for such development shall be deemed to have been forfeited.

Following Cancellation of a Development Permission, construction may no longer be undertaken on the Building-unit for which the Development Permission was granted. A Notice of Cancellation of Development Permission shall be issued in writing by the Competent Authority.

### 3.7. Unauthorized Building

Any building or development, requiring a Development Permission, undertaken without grant of Development Permission, or undertaken after the Development Permission has lapsed, or, after the Development Permission has been cancelled, revoked or suspended, shall be deemed to be an Unauthorized Building.

#### 3.7.1. Dealing with Unauthorized Building

If the Competent Authority deems the construction of any building to be an Unauthorised Construction, it may, by a written notice, require the person undertaking construction of the building to stop the same forthwith. If the person carrying out such work or doing such thing is not the owner at the time of giving such notice, such person shall be liable for carrying out the requisitions of the Competent Authority.

In case of unauthorised development, the Competent Authority shall:

- a. Take suitable action which may include demolition of unauthorised works as provided in the Act.
- b. Issue directions for the alteration or reconstruction of any works specified that have not been commenced or completed.
- c. Take suitable action against the Persons on Record.

If within the period specified in such written notice, the requisitions contained therein are not carried out by the said person or owner, as the case may be, the Competent Authority may remove or undo such thing and the expenses thereof shall be paid by such person or owner as the case may be. The cost(s) of undertaking these measures shall be paid by the said person.

If such building is not stopped forthwith, the Competent Authority may direct the person undertaking such construction to be removed from the premises, may seal the Building-unit, and may cause such necessary measures including police intervention to ensure that the person does not re-enter the Building-unit without written permission of the Competent Authority. Permission to re-enter the building premise shall only be granted for the purpose of carrying out any work of reinstatement.

In cases where development has already started/commenced on site without obtaining Development Permission, but where this development is in accordance with these Regulations, the Competent Authority may grant Development Permission on the merits of each individual case. Such development will be considered unauthorised and over and above the Development Permission Scrutiny fees as leviable and stipulated in Schedule 3, penalty shall be charged as per Schedule 6.

### 3.8. Procedures for Obtaining, Revising and Revalidating a Development Permission

#### 3.8.1. Obtaining a Development Permission

On receipt of a duly completed application for Development Permission, the Competent Authority shall scrutinize the application in detail before grant of Development Permission, to verify whether the design and specifications of the proposed building comply with these Regulations.

The procedure for obtaining a Development Permission is specified in Regulation No. 5.1.

#### 3.8.2. Revising a Development Permission

Changes or revisions in the sanctioned design and specification of a building may be made if a Revised Development Permission is obtained before construction is undertaken on the portion of the building that deviates from the Sanctioned Design Requirements.

Revision of Development Permission shall be mandatory in the following conditions:

---

1. Change in Ownership
2. Increase in utilised FSI
3. Reduction in Parking area
4. Change in Orientation of the Building
5. Change in size or location of the Common Plot
6. Change in use of Building or part thereof

For any of the above mentioned changes in a building during the course of construction, the owner should apply for a Revised Development Permission for the Building-unit or part of Building-unit as the case may be. The modified Development Requirements may be examined by the Competent Authority for ensuring compliance of the building to these Development Regulations. No deviations in contravention of the provisions of the act, and/or these regulations shall be permitted.

Procedures for obtaining a Revised Development Permission are specified in Regulation No. 5.2.

### 3.8.3. Revalidating a Development Permission

A Development Permission may be revalidated provided procedural requirements for revalidating a Development Permission are met with.

A Development Permission that may lapse due to non-commencement of work, may be revalidated for a period of one year. The revalidated period shall in no case exceed three years in the aggregate that is for a total period of four years. The period of validity shall begin from the date of commencement certificate/ development permission.

The procedures for revalidating a Development Permission are specified in Regulation No. 5.3.

### 3.9. Building Use Permission Required

It is mandatory to obtain a Building Use Permission from the Competent Authority prior to occupancy or use being made of any building.

### 3.10. "Grant of Building Use Permission"

Grant of a Building Use Permission by the Competent Authority shall mean an acceptance that the construction of the building has conformed to the sanctioned design requirements as per Regulation 3.4 and that the Owner may use the building in conformity with the Sanctioned Use of the building. Grant of a Building Use Permission does not constitute acceptance of correctness, confirmation, approval or endorsement of and shall not bind or render the Competent Authority liable in any way in regard to:

- (a) Title, ownership, and easement rights of the plot on which building is proposed
- (b) Workmanship, soundness of material and structural safety of the building
- (c) Variation in area from recorded areas of a Building-unit

- (d) Location and boundary of building-unit
- (e) Safety of the users of the building
- (f) NOC from Appropriate Authority
- (g) Structural reports and structural drawings

### 3.11. "Revocation of Building Use Permission"

Revocation of a Building Use Permission shall mean that the Building Use Permission is no longer valid and that the Competent Authority has withdrawn the permission granted to make use of the building.

After the Revocation of a Building Use Permission, use may no longer be made of the building for which the Building Use Permission has been revoked. Notice of Revocation of a Building Use Permission shall be issued in writing.

### 3.12. Unauthorized Use of Building

Use of any building or part of a building, without a Building Use Permission or in a manner that does not conform with its Sanctioned Use or after a Building Use Permission has been revoked, shall be deemed to be Unauthorized Use of Building.

The Competent Authority may declare the use of any building to be an Unauthorized Use if it deems the building to be unsafe for habitation or if its use poses a danger to public health or safety.

#### 3.12.1 Dealing with Unauthorized Use of Building and Unsafe Buildings

If the Competent Authority deems the use of any building or part of a building to be an Unauthorized Use of Building, it shall, by a written notice, communicate the reason and require the person making unauthorised use of building to stop the same. This written notice may be affixed to any part of the premise and shall be deemed a sufficient intimation to the occupier of such building or part of building.

If unauthorised use is not stopped, the Competent Authority may direct the person making such use to be removed from the building and may cause such necessary measures including police intervention to be taken to ensure that the person does not re-enter the building without written permission of the Competent Authority. The owner or occupier may be directed to restore by repairs, demolish or carry out any other modifications. The cost(s) of undertaking these measures shall be paid by the said person.

If a use of a building or part of a building is deemed to be Unauthorized Use solely on account of a Building Use Permission not having been obtained prior to use being made of the building or part of a building and if the said use of building is in conformity with Development Regulations prescribed in respective competent authority General Development Control Regulations, the Owner may apply for a Building Use Permission. Further use of building or part of a building may be

undertaken after obtaining a valid Building Use Permission. Penalty for undertaking such Unauthorized Use of building or part of a building shall be payable before a Building Use Permission is granted and is stipulated in Schedule 16.

### 3.13. Procedure for Obtaining Building Use Permission

#### 3.13.1 Building Use Permission

The Competent Authority, on receipt of Notice of Completion of Construction and a duly completed application for Building Use Permission, shall inspect the constructed building before granting a Building Use Permission, to verify its compliance to the sanctioned design and specifications within 21 days from the date of receipt of the application.

#### 3.13.2 Permission to Change a Sanctioned Use of a Building

No building or premises shall be changed or converted to a use other than the sanctioned use without prior permission of the Authority in writing. Change of use not in conformity with these regulations shall not be permissible.

The Sanctioned Use of a building may be changed provided that the new use complies with these regulations. The procedure for changing the Sanctioned Use of a building or part of a building is specified in Regulation No. 7.2.

### 3.14. Relaxation

#### 3.14.1 "Grant of Relaxation"

Grant of a Relaxation shall mean grant of permission to deviate from a specific Regulation.

##### 1. In the case of Building-unit/plot owned by:

- i. competent authority;
- ii. Government;
- iii. Government undertakings;

Competent Authority may for reasons to be recorded in writing relax or waive any of the regulations in the public interest. Provided that no relaxation or waive of any of the development regulations concerning maximum built-up-area on any floor, common plot, common open plot, marginal open space, F.S.I., parking and provisions of buildings taller than 15mts shall be made.

##### 2. Notwithstanding anything contained in foregoing regulations in case where these regulations cause hardships to the owners because of their application to the alterations not involving addition to the existing structures erected prior to the coming into force of these regulations, the competent authority after considering the merits of each individual case

---

may relax or waive, for reasons to be recorded in writing and regulation without causing any adverse effects on the fire and structural safety requirements for the buildings. Provided that this relaxation shall not be made in any regulations for buildings taller than 15mts.

3. In the case of existing Building-units for which the layout and sub-division may have been approved by a Competent Authority; or Building-units affected by road widening; and by the Development Plan proposals made in the Development Plan, if the Competent Authority is of the opinion that such Building-units have become incapable of reasonable development unless all or any of the requirements of **Planning Regulations** are suitably relaxed or waived the Competent Authority may, for reasons to be recorded in writing, relax the requirement of the above mentioned regulations.
4. No relaxation in FSI shall be made in any of the regulations meant for any Building-unit having height more than 15mts. Irrespective of provisions made above, in case of development for religious building, e.g. temple, church, mosque, *agiori* etc. up to 0.6 FSI only.

### 3.15. Competent Authority to Clarify and Interpret Provisions of the Regulations

Competent Authority shall clarify or interpret provisions of these Regulations, as specified below. Clarifications or interpretations made by the Competent Authority shall be final and binding.

1. Decide on matters where it is alleged that there is an error in any order, requirement, decision or determination made by any Competent Authority under delegation of powers in Regulations or interpretation in the application of these Regulations.
2. Interpretation of road alignment as per site situation.
3. Authorize the erection of a building or the use of premises for a public service undertaking for public utility purposes only, where he/she finds such an authorization to be reasonably necessary for the public convenience and welfare, even if it is not permitted in any land use classification.
4. In specific cases where a clearly demonstrable hardship is caused, the Competent Authority may, for reasons to be recorded in writing by special permission, permit any of the dimensions prescribed in these Regulations to be modified, except those relating to Floor Space Indices unless otherwise permitted under these regulations, provided that the relaxation shall not affect the health, safety, fire safety, structural safety and public safety of the inhabitants of the building and its neighbourhood.

### 3.16. Development Undertaken on Behalf of Government and Appropriate Authority

Where an appropriate authority intends to carry out development of land for its own purpose in the exercise of its powers under any law for the time being in force, such development shall be in conformity with the development plan and of the regulations relating to construction of buildings.

As per the provisions of Section 39 of the Act and Rule 15 of the Rules, the Office-in-Charge of a

---

Government Department shall inform in writing to the Competent Authority of the intention to carry out development for its purpose along with such development or construction along with other required documents and drawings as stipulated in Schedule 21.

### 3.17. Penalties

Any person contravening any of the Regulations or Provisions of the Development Plan shall on such contravention be liable to a punishment as provided in the Gujarat Town Planning & Urban Development Act-1976 and Rules framed there under as in force from time to time.

## 5. PROCEDURE FOR OBTAINING, REVISING AND REVALIDATING A DEVELOPMENT PERMISSION

---

### 5.1. Obtaining a Development Permission

#### 5.1.1 Application

Application for Development Permission shall be made by the Owner of the Building units/land on which the building is proposed in the format prescribed in:

Form No. 5 for Buildings, and for Sub-division and Amalgamation and Form No. 5A for Brick Kiln, Mining and Quarrying

#### 5.1.2 Scrutiny Fees

Scrutiny Fees and other charges for obtaining a Development Permission shall be determined by the Competent Authority and are listed in Schedule 3.

#### 5.1.3 Drawings, Specifications and Documents

Drawings, specifications and documents to be submitted along with Application for Obtaining a Development Permission shall be determined by the Competent Authority and are listed in: Schedule 4a for Building, Schedule 4b for Sub-division and Amalgamation and Schedule 4c for Brick Kiln, Mining and Quarrying. The format for submission of drawings, specifications and documents is specified in Schedule 5.

#### 5.1.4 Scrutiny of Application

On receipt of the application for Development Permission, the Competent Authority shall undertake scrutiny of the Application for Development Permission and communicate to the applicant.

Lack of compliance with Development Regulations and/or queries pertaining to the Building-unit shall be communicated.

Acceptance or rejection of compliant modifications in the design and specifications of the proposed building and responses to queries shall be communicated. Acceptance or rejection of further compliant modifications in the application and responses to queries shall also be communicated.

#### 5.1.5 Grant or Refusal of a Development Permission

Development Permission shall be granted to the applicant when the Competent Authority is satisfied that the design and specification of the proposed building comply with the Development Regulations. On receipt of the application for Development Permission, the Competent Authority may grant or refuse permission to the applicant as per the provisions of the Act within ninety days from the date of payment of the Scrutiny fees. The permission may be granted with or without conditions or subject to any general or special orders made by the State Government in this behalf.

The Development Permission shall be in the format of Form No.7 and it shall be issued by an officer authorised by the Competent Authority in this behalf. Reasons for rejection of application shall be communicated to the applicant.

In cases where the building design requirements are as per regulations but the co owner of the property or Chairman/Secretary of the Cooperative Society are not giving consent at the time of

---

development permission, the Competent Authority may issue permission after giving opportunity of hearing to the co owner of the property or Chairman/Secretary of the Cooperative Society considering the merits and demerits of individual case.

#### **5.1.6 Penalties**

Penalties for not complying with Regulation No. 5.1 are stipulated in Schedule 6.

### **5.2. Revising a Development Permission**

#### **5.2.1 Application**

Application for Revising a Development Permission shall be made by the Owner or Developer of the Building-unit, in the format prescribed in Form No.8.

#### **5.2.2 Fees**

Development Permission Fees and other charges for revising a Development Permission shall be determined by the Competent Authority and are listed in Schedule 3.

#### **5.2.3 Drawings, Specifications and Documents**

Drawings, specifications and documents to be submitted along with Application for Revising a Development Permission shall be determined by the Competent Authority and are listed in Schedule 4a, 4b and 4c for the respective uses. The format for submission of drawings, specifications and documents is specified in Schedule 5.

#### **5.2.4 Scrutiny of Application**

The Competent Authority shall undertake scrutiny of the Application for Revising a Development Permission.

Lack of compliance with Development Regulations and/or queries pertaining to the Building-unit shall be communicated. Acceptance or rejection of compliant modifications in the application, modifications made in the design and specifications of the proposed building and responses to queries shall be communicated. Acceptance or rejection of further compliant modifications in the application and responses to queries shall also be communicated.

#### **5.2.5 Grant or Refusal of a Revised Development Permission**

A Revised Development Permission in the format prescribed in Form No. 7 shall be issued to the applicant when the Competent Authority is satisfied that the design and specification of the proposed Building-unit comply with Development Regulations. Reasons for rejection of application shall be communicated to the applicant.

#### **5.2.6 Penalties**

Penalties for not complying with Regulation No. 5.2 are stipulated in Schedule 6.

### **5.3. Revalidating a Development Permission**

#### **5.3.1 Application**

Application for Revalidating a Development Permission shall be made by the Owner or Developer of the building, before the expiry of the Development Permission. The revalidated period shall in no case exceed three years in the aggregate that is for a total period of four years.

Lapsed Development Permission may be revalidated after the expiry of the original Development

---

Permission, within a period of six months, with payment of penalty charges.

Revalidation of a Lapsed Development Permission after one and half year from the issue of the original Development Permission shall not be permitted. New application for Development Permission shall have to be made.

#### **5.3.2 Fees**

Development Permission Revalidation Fees for revalidating a Development Permission shall be determined by the Competent Authority and are listed in Schedule 9.

For revalidating a lapsed Development Permission, penalty charges shall be applicable and are listed in Schedule 9.

#### **5.3.3 Documents**

Documents to be submitted along with Application for Revalidating a Development Permission shall be determined by the Competent Authority and are listed in Schedule 10. The format for submission of documents is specified in Schedule 5.

#### **5.3.4 Scrutiny of Application**

The Competent Authority shall undertake scrutiny of the Application for Revalidating a Development Permission, in context of proposals of Draft Development Plan-2021, and communicate queries pertaining to the application.

Acceptance or rejection of responses to queries shall be communicated to the applicant.

#### **5.3.5 Grant or Refusal of a Revalidated Development Permission**

A Revalidated Development Permission in the format prescribed in Form No. 7 shall be issued to the applicant when the Competent Authority is satisfied that the design and specification of the proposed development comply with the Development Regulations. Reasons for grant or refusal of Revalidating a Development Permission shall be communicated to the applicant.

In case of any change to the Building-unit which affects the approved layout or building blocks, Development Permission may not be revalidated. New application for Development Permission shall have to be made.

#### **5.3.6 Penalties**

Penalties for not complying with Regulation No. 5.3 are stipulated in Schedule 6.

### **5.4 Common Protocol**

For Facilitation to investor under Investment Facilitation Portal (IFP) following procedure must be adopted by competent authority where ever procedure is narrated in this document.

1. Competent Authority must made all procedure, protocols and checklist available online.
  2. Application received online by competent authority and Investor Facilitation Portal
  3. Compliance at any time shall be available online on competent authority website and Investor Facilitation Portal
  4. Competent Authority must display the grant of permission or rejection or suspension online in public domain on Competent authority website and Investor Facilitation Portal at time new permission ,renewal and revalidation of application.
  5. Inspected report of each time must be online on respective website and Investor Facilitation Portal
-

by competent authority within 48 hrs.

6. Competent authority allocates the inspector randomly and it must be on computerize.
  7. Integrate the payment gateway online.
  8. For any development permission, if site inspection is required for different purposes, all the officers or the inspectors required, to carry out inspections shall visit jointly on a prescribed date. The competent authority shall ensure that such date of joint inspection is communicated to applicant at least three days in advance and also ensure that the inspectors carry out the inspection on specified date.

## 6. PROCEDURE DURING CONSTRUCTION

---

### 6.1. Inspection of Construction

#### 6.1.1 Inspection of Construction at Any Time

All buildings for which Development Permission is required are subject to inspection by the Competent Authority and the Competent Authority reserves the right to inspect such buildings at any time during the Period of Construction without giving prior notice of its intention to do so. Owner of the Building-unit and/or any person undertaking construction shall Permission authorized officers of the Competent Authority to enter the Building-unit and inspect the building for the purpose of enforcing these Regulations.

#### 6.1.2 Inspection where Development Permission is Granted

All buildings for which Development Permission has been granted shall be subject to periodic inspection by the Competent Authority during construction. It shall be the responsibility of the Owner, the Architect on Record or Engineer on Record, and the Clerk of Works on Record for the building to report commencement, progress at various stages, and completion of construction to the Competent Authority as specified in Regulation No. 6.5.

#### 6.1.3 Inspection for Fire Safety and Protection of Building under Construction

For buildings listed in Schedule 23, the Chief Fire Officer (CFO) shall carry out inspections at appropriate intervals, to ensure that the fire protection requirements and measures for such building under construction are adequate and operational. CFO shall also satisfy himself that all elevators including fire lifts are duly tested and their test certificates are submitted to his satisfaction. If the above work is entrusted to a registered Fire Protection Consultant on Record, his reports shall be countersigned by the Chief Fire Officer.

In case of inadequacy of these Regulations, he shall issue a notice to the owner or occupier of such building directing him to rectify the shortcomings/ contraventions within a specified period. Copies of all such notices shall be endorsed by the Competent Authority also.

### 6.2. Information to be Prominently Displayed on Site

It shall be the responsibility of the Clerk of Works on Record and the Owner to erect a notice board on the Building-unit displaying key information pertaining to the building. The notice board should be prominently visible, easily readable and should be located next to the primary access to the plot. The notice board/s should be maintained for the entire Period of Construction up to issue or grant of Building Use Permission. Failure to comply with this Regulation may result in revocation of the Development Permission. The information to be displayed is specified in Schedule 11.

### 6.3. Documents and Drawings to be Maintained on Site

It shall be the responsibility of the Clerk of Works on Record and the Owner for the building to keep all the documents and drawings listed in Schedule 12 on the site, at all times after issuing Notice of Commencement of Construction to the Competent Authority up to the issue or grant of Building Use Permission. These documents should be made available to any authorised officer of the Competent Authority inspecting the site for the purpose of enforcing these Regulations. Failure to comply with this Regulation may result in revocation of the Development Permission.

---

#### 6.4. Reducing Inconvenience and Ensuring Safety during Construction

##### 6.4.1 Stacking, Storing and Disposal of Building Material

It shall be the responsibility of the Clerk of Works on Record for the Building and the Owner or Developer to ensure that no building material, building equipment or building debris is stacked, stored, left or disposed off outside the Building-unit for which Development Permission has been granted, on any public street or space.

It shall be the responsibility of the Architect on Record or Engineer on Record and Clerk of Works on Record to convince the Competent Authority of adequacy of additional barricading and safety measures that shall be taken to ensure public safety and reduce public inconvenience.

##### 6.4.2 No Damage or Undue Inconvenience during Construction

It shall be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that no damage is caused to adjoining properties due to construction. It shall also be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that no undue inconvenience is caused to the public, due to factors such as noise, dust, smell or vibrations. It shall also be the responsibility of the Clerk of Works on Record and the Owner or Developer to undertake all necessary measures to ensure that traffic is not disrupted due to construction.

##### 6.4.3 Liability for Ensuring Safety during Construction

The Owner or Developer and the Clerk of Works on Record shall be responsible for ensuring that all necessary measures for safety for all are taken on site. Grant of Development Permission, grant of Building Use Permission for part of a building, or issuing of any instructions to ensure public safety or reduce inconvenience, does not render the Competent Authority liable for any injury, damage or loss whatsoever that may be caused to any one in or around the area during the Period of Construction.

#### 6.5. Progress of Construction and Inspection - Development Permission

##### 6.5.1 Notice for Commencement of Construction

The Owner and the Architect on Record for the building shall notify the Competent Authority their intention to commence construction at least 7 working days prior to commencing construction by filing a Notice of Commencement of Construction, in the format prescribed in Form No. 10. Failure to notify the Competent Authority before commencing construction may result in lapse of the Development Permission.

A set of detailed working drawings including structural details based on approved building plans shall be submitted along with the Form. In the case of individual residential buildings up to G+2 on a plot not more than 500 sq.mts in size, the Competent Authority shall not enforce, on request of the owner/developer, to submit such details.

The Notice of Progress of Construction shall not be necessary in the following cases:

- i) Alteration in Building not involving the structural part of the building.
- ii) Extension of existing residential building on the ground floor up to maximum area of 40 sq.mts.

On receipt of the Notice of Progress of Construction from the owner or developer, it shall be the duty of the Competent Authority, if found necessary, to check any deviation from the sanctioned plan and

---

convey decision within 7 days to the owner or developer accordingly for compliance.

#### **6.5.2 Development Permission may Lapse if Construction Not Commenced on Time**

If the Competent Authority is not informed of commencement of work on a proposed building within twelve months of grant of Development Permission, the Development Permission shall lapse. Application for revalidation of Development Permission should be made within twelve months of grant of Development Permission. The extended period shall in no case exceed three years in the aggregate that is for a total period of four years.

Procedure for obtaining a Revalidated Development Permission is specified in Regulation No.

5.3.

#### **6.5.3 Competent Authority to be Notified of Progress of Construction**

The Owner or Developer and the Architect on Record or Engineer on Record shall be responsible for notifying the Competent Authority of progress of construction having been completed up to the stages stipulated in Schedule 13. Notice of Progress of Construction shall be made in the format prescribed in Form No. 11 and approved by the Persons on Record.

### **6.6. RISK BASED CHECKS INSPECTIONS**

The competent authority shall carryout the checking of the development permission application and the site inspection based on the consequence class specified.

#### **6.6.1. consequences class.**

Any development carried out by the owner or the developer attracts risk during the design and construction. Risk is defined, in the context of construction stages, as the likelihood of non-compliance with building regulations and the potential extent of harm to current and future users of building and the environment associated with non-compliance. The competent authority can, based on the extent carry out inspections based on the consequences class.

#### **6.6.2. Principles of Risk Categorization**

The different Consequences Classes is specified Table 6.1: Principles of Risk Categorization (Definition of Consequence Class)

#### **6.6.3. classification of the buildings & Control at the Design Stage (Design Supervision Levels, or DSL)**

Based on the classification of the buildings specified in Table 6.2 the persons on record (POR) shall carryout the design supervision and the checks as specified in Table 6.2: Control at the Design Stage (Design Supervision Levels, or DSL)

#### **6.6.4. Design Supervision Levels, or DSL**

The competent authority shall as carryout the inspection and other requirements as specified in Table 6.2: Control at the Design Stage (Design Supervision Levels, or DSL)

## 7. PROCEDURE FOR OBTAINING A BUILDING USE PERMISSION

---

### 7.1. Obtaining Building Use Permission

#### 7.1.1 Notice of Completion of Construction and Building Use Permission

The Owner and the Architect on Record for the building shall be responsible for notifying the Competent Authority of completion of construction and for certifying that the construction complies with the sanctioned design and specifications. Notice of Completion of Construction and Compliance Certification shall be made in the format prescribed in Form No. 12, and shall be accompanied by documents and drawings as prescribed by the Competent Authority in Schedule 14. The format for submission of drawings, specifications and documents is specified in Schedule 5.

Subsequent to notifying the Competent Authority about the completion of construction in compliance to the regulations, application for Building Use Permission may be made to the Competent Authority in the format stipulated in Form No. 13.

#### 7.1.2 Fees

Building Use Permission Fees shall be determined by the Competent Authority and are listed in Schedule 15. It shall be the responsibility of the Owner to deposit Building Use Permission Fees with the Competent Authority along with the Application for Obtaining a Building Use Permission.

#### 7.1.3 Final Inspection

Following receipt of the Notice of Completion of Construction and Compliance Certification, the Competent Authority shall undertake final inspection of construction for ensuring compliance to sanctioned design, specifications and other aspects of the building as stated in Schedule 22. The Competent Authority shall inform the applicant within 21 days of receipt of Notice of Completion of Construction.

If, on inspection, the Competent Authority is satisfied that the construction of the building complies with the sanctioned design and specifications, it shall grant a Building Use Permission.

If the construction is found not to comply with sanctioned design and specifications, the Competent Authority shall communicate queries regarding the construction and/or directions to ensure compliance to the Owner and the Architect on Record or Engineer on Record. Failure to comply with directions, as may be issued by the Competent Authority, may result in revocation of the Development Permission. The Architect on Record or Engineer on Record shall respond to queries and notify the Competent Authority of having undertaken compliant modifications.

#### 7.1.4 Grant / Refusal of Building Use Permission

The final inspection of the work and communication of the decision about the grant of the Building Use Permission shall be made by the concerned Competent Authority within 21 days from the date of receipt of Notice of Completion of Construction and Compliance Certification. If the Competent Authority is satisfied that the construction of the building complies with the sanctioned design and specifications and other requirements as per Schedule 22, it shall grant a Building Use Permission in the format stipulated in Form No. 14. Reasons for grant/refusal of Building Use Permission shall be communicated to the applicant.

In cases where the building construction is as per regulations but the Owner of the adjoining Building or Chairman/Secretary of the Cooperative Society are not giving consent at the time of Building Use permission, the Competent Authority may issue permission after giving opportunity

of hearing to the Owner of the adjoining Building or Chairman/Secretary of the Cooperative Society considering the merits and demerits of individual case.

#### **7.1.5 Penalties**

Penalties for not complying with Regulation No. 7.1 are stipulated in Schedule 16.

Gujarat Stamp Act, 1958.

No. GHM-2016-M-101-STP-122015-4864-H.1:— In exercise of powers conferred by section 70 read with section 32A of the Gujarat Stamp Act, 1958 (BOM. 60 of 1958.), the Government of Gujarat hereby makes the following rules further to amend the Gujarat Stamp (Determination of Market Value of Property) Rules, 1984 namely :-

1. These rules may be called the Gujarat Stamp (Determination of Market Value of Property) (amendment) Rules, 2016.
2. In the Gujarat Stamp (Determination of Market Value of Property) Rules, 1984 ( hereinafter referred to as "the said rules" ) after rule 4, the following new rule 5 shall be inserted namely:-
  - "5. Annual Statement of Rates of Immoveable Property
    - (1) The office of the Superintendent of Stamp and Inspector General of Registration, Gujarat State, Gandhinagar, shall prepare annual statement of Rates showing average rates of lands and buildings situated in every Tehsil/Taluka, Municipal Corporation or Local Body area with the help of the Office of the Deputy Collector, Stamp Duty Valuation Organization of each District and such other officers as may be appointed by the Government from time to time and submit the same for approval to the Revenue Department; Gujarat State latest by 31<sup>st</sup> October each year.
    - (2) The data in respect of average rates of lands and buildings in every Tehsil/Taluka, Municipal Corporation or Local Body area shall be arranged in the Annual Statement of Rates as far as possible in ward wise zone wise

manner in respect of urban properties and in respect of rural properties, taluka wise, village wise as the case may be. For the purpose of average rates, properties may be divided in group, sub-group or classes after taking into account the type of the land, types of construction, location and situational advantages or disadvantages of property. While working out the average rates of land and buildings, the concerned officers shall take into account the established principals of the valuation and any other details that they may deem necessary.

- (3) The Superintendent of Stamps and Inspector General of Registration, Gandhinagar, Gujarat State shall in conformity with the approval of Revenue Department, Gandhinagar by order issue Annual Statement of Rates showing average rates of land and buildings situated in every Tehsil/Taluka, Municipal Corporation and Local Body area ( hereinafter called "Annual Statement of Rates" ) as soon as they are made for the first time, and thereafter, every year on 1<sup>st</sup> day of April, taking into account the average rates of lands and buildings prepared by the office of the Superintendent of Stamp and inspector General of Registration, Gujarat State, Gandhinagar.
- (4) If The Superintendent of Stamps and Inspector General of Registration, Gujarat State, Gandhinagar is not in a position to issue Annual Statement of Rates as mentioned in sub rule (3) above, on 1<sup>st</sup> day of April in any year due to any administrative difficulties, the rates mentioned in the Annual Statement of Rates for the year immediately preceding may be incremented by the Chief Controlling Revenue Authority, in consultation with the Revenue Department, Gandhinagar keeping in view the increase in market rates of immoveable properties.
- (5) The Superintendent of Stamps and Inspector General of Registration, Gujarat State, Gandhinagar shall annually supply to the Sub-Registrar a copy of the above statement showing the averages rates of lands and buildings situated within his jurisdiction, every registering officer shall cause a copy of the above statement to be affixed outside registration office.
- (6) Every registering officer shall, when the instrument is produced before him/her for registration, verify in each case the market value of land and buildings, etc., as the case may be, from the above statement and if he/she finds the market value as stated in the instrument, less than the minimum value prescribed by the statement, he/she shall refer the same to the Collector of the District for determination of True Market Value of the property which is the subject matter of the instrument and the proper duty payable thereon ;

provided that where the market value has been stated in accordance with or more than that prescribed in the statement issued by The Superintendent of Stamps and Inspector General of Registration, Gandhinagar, Gujarat State but the Registering Officer has reason to believe that the true valuation of the immovable property cannot be arrived at without having recourse to local enquiry of extraneous evidence he may, before registering such instrument, refer the same to the Collector of the District for determination of True Market Value or property and the proper duty payable thereon.

- (7) All the registering officers shall send to the Superintendent of Stamps and Inspector General of Registration, Gujarat State, Gandhinagar for preparation of Annual Statement of Rates, the extract of the register in respect of the instruments presented for registration in which consideration for the subject property is stated to be more than the Annual Statement of Rates by 30<sup>th</sup> day of the following month.
- (8) All the special land acquisition officers appointed under the Land Acquisition Act, 1894 or any other Act for the time being in force in respect of acquisition of lands and properties for public purpose shall, whenever the amount of compensation awarded by them is higher than the one payable on the basis of Annual Statement of Rates issued by The Superintendent of Stamps and Inspector General of Registration, Gujarat State, Gandhinagar under sub-rule (3) and (4) above, send a copy of such award to the Superintendent of Stamps and Inspector General of Registration, Gandhinagar, Gujarat State for preparation of Annual Statement of Rates, referred to in sub-rule (7) above, within 30 days from the date of payment of compensation.

## THE GUJARAT TAX ON ENTRY OF SPECIFIED GOODS INTO LOCAL AREAS ACT, 2001

No. (GHN- 19)GER-2016-S.20(4) /Th - WHEREAS the Government of Gujarat is satisfied that circumstances exist which render it necessary to take immediate action to amend the Gujarat Tax on Entry of Specified Goods into Local Areas Rules, 2001 and to dispense with the previous publication thereof under the proviso to sub-section (1) of section 20 of the Gujarat Tax on Entry of Specified Goods into Local Areas Act, 2001.

NOW, THEREFORE, in exercise of the powers conferred by section 20 of the Gujarat Tax on Entry of Specified Goods into Local Areas Act, 2001, the Government of Gujarat hereby makes the following rules further to amend the Gujarat Tax on Entry of Specified Goods into Local Areas Rules, 2001, as follows, namely:-

These rules may be called the Gujarat Tax on Entry of Specified Goods into Local Areas (Second Amendment) Rules, 2016.

In the Gujarat Tax on Entry of Specified Goods into Local Areas Rules, 2001, (hereinafter referred to as "said rules"), in rule 2, for clause (d), the following clause shall be substituted, namely:-

"(d) "electronic operator" shall mean a person who enables another person (whether registered dealer or not), to bring any goods specified under entry at serial number 12 in the Schedule appended to the Government Notification, Finance Department No. (GHN-20) GEA-2008/(S.3) (3)-TH, DATED THE 1<sup>ST</sup> April, 2008, within the State:

- (a) by means of a web based software application, and a communication device, or
- (b) by means of teleshopping platform".

In rule 3, after clause (b), the following clause shall be inserted, namely:-

"(c) Notwithstanding anything contained in this rule, for the goods specified under entry at serial number 12 in the Schedule appended to the Government Notification, Finance Department No. (GHN-20) GEA-2008/(S.3) (3)-TH, DATED THE 1<sup>ST</sup> April, 2008, brought into local area, an electronic operator referred to in clause (d) of rule 2 only shall be liable to pay tax. Such electronic operator shall, within two days of entry of specified goods into local area, pay into a Government Treasury, the tax due and payable under the Act, :

Provided that such electronic operator shall not require to pay tax on each entry of specified goods if he deposits an amount equivalent to estimated amount of tax payable for the period prescribed under clause (c) of sub rule (2) of rule 6 into the Government Treasury by chalan in Form 1. Such electronic operator shall start making payment of tax as soon as the aggregate amount of tax payable during such period equals the amount of deposit. The electronic operator may, in his return to be furnished in accordance with section 7, adjust the amount so deposited against his liability to pay tax or penalty payable under the Act".

In Rule 6, in sub-rule (2), after clause (b), the following clause shall be inserted, namely:-

"(c) Notwithstanding anything contained in this rule, an electronic operator referred to in clause (d) of rule 2, whether registered dealer or not, shall furnish online, a return in Form 1A within a period of seven days immediately succeeding the month for which return is required to be furnished. Such importer shall also furnish the details in Form 1AA within three days of entry of specified goods into local area."

ક્રમાંક : જીયુ-૨૦૧૬-૩૫-જીપીસી-૧૧-૨૦૧૫-૧૦૫૬-ઈ.-આથી ગુજરાત સરકારને ગુજરાત પાણીની અને ગેસની પાઈપલાઈન (જમીનમાંના વપરાશકારોનો હકક સંપાદીત કરવા બાબત) અધિનિયમ - ૨૦૦૦ ની કલમ ૩ ની પેટા કલમ (૧) થી પ્રાપ્ત થયેલ સત્તા અન્વયે ગુજરાત સરકારના ઉર્જા અને પેટ્રોકેમિકલ્સ વિભાગના જાહેરનામા ક્રમાંક જીયુ-૨૦૧૫-(૭૨)-જીપીસી-૧૧-૨૦૧૫-૧૦૫૬-ઈ.-ભાગ-૨, તારીખ ૧૬-જુલાઈ-૨૦૧૫ થી તે સાથે જોડેલ અનુસૂચિમાં વર્ણન કરેલ જમીનમાં કુદરતી ગેસના પરીવહન માટે પાઈપલાઈન નાંખવાના હેતુ માટે જમીનોના વપરાશકારોનો હકક સંપાદીત કરવાનો ઈરાદો જાહેર કરેલ છે.

આ જાહેરનામામાં પ્રસિધ્ધ થયેલ જાહેરનામાની વિગતો સામાન્ય જનતાને તારીખ : ૨૩.૧૦.૨૦૧૫ થી ૨૬.૧૨.૨૦૧૫ના સુધી ઉપલબ્ધ કરાવવામાં આવી હતી, અને આ સાથે હવે સક્ષમ સત્તાધિકારીએ કલમ ૬ ની પેટાકલમ ૧ હેઠળ ગુજરાત સરકારને દરખાસ્ત રજુ કરેલી છે.

અને આથી, હવે રાજ્ય સરકારે વિચારણાના અંતે જાહેરનામા સાથે જોડેલ અનુસૂચિમાં વર્ણન કરેલી જમીનોમાં ગેસ પાઈપલાઈન નાંખવા માટે વપરાશકારના હકક સંપાદીત કરવાનું જરૂરી જણાય છે.

અને કલમ ૬ ની પેટાકલમ-૪ અન્વયેની સત્તા હેઠળ રાજ્ય સરકારે આદેશ કરેલ છે કે આ જમીનો રાજ્ય સરકારમાં નિહિત થવાને બદલે ગુજરાત સ્ટેટ પેટ્રોનેટ લિમીટેડ, (ગુજરાત સરકારના સાહસ - ગુજરાત સ્ટેટ પેટ્રોલિયમ કોર્પોરેશન લિમીટેડની ગૌણ કંપની) ગાંધીનગરને કોઈપણ જાતના બોજા રહિત આ જાહેરનામું પ્રસિધ્ધ થાય તે તારીખ થી પ્રાપ્ત થશે.

- (ન) 'વર્ષ' એટલે નાણાકીય વર્ષ.

૩. એકત્રિત વેરાના દર:- (૧) નોટિફાઇડ એરિયાની હદોમાં આવેલ તમામ મકાનો અને જમીનો ઉપરનો એકત્રિત વેરો, નીચેના વેરાના બદલામાં, એનેક્સર-ક અને એનેક્સર-ખમાં નિર્દિષ્ટ કરેલા દરે લેવામાં આવશે:-

- (ક) મકાનો અથવા જમીનો અથવા બંને ઉપરનો વેરો,
- (ખ) સામાન્ય સફાઈ ઉપકર,
- (ગ) દીવાબત્તી વેરો.
- (૨) એકત્રિત વેરામાં વધારો: એનેક્સર-ક અને ખમાં નિર્દિષ્ટ કરેલ દરો પ્રમાણે નક્કી થતાં વેરાનું પ્રમાણ સંચાલક મંડળ સાથે વિચાર વિનિમય કરીને દર વર્ષે બિન-માંડવાળપાત્ર એવા ૫% અને ૧૦%ની વચ્ચેના મૂલ્ય જેટલું વધારવું જોઈશે. તેમ છતાં, આ વધારો ચાર વર્ષના એક એવા દરેક બ્લોક વર્ષમાં અગાઉના બ્લોક વર્ષના વેરાના ૪૦% અથવા ચતુર્વર્ષીય સમીક્ષા વખતે જમીન અને મકાનની બજાર કિંમત વિચારણામાં લીધા પછી નક્કી કરાયેલ એકત્રિત વેરો, એ બંનેમાંથી જે ઓછું હોય તેના કરતાં વધુ હોવો જોઈશે નહિ.
- (૩) આકારણીની ચતુર્વર્ષીય સમીક્ષા:- નોટિફાઇડ એરિયામાં આવેલી એકત્રિત વેરા માટે એકવાર આકારણી કરેલી તમામ મિલકતો, આકારણીના સમયે જમીન અને મકાનની પ્રવર્તમાન બજારકિંમત લાગુ પાડીને ચાર વર્ષના એક એવા દરેક બ્લોક વર્ષ માટે ચતુર્વર્ષીય સમીક્ષાને અધીન રહેશે અને એકત્રિત વેરો, અહીં નીચે દર્શાવ્યા પ્રમાણે વેરાના ભારણમાં વધારાની ટોચમર્યાદાને અધીન રહીને તદનુસાર સુધારવામાં આવશે:

**મૂડી કિંમતમાં વધારાને લીધે વેરાના ભારણ પરની ટોચમર્યાદા:-** કોઈ મિલકતની એકવાર આકારણી કરવામાં આવે અને જમીન અને મકાનની પ્રવર્તમાન બજારકિંમત પ્રમાણે તેનો એકત્રિત વેરો નક્કી કરવામાં આવે અને તે પછીના બ્લોક વર્ષ માટેની ચતુર્વર્ષીય સમીક્ષા વખતે વેરાનું ભારણ, અગાઉના બ્લોકમાં લીધેલ વેરાના ૪૦% કરતાં વધતું હોય, ત્યારે વેરાના ભારણમાં વધારો ઉપર્યુક્ત મિલકતના સંબંધમાં અગાઉના બ્લોક વર્ષમાં આકારેલ એકત્રિત વેરાના ૪૦% સુધી મર્યાદિત રાખવો જોઈશે.

૪. મુકિત:- (૧) નીચેનાને એકત્રિત વેરોમાંથી મુકિત આપવામાં આવશે:-

- (ક) કેન્દ્ર અથવા રાજ્ય સરકાર, પંચાયત, જિલ્લા સ્કૂલ બોર્ડની માલિકીના મકાનો અને જમીન અને મ્યુનિસિપલ સ્કૂલ બિલ્ડિંગ;
- (ખ) પ્રાચીન સ્મારક જાળવણી અધિનિયમ, ૧૯૦૪ અથવા ગુજરાત પ્રાચીન સ્મારકો અને પુરાતત્વ વિષયક સ્થળો અને અવશેષો બાબતનો અધિનિયમ, ૧૯૬૫ના અર્થ મુજબ સંરક્ષિત સ્મારકો જાહેર કરેલ હોય અને જેમાંથી કોઈ મહેસૂલ અથવા ભાડું ઉપજતું ન હોય તેવા તમામ મકાનો અને જમીનો;
- (ગ) જેમનો ઉપયોગ અથવા ભોગવટો માત્ર જાહેર પૂજા માટે જ અથવા નફો ન કરતી હોય તેવી શાળાઓ, કોલેજો, સામાજિક અને સખાવતી સંસ્થાઓ માટે જ કરવામાં આવતો હોય તેવા તમામ મકાનો અને જમીનો અથવા તેના ભાગો.
- (૨) માલનું ઉત્પાદન કરવામાં અને સેવાઓ પૂરી પાડવામાં રોકાયેલ કોઈપણ ભોગવટેદારને, નીચે પ્રમાણે વેરો ભરવામાંથી મુકિત આપવામાં આવશે:-
  - (૧) ફાળવણી તારીખથી શરૂ કરીને પ્રથમ વર્ષ માટે સંપૂર્ણ મુકિત.
  - (૨) બીજા વર્ષ માટે ૫૦% મુકિત.
- (૩) કોર્પોરેશનનો એલોટી (ભાડૂત) ન હોય તેવો, જે જમીન અને મકાન, માલનું ઉત્પાદન કરવા અને સેવાઓ પૂરી પાડવા માટે ઉપયોગમાં લેવાયા હોય તેવા જમીન અથવા મકાનનો કોઈ ભોગવટેદાર પ્રથમ અને બીજા વર્ષ માટે ઉપર જણાવેલ મુકિત માટે હકદાર થશે નહિ.
- (૪) કોર્પોરેશનની માલિકીની મિલકતોને નીચે પ્રમાણે વેરો ભરવામાંથી મુકિત આપવામાં આવશે:
  - (૧) ફાળવેલ અથવા ભાડે આપેલ ન હોય તેવી મિલકતોને સંપૂર્ણપણે મુકિત આપવામાં આવશે.
  - (૨) કોર્પોરેશને ફાળવેલ અને પાછી મેળવેલ મિલકતો પર બંધ એકમો તરીકે વેરો નંખાશે.

૫. એકત્રિત વેરાની આકારણી અને જવાબદારી:-

- (ક) વેરો, અધિનિયમની જોગવાઈઓ અનુસાર જેટલે સુધી લાગુ પાડી શકાય તેટલે સુધી આકારવો અને વસૂલ કરવો જોઈશે;

- (ખ) માલિક અથવા ભોગવટેદાર, આ નિયમો હેઠળ વેરો ભરવા માટે સંયુક્ત રીતે અને પૃથક રીતે જવાબદાર રહેશે,
- (ગ) મકાનના બાંધકામના માલિક અથવા ભોગવટેદાર, આ નિયમો હેઠળ વેરો ભરવા માટે સંયુક્ત રીતે અને પૃથક રીતે જવાબદાર રહેશે,
- (ઘ) કોઈ માલિક / ભોગવટેદાર તેની મિલકત વેચાણ, પટા અથવા ગીરોથી બીજી વ્યક્તિની તરફેણમાં તબદીલ કરે, ત્યારે મિલકતના નવા માલિકે અથવા ભોગવટેદારે, તબદીલીના સમયે જમીન અને મકાનની પ્રવર્તમાન બજાર કિંમત **-(Rate)** પ્રમાણે વેરો ભરવો પડશે,
- (ચ) વેરો, દરેક વર્ષમાં એપ્રિલ મહિનાની પહેલી તારીખે અને ઓક્ટોબર મહિનાની પહેલી તારીખે અથવા તે પહેલાં બે હપ્તામાં આગોતરો ભરવાપાત્ર થશે. બિલ આપ્યાની તારીખથી ત્રીસ દિવસ પૂરા થયા પછી ભરવાપાત્ર એકત્રિત વેરાની રકમ ઉપરાંત વાર્ષિક ૧૫%ના દરે દંડનીય વ્યાજ લેવામાં આવશે,
- (છ) **એકત્રિત વેરાની વસૂલાત માટે સખત પગલાં.**— નોટિફાઈડ એરિયા સત્તામંડળે, કસ્ટોદાર પાસેથી અધિનિયમની કલમ ૧૩૩ અને ૧૩૪ હેઠળ એકત્રિત વેરાની વસૂલાત માટે સખત પગલાં લેવા જોઈશે.

#### ૬. માફી અને રિફંડ:-

- (ક) જો કોઈ મકાન અથવા જમીન આખા વર્ષ અથવા તેના ભાગ દરમિયાન ખાલી રહ્યા હોય અને તેનો ઉપયોગ થયો ન હોય અને નોટિફાઈડ એરિયા સત્તામંડળને તે મતલબની નોટિસ આપી હોય તો જાણ કર્યાની તારીખથી વેરાની રકમના ત્રણ ચતુર્થાંશ જેટલી રકમની માફી અથવા રિફંડ આપવામાં આવશે:  
પરંતુ આવી નોટિસ મળ્યાની તારીખની અગાઉની કોઈપણ મુદત માટે, કોઈપણ માફી અથવા રિફંડ અમલમાં આવશે નહિ અને મિલકત ખાલી રહે, તો આવી નોટિસ દર વર્ષે આપવી જોઈશે;
- (ખ) કોઈ મકાનનો કોઈપણ ભાગ તોડી પાડવામાં આવ્યો હોય, ત્યારે તોડી પાડ્યાની જાણ કર્યાની તારીખથી મિલકતની કિંમતના ઘટાડાના પ્રમાણમાં માફી અથવા રિફંડ આપવામાં આવશે.

#### ૭. લેખિત નોટિસ આપવા બાબત:-

નીચેની બાબતમાં નોટિફાઈડ એરિયા સત્તામંડળને એક મહિનાની અંદર લેખિત નોટિસ આપવાની કોઈ મકાન કે જમીન માલિક અથવા ભોગવટેદારની ફરજ રહેશે:-

- (ક) મકાન નવું ઉભું કરવામાં અથવા બાંધવામાં આવ્યું હોય તે બાબતમાં;
- (ખ) અગાઉ જેની આકારણી કરવામાં આવી હોય તેવું કોઈ મકાન વધારવામાં આવ્યું હોય, ફરી બાંધવામાં આવ્યું હોય, ફરી બાંધકામ કરવામાં આવ્યું હોય અથવા તેમાં સુધારા અને વધારા કરવામાં આવ્યા હોય અથવા એવી રીતે સુધારો કરવામાં આવ્યો હોય કે જેથી કરીને તેની મૂડી કિંમત વધી જાય તે બાબતમાં;
- (ગ) અગાઉ જેની આકારણી કરવામાં આવી હોય તેવા કોઈ મકાન અથવા જમીનના ભાગલા પાડવામાં આવ્યા હોય તે બાબતમાં;
- (ઘ) જો કોઈ મકાન સંપૂર્ણતઃ અથવા અંશતઃ તોડી પાડવામાં આવ્યું હોય અથવા અન્યથા તેની ભાડાની કિંમત ઘટી ગઈ હોય, તે બાબતમાં.

**સ્પષ્ટીકરણ:-** એક મહિનાની મુદત, ઉપરોક્ત (ક), (ખ), (ગ)ની બાબતમાં મકાનનું કામ પૂરું થયાની તારીખ અથવા તેના ભોગવટાની તારીખ એ બેમાંથી જે પહેલું હોય તે તારીખથી અને (ઘ)ની બાબતમાં બનાવ બન્યાની તારીખથી ગણવામાં આવશે.

#### ૮. નોટિસ મળ્યાથી આકારણી કરવા બાબત :-

(૧) નિયમ ૭ હેઠળ લેખિત નોટિસ મળે ત્યારે નોટિફાઈડ એરિયા સત્તામંડળે, તેને જરૂરી જણાય તેવી તપાસ કર્યા પછી, મકાનની આકારણી કરાવવી જોઈશે.

#### (૨) આવી આકારણી કર્યા પછી, નોટિફાઈડ એરિયા સત્તામંડળે આપું મૂલ્યાંકન અલગ યાદીમાં નોંધવું જોઈશે અને વર્ષના અંતે, આકારણીમાં કરેલા આવા ફેરફારો પ્રમાણિત આકારણીની યાદીમાં નોંધવા જોઈશે.

#### ૯. ઉત્તરાધિકાર બાબત તકરાર હોય ત્યારે આકારણી યાદીમાં માલિકના નામ બાબત:-

આકારણી યાદીમાં કોઈ મિલકતના માલિક તરીકે જેનું નામ દાખલ કર્યું હોય તેવી કોઈ વ્યક્તિના ઉત્તરાધિકાર સંબંધી કોઈ તકરાર હોય, ત્યારે ઉત્તરાધિકારના દાવેદારોમાંથી જે દાવેદાર ખરેખર ભોગવટાથી મિલકતનો કબજો ધરાવતા હોય તેના નામ આકારણી યાદીમાં ભોગવટેદાર તરીકે દાખલ કરવા જોઈશે અને તકરારની પતાવટ અથવા સક્ષમ કોર્ટનો હુકમ રજૂ કરે ત્યાં સુધી વેરો તેની/તેમની પાસેથી વસૂલ કરવામાં આવશે.

૧૦. તબદીલ કરનારે અને તબદીલીથી લેનારે લેખિત નોટિસ આપવા બાબત:- કોઈ મકાન અથવા જમીનના સંબંધમાં વેરા ભરવા માટે પ્રથમતઃ જવાબદાર કોઈ વ્યક્તિનો હક લેખિત લેખ દ્વારા અથવા અન્યથા તબદીલ થયો હોય, ત્યારે તબદીલ કરનારે અને તબદીલીથી લેનારે, તબદીલી કરવામાં આવી હોય તે પછી ત્રણ મહિનાની અંદર નોટિફાઈડ એરિયા સત્તામંડળને લેખિત નોટિસ આપવી જોઈશે, જેઓ પોતાને જરૂરી જણાય તેવી તપાસ કર્યા પછી, જમીન અને મકાન પર લેણા એકત્રિત વેરાની પૂર્વ ચુકવણીને અધીન રહીને આકારણી યાદીમાં તબદીલ કરનારને સ્થાને તબદીલીથી લેનારનું નામ દાખલ કરવાનો હુકમ કરશે. ત્યાર પછી, તબદીલીથી લેનાર, એવી રીતે તબદીલ થયેલી મિલકતના સંબંધમાં લેણા થાય તેવા વેરાની ચુકવણી માટે જવાબદાર રહેશે.
૧૧. વારસદારોએ નોટિસ આપવા અને તેમની જવાબદારી બાબત:- કોઈ જમીન અને મકાનના માલિકનું મૃત્યું થાય તે પ્રસંગે, જેને મરહુમની મિલકતના હક વારસ તરીકે અથવા અન્યથા તબદીલ થાય તે વ્યક્તિની કર ભરવાની પ્રથમતઃ જવાબદારી થશે. આવી વ્યક્તિએ મરહુમના મૃત્યુની તારીખથી ત્રણ મહિનાની અંદર નોટિફાઈડ એરિયા સત્તામંડળને આવી તબદીલીની નોટિસ આપવી જોઈશે. નોટિફાઈડ એરિયા સત્તામંડળ પોતાને જરૂરી જણાય તેવી તપાસ કર્યા પછી, મરહુમના વારસદારોના નામો આકારણી યાદીમાં દાખલ કરવાનો હુકમ કરી શકશે અને આવા વારસદારો વેરાની બાકી રકમ સહિત આખા વર્ષ માટેના લેણા નીકળતા વેરાની ચુકવણી માટે જવાબદાર થશે.
૧૨. નિર્ણય આખરી ગણવા બાબત:- વેરા અને તેને લગતી બીજી બાબતોના સંબંધમાં, નોટિફાઈડ એરિયા સત્તામંડળનો નિર્ણય આખરી ગણાશે.

(ધ) 'વેરાપાત્ર કિંમત' એટલે પ્રસ્તુત જમીન અને મકાનની મૂકી કિંમતના ૬%ના દરે ગણતરી કરતા મળતી કુલ રકમમાંથી ૧૦% જેટલી રકમ બાદ કર્યા પછી મળતી ચોખ્ખી રકમ. જમીન અને મકાનની આકારણીના સમયે, નોટિફાઇડ એરિયામાં જમીન અને મકાનની બજાર કિંમત તેની મૂળ કિંમત ગણાશે;

(ન) 'વર્ષ' એટલે નાણાકીય વર્ષ.

૩. એકત્રિત વેરાના દર:- (૧) નોટિફાઇડ એરિયાની હદોમાં આવેલ તમામ મકાનો અને જમીનો ઉપરનો એકત્રિત વેરો, નીચેના વેરાના બદલામાં, એનેક્ષર-ક અને એનેક્ષર-ખમાં નિર્દિષ્ટ કરેલા દરે લેવામાં આવશે:-

(ક) મકાનો અથવા જમીનો અથવા બંને ઉપરનો વેરો,

(ખ) સામાન્ય સફાઈ ઉપકર,

(ગ) દીવાબત્તી વેરો.

(૨) એકત્રિત વેરામાં વધારો: એનેક્ષર-ક અને ખમાં નિર્દિષ્ટ કરેલ દરો પ્રમાણે નક્કી થતાં વેરાનું પ્રમાણ સંચાલક મંડળ સાથે વિચારવિનિમય કરીને, દર વર્ષે બિન-માંડવાળપાત્ર એવા ૫% અને ૧૦%ની વચ્ચેના મૂલ્ય જેટલું વધારવું જોઈશે. તેમ છતાં, આ વધારો ચાર વર્ષના એક એવા દરેક બ્લોક વર્ષમાં અગાઉના બ્લોક વર્ષના વેરાના ૪૦% અથવા ચતુર્વર્ષીય સમીક્ષા વખતે જમીન અને મકાનની બજાર કિંમત વિચારણામાં લીધા પછી નક્કી કરાયેલ એકત્રિત વેરો, એ બંનેમાંથી જે ઓછું હોય તેના કરતાં વધુ હોવો જોઈશે નહિ.

(૩) આકારણીની ચતુર્વર્ષીય સમીક્ષા.- નોટિફાઇડ એરિયામાં આવેલી એકત્રિત વેરા માટે એકવાર આકારણી કરેલી તમામ મિલકતો, આકારણીના સમયે જમીનો અને મકાનની પ્રવર્તમાન બજાર કિંમત લાગુ પાડીને ચાર વર્ષના એક એવા દરેક બ્લોક વર્ષ માટે ચતુર્વર્ષીય સમીક્ષાને અધીન રહેશે અને એકત્રિત વેરો, અહીં નીચે દર્શાવ્યા પ્રમાણે વેરાના ભારણમાં વધારાની ટોચમર્યાદાને અધીન રહીને તદનુસાર સુધારવામાં આવશે:

**મૂકી કિંમતમાં વધારાને લીધે વેરાના ભારણ પરની ટોચમર્યાદા.-** કોઈ મિલકતની એકવાર આકારણી કરવામાં આવે અને જમીન અને મકાનની પ્રવર્તમાન બજારકિંમત પ્રમાણે તેનો એકત્રિત વેરો નક્કી કરવામાં આવે અને તે પછીના બ્લોક વર્ષ માટેની ચતુર્વર્ષીય સમીક્ષા વખતે વેરાનું ભારણ, અગાઉના બ્લોકમાં લીધેલ વેરાના ૪૦% કરતાં વધતું હોય, ત્યારે વેરાના ભારણમાં વધારો ઉપર્યુકત મિલકતના સંબંધમાં અગાઉના બ્લોક વર્ષમાં આકારેલ એકત્રિત વેરાના ૪૦% સુધી મર્યાદિત રાખવો જોઈશે.

૪. મુકિત.- (૧) નીચેના એકત્રિત વેરામાંથી મુકિત આપવામાં આવશે:-

(ગ) જેમનો ઉપયોગ અથવા ભોગવટો માત્ર જાહેર પૂજા માટે જ અથવા નફો ન કરતી હોય તેવી શાળાઓ, કોલેજો, સામાજિક અને સખાવતી સંસ્થાઓ માટે જ કરવામાં આવતો હોય તેવા તમામ મકાનો અને જમીનો અથવા તેના ભાગો.

(૨) માલનું ઉત્પાદન કરવામાં અને સેવાઓ પૂરી પાડવામાં રોકાયેલ કોઈપણ ભોગવટો કરનારને, નીચે પ્રમાણે વેરો ભરવામાંથી મુકિત આપવામાં આવશે:-

(૧) ફાળવણી તારીખથી શરૂ કરીને પ્રથમ વર્ષ માટે સંપૂર્ણ મુકિત.

(૨) બીજા વર્ષ માટે ૫૦% મુકિત.

(૩) કોર્પોરેશનનો એલોટી (ભાડૂત) ન હોય તેવો કોઈ ભોગવટો કરનારને, જમીન અને મકાન, માલનું ઉત્પાદન કરવા અને સેવાઓ પૂરી પાડવા માટે ઉપયોગમાં લેવાયા હોય તે પ્રથમ અને બીજા વર્ષ માટે ઉપર જણાવેલ મુકિત માટે હકદાર થશે નહિ.

(૪) કોર્પોરેશનની માલિકીની મિલકતોને નીચે પ્રમાણે વેરો ભરવામાંથી મુકિત આપવામાં આવશે:

(૧) ફાળવેલ અથવા ભાડે આપેલ ન હોય તેવી મિલકતોને સંપૂર્ણપણે મુકિત આપવામાં આવશે.

(૨) કોર્પોરેશને ફાળવેલ અને પાછી મેળવેલ મિલકતો પર બંધ એકમો તરીકે વેરો નંખાશે.

**૫. એકત્રિત વેરાની આકારણી અને જવાબદારી:-**

- (ક) વેરો, અધિનિયમની જોગવાઈઓ અનુસાર જેટલે સુધી લાગુ પાડી શકાય તેટલે સુધી આકારવો અને વસૂલ કરવો જોઈશે.
- (ખ) માલિક અથવા ભોગવટો કરનાર, આ નિયમો હેઠળ વેરો ભરવા માટે સંયુક્ત રીતે અને પૃથક રીતે જવાબદાર રહેશે.
- (ગ) મકાનના બાંધકામના માલિક અથવા ભોગવટો કરનાર, આ નિયમો હેઠળ વેરો ભરવા માટે સંયુક્ત રીતે અને પૃથક રીતે જવાબદાર રહેશે.
- (ઘ) કોઈ માલિક/ ભોગવટો કરનાર તેની મિલકત વેચાણ, પટા અથવા ગીરોથી બીજી વ્યક્તિની તરફેણમાં તબદીલ કરે, ત્યારે મિલકતના નવા માલિકે અથવા ભોગવટો કરનારે, તબદીલીના સમયે જમીન અને મકાનની પ્રવર્તમાન બજાર કિંમત **-(Rate)** પ્રમાણે વેરો ભરવો પડશે.
- (ચ) વેરો, દરેક વર્ષમાં એપ્રિલ મહિનાની પહેલી તારીખે અને ઓક્ટોબર મહિનાની પહેલી તારીખે અથવા તે પહેલાં બે હપ્તામાં આજોતરો ભરવાપાત્ર થશે. બિલ આપ્યાની તારીખથી ત્રીસ દિવસ પૂરા થયા પછી ભરવાપાત્ર એકત્રિત વેરાની રકમ ઉપરાંત વાર્ષિક ૧૫%ના દરે દંડનીય વ્યાજ લેવામાં આવશે.
- (છ) એકત્રિત વેરાની વસૂલાત માટે સખત પગલાં.- નોટિફાઈડ એરિયા સત્તામંડળે, કસૂરદાર પાસેથી અધિનિયમની કલમ ૧૩૩ અને ૧૩૪ હેઠળ એકત્રિત વેરાની વસૂલાત માટે સખત પગલાં લેવા જોઈશે.

**૬. માફી અને રિફંડ.-**

- (ક) જો કોઈ મકાન અથવા જમીન આખા વર્ષ અથવા તેના ભાગ દરમિયાન ખાલી રહ્યા હોય અને તેનો ઉપયોગ થયો ન હોય અને નોટિફાઈડ એરિયા સત્તામંડળને તે મતલબની નોટિસ આપી હોય તો જાણ કર્યાની તારીખથી વેરાની રકમના ત્રણ ચતુર્થાંશ જેટલી રકમની માફી અથવા રિફંડ આપવામાં આવશે:  
પરંતુ આવી નોટિસ મળ્યાની તારીખની અગાઉની કોઈપણ મુદત માટે, કોઈપણ માફી અથવા રિફંડ અમલમાં આવશે નહિ અને મિલકત ખાલી રહે, તો આવી નોટિસ દર વર્ષે આપવી જોઈશે.
- (ખ) કોઈ મકાનનો કોઈપણ ભાગ તોડી પાડવામાં આવ્યો હોય, ત્યારે તોડી પાડવાની જાણ કર્યાની તારીખથી મિલકતની કિંમતના ઘટાડાના પ્રમાણમાં માફી અથવા રિફંડ આપવામાં આવશે.

**૭. લેખિત નોટિસ આપવા બાબત.-** નીચેની બાબતમાં નોટિફાઈડ એરિયા સત્તામંડળને એક મહિનાની અંદર લેખિત નોટિસ આપવાની કોઈ મકાન કે જમીનના માલિક અથવા ભોગવટો કરનાર ફરજ રહેશે:-

- (ક) મકાન નવું ઊભું કરવામાં અથવા બાંધવામાં આવ્યું હોય તે બાબતમાં;
- (ખ) અગાઉ જેની આકારણી કરવામાં આવી હોય તેવું કોઈ મકાન વધારવામાં આવ્યું હોય, ફરી બાંધવામાં આવ્યું હોય, ફરી બાંધકામ કરવામાં આવ્યું હોય અથવા તેમાં સુધારા અને વધારા કરવામાં આવ્યા હોય અથવા એવી રીતે સુધારો કરવામાં આવ્યો હોય કે જેથી કરીને તેની મૂડી કિંમત વધી જાય તે બાબતમાં;
- (ગ) અગાઉ જેની આકારણી કરવામાં આવી હોય તેવા કોઈ મકાન અથવા જમીનના ભાગલા પાડવામાં આવ્યા હોય તે બાબતમાં;
- (ઘ) જો કોઈ મકાન સંપૂર્ણતઃ અથવા અંશતઃ તોડી પાડવામાં આવ્યું હોય અથવા અન્યથા તેની ભાડાની કિંમત ઘટી ગઈ હોય, તે બાબતમાં.

**સ્પષ્ટીકરણ.-** એક મહિનાની મુદત, ઉપરોક્ત (ક), (ખ), (ગ)ની બાબતમાં મકાનનું કામ પૂરું થયાની તારીખ અથવા તેના ભોગવટાની તારીખ એ બેમાંથી જે પહેલું હોય તે તારીખથી અને (ઘ)ની બાબતમાં બનાવ બન્યાની તારીખથી ગણવામાં આવશે.

**૮. નોટિસ મળ્યેથી આકારણી કરવા બાબત.-** (૧) નિયમ ૭ હેઠળ લેખિત નોટિસ મળે ત્યારે નોટિફાઈડ એરિયા સત્તામંડળે, પોતે જરૂરી ગણે તેવી તપાસ કર્યા પછી, મકાનની આકારણી કરાવવી જોઈશે.

- (૨) આવી આકારણી કર્યા પછી, નોટિફાઈડ એરિયા સત્તામંડળે આવું મૂલ્યાંકન અલગ યાદીમાં નોંધવું જોઈશે અને વર્ષના અંતે, આકારણીમાં કરેલા આવા ફેરફાર પ્રમાણિત આકારણી યાદીમાં નોંધવા જોઈશે.

**૯. ઉત્તરાધિકાર બાબત તકરાર હોય ત્યારે આકારણી યાદીમાં માલિકના નામ બાબત.-** આકારણી યાદીમાં કોઈ મિલકતના માલિક તરીકે જેનું નામ દાખલ કર્યું હોય તેવી કોઈ વ્યક્તિના ઉત્તરાધિકાર સંબંધી કોઈ તકરાર હોય, ત્યારે ઉત્તરાધિકારના દાવેદારોમાંથી જે દાવેદાર ખરેખર ભોગવટાથી મિલકતનો કબજો ધરાવતા હોય તેના નામ આકારણી યાદીમાં ભોગવટેદાર તરીકે દાખલ કરવા જોઈશે અને તકરારની પતાવટ અથવા સક્ષમ કોર્ટનો હુકમ રજૂ કરે ત્યાં સુધી વેરો તેની/તેમની પાસેથી વસૂલ કરવામાં આવશે.

૧૦. તબદીલ કરનારે અને તબદીલીથી લેનારે લેખિત નોટિસ આપવા બાબત.- કોઈ મકાન અથવા જમીનના સંબંધમાં વેરા ભરવા માટે પ્રથમતઃ જવાબદાર કોઈ વ્યક્તિનો હક, લેખિત લેખ દ્વારા અથવા અન્યથા તબદીલ થયો હોય, ત્યારે તબદીલ કરનારે અને તબદીલીથી લેનારે, તબદીલી કરવામાં આવી હોય તે પછી ત્રણ મહિનાની અંદર નોટિફાઈડ એરિયા સત્તામંડળને લેખિત નોટિસ આપવી જોઈશે, જેઓ પોતાને જરૂરી ગણે તેવી તપાસ કર્યા પછી, જમીન અને મકાન પર લેણા નીકળતા એકત્રિત વેરાની પૂર્વ ચૂકવણીને અધીન રહીને, આકારણી યાદીમાં તબદીલ કરનારને સ્થાને તબદીલીથી લેનારનું નામ દાખલ કરવાનો હુકમ કરશે. ત્યાર પછી, તબદીલીથી લેનાર, એવી રીતે તબદીલ થયેલી મિલકતના સંબંધમાં લેણા થાય તેવા વેરાની ચુકવણી માટે જવાબદાર રહેશે.
૧૧. વારસદારોએ નોટિસ આપવા અને તેમની જવાબદારી બાબત.- કોઈ જમીન અને મકાનના માલિકનું મૃત્યુ થાય તે પ્રસંગે, જેને મરહુમના મિલકતના હક વારસ તરીકે અથવા અન્યથા તબદીલ થાય તે વ્યક્તિની કર ભરવાની પ્રથમતઃ જવાબદારી થશે. આવી વ્યક્તિએ મરહુમના મૃત્યુની તારીખથી ત્રણ મહિનાની અંદર નોટિફાઈડ એરિયા સત્તામંડળને આવી તબદીલીની નોટિસ આપવી જોઈશે. નોટિફાઈડ એરિયા સત્તામંડળ પોતે જરૂરી ગણે તેવી તપાસ કર્યા પછી, મરહુમના વારસદારોના નામો આકારણી યાદીમાં દાખલ કરવાનો હુકમ કરી શકશે અને આવા વારસદારો વેરાની બાકી રકમ સહિત આખા વર્ષ માટેના લેણા નીકળતા વેરાની ચુકવણી માટે જવાબદાર થશે.
૧૨. નિર્ણય આખરી ગણાવા બાબત.- વેરા અને તેને લગતી બીજી બાબતોના સંબંધમાં, નોટિફાઈડ એરિયા સત્તામંડળનો નિર્ણય આખરી ગણાશે.

- (ધ) 'વેરાપાત્ર કિંમત' એટલે પ્રસ્તુત જમીન અને મકાનની મૂડી કિંમતના ૬% ના દરે ગણતરી કરતા મળતી કુલ રકમમાંથી ૧૦ % જેટલી રકમ બાદ કર્યા પછી, મળતી ચોખ્ખી રકમ. જમીન અને મકાનની આકારણીના સમયે, નોટિફાઇડ એરિયામાં જમીન અને મકાનની બજાર કિંમત તેની મૂળ કિંમત ગણાશે;
- (ન) 'વર્ષ' એટલે નાણાકીય વર્ષ.

૩. એકત્રિત વેરાના દર:- (૧) નોટિફાઇડ એરિયાની હદોમાં આવેલ તમામ મકાનો અને જમીનો ઉપરનો એકત્રિત વેરો, નીચેના વેરાના બદલામાં, એનેક્સર-ક અને એનેક્સર-ખમાં નિર્દિષ્ટ કરેલા દરે લેવામાં આવશે:-

- (ક) મકાનો અથવા જમીનો અથવા બંને ઉપરનો વેરો,
- (ખ) સામાન્ય સફાઈ ઉપકર,
- (ગ) દીવાબત્તી વેરો.

(૨) એકત્રિત વેરામાં વધારો: એનેક્સર-ક અને ખમાં નિર્દિષ્ટ કરેલ દરો પ્રમાણે નક્કી થતાં વેરાનું પ્રમાણ, સંચાલક મંડળ સાથે વિચાર વિનિમય કરીને, દર વર્ષે બિન-માંડવાળપાત્ર એવા ૫% અને ૧૦% ની વચ્ચેના મૂલ્ય જેટલું વધારવું જોઈશે. તેમ છતાં, આ વધારો ચાર વર્ષના એક એવા દરેક બ્લોક વર્ષમાં અગાઉના બ્લોક વર્ષના વેરાના ૪૦% અથવા ચતુર્વર્ષીય સમીક્ષા વખતે જમીન અને મકાનની બજાર કિંમત વિચારણામાં લીધા પછી નક્કી કરાયેલ એકત્રિત વેરો, એ બંનેમાંથી જે ઓછું હોય તેના કરતાં વધુ હોવો જોઈશે નહિ.

(૩) આકારણીની ચતુર્વર્ષીય સમીક્ષા:- નોટિફાઇડ એરિયામાં આવેલી એકત્રિત વેરા માટે એકવાર આકારણી કરેલી તમામ મિલકતો, આકારણીના સમયે જમીન અને મકાનની પ્રવર્તમાન બજારકિંમત લાગુ પાડીને ચાર વર્ષના એક એવા દરેક બ્લોક વર્ષ માટે ચતુર્વર્ષીય સમીક્ષાને અધીન રહેશે અને એકત્રિત વેરો, અહીં નીચે દર્શાવેલ વેરાના ભારણમાં વધારાની ટોચમર્યાદાને અધીન રહીને તદનુસાર સુધારવામાં આવશે:

**મૂડી કિંમતમાં વધારાને લીધે વેરાના ભારણ પરની ટોચમર્યાદા:-** કોઈ મિલકતની એકવાર આકારણી કરવામાં આવે અને જમીન અને મકાનની પ્રવર્તમાન બજારકિંમત પ્રમાણે તેનો એકત્રિત વેરો નક્કી કરવામાં આવે અને તે પછીના બ્લોક વર્ષ માટેની ચતુર્વર્ષીય સમીક્ષા વખતે વેરાનું ભારણ, અગાઉના બ્લોકમાં લીધેલ વેરાના ૪૦% કરતાં વધતું હોય, ત્યારે વેરાના ભારણમાં વધારો, ઉપર્યુક્ત મિલકતના સંબંધમાં અગાઉના બ્લોક વર્ષમાં આકારેલ એકત્રિત વેરાના ૪૦% સુધી મર્યાદિત રાખવો જોઈશે.

૪. મુકિત:- (૧) નીચેનાને એકત્રિત વેરોમાંથી મુકિત આપવામાં આવશે:-

- (ક) કેન્દ્ર અથવા રાજ્ય સરકાર, પંચાયત, જિલ્લા સ્કૂલ બોર્ડની માલિકીના મકાનો અને જમીન અને મ્યુનિસિપલ સ્કૂલ બિલ્ડીંગ;
- (ખ) પ્રાચીન સ્મારક જાળવણી અધિનિયમ, ૧૯૦૪ અથવા ગુજરાત પ્રાચીન સ્મારકો અને પુરાતત્વવિષયક સ્થળો અને અવશેષો બાબતનો અધિનિયમ, ૧૯૬૫ના અર્થ મુજબ સંરક્ષિત સ્મારકો જાહેર કરેલ હોય અને જેમાંથી કોઈ મહેસૂલ કે ભાડું ઉપજતું ન હોય તેવા તમામ મકાનો અને જમીનો;
- (ગ) જેમનો ઉપયોગ અથવા ભોગવટો માત્ર જાહેર પૂજા માટે જ અથવા નફો ન કરતી હોય તેવી શાળા, કોલેજો, સામાજિક અને સખાવતી સંસ્થાઓ માટે જ કરવામાં આવતો હોય તેવા તમામ મકાન અને જમીનો અથવા તેના ભાગો.

- (૨) માલનું ઉત્પાદન કરવામાં અને સેવાઓ પૂરી પાડવામાં રોકાયેલ કોઈપણ ભોગવટેદારને, નીચે પ્રમાણે વેરો ભરવામાંથી મુક્તિ આપવામાં આવશે:-
- (૧) ફાળવણી તારીખથી શરૂ કરીને પ્રથમ વર્ષ માટે સંપૂર્ણ મુક્તિ.
  - (૨) બીજા વર્ષ માટે ૫૦% મુક્તિ.
  - (૩) કોર્પોરેશનનો એલોટી (ભાડૂત) ન હોય તેવો કોઈ ભોગવટેદાર, જમીન અને મકાન, માલનું ઉત્પાદન કરવા અને સેવાઓ પૂરી પાડવા માટે ઉપયોગમાં લેવાયા હોય તે પ્રથમ અને બીજા વર્ષ માટે ઉપર જણાવેલ મુક્તિ માટે હકદાર થશે નહિ.
  - (૪) કોર્પોરેશનની માલિકીની મિલકતોને નીચે પ્રમાણે વેરો ભરવામાંથી મુક્તિ આપવામાં આવશે:
    - (૧) ફાળવેલ અથવા ભાડે આપેલ ન હોય તેવી મિલકતોને સંપૂર્ણપણે મુક્તિ આપવામાં આવશે.
    - (૨) કોર્પોરેશને ફાળવેલ અને પાછી મેળવેલ મિલકતો પર બંધ એકમો તરીકે વેરો નંખાશે.

૫. એકત્રિત વેરાની આકારણી અને જવાબદારી:-

- (ક) વેરો, અધિનિયમની જોગવાઈઓ અનુસાર જેટલે સુધી લાગુ પાડી શકાય તેટલે સુધી આકારવો અને વસૂલ કરવો જોઈશે,
- (ખ) માલિક અથવા ભોગવટેદાર, આ નિયમો હેઠળ વેરો ભરવા માટે સંયુક્ત અને પૃથક્ રીતે જવાબદાર રહેશે,
- (ગ) મકાનના બાંધકામના માલિક અથવા ભોગવટેદાર, આ નિયમો હેઠળ વેરો ભરવા માટે સંયુક્ત અને પૃથક્ રીતે જવાબદાર રહેશે,
- (ઘ) કોઈ માલિક / ભોગવટેદાર તેની મિલકત વેચાણ, પટા અથવા ગીરોથી બીજી વ્યક્તિની તરફેણમાં તબદીલ કરે, ત્યારે મિલકતના નવા માલિકે અથવા ભોગવટેદારે, તબદીલીના સમયે જમીન અને મકાનની પ્રવર્તમાન બજાર કિંમત -(Rate) પ્રમાણે વેરો ભરવો પડશે,
- (ચ) વેરો, દરેક વર્ષમાં એપ્રિલ મહિનાની પહેલી તારીખે અને ઓક્ટોબર મહિનાની પહેલી તારીખે અથવા તે પહેલાં બે હપ્તામાં આગોતરો ભરવાપાત્ર થશે. બિલ આપ્યાની તારીખથી ત્રીસ દિવસ પૂરા થયા પછી, ભરવાપાત્ર એકત્રિત વેરાની રકમ ઉપરાંત વાર્ષિક ૧૫% ના દરે દંડનીય વ્યાજ લેવામાં આવશે,
- (છ) એકત્રિત વેરાની વસૂલાત માટે સખત પગલાં:- નોટિફાઈડ એરિયા સત્તામંડળે, કસુરદાર પાસેથી અધિનિયમની કલમ ૧૩૩ અને ૧૩૪ હેઠળ એકત્રિત વેરાની વસૂલાત માટે સખત પગલાં લેવા જોઈશે.

૬. માફી અને રિફંડ:-

- (ક) જો કોઈ મકાન અથવા જમીન આખા વર્ષ અથવા તેના ભાગ દરમિયાન ખાલી રહ્યા હોય અને તેનો ઉપયોગ થયો ન હોય અને નોટિફાઈડ એરિયા સત્તામંડળને તે મતલબની નોટિસ આપી હોય તો જાણ કર્યાની તારીખથી વેરાની રકમના ત્રણ ચતુર્થાંશથી વધુ ન હોય તેટલા પ્રમાણમાં માફી અથવા રિફંડ આપવામાં આવશે:

પરંતુ આવી નોટિસ મળ્યાની તારીખની અગાઉની કોઈપણ મુદત માટે, કોઈપણ માફી કે રિફંડ અમલમાં આવશે નહિ અને મિલકત ખાલી રહે, તો આવી નોટિસ દર વર્ષે આપવી જોઈશે.

- (ખ) જો કોઈ મકાનનો કોઈપણ ભાગ તોડી પાડવામાં આવ્યો હોય, તો તોડી પાડવાની જાણ કર્યાની તારીખથી મિલકતની કિંમતના ઘટાડાના પ્રમાણમાં માફી અથવા રિફંડ આપવામાં આવશે.

૭. લેખિત નોટિસ આપવા બાબત :- નીચેની બાબતમાં નોટિફાઈડ એરિયા સત્તામંડળને એક મહિનાની અંદર લેખિત નોટિસ આપવાની કોઈ મકાન કે જમીન માલિક અથવા ભોગવટેદારની ફરજ રહેશે :-

- (ક) મકાન નવું ઊભું કરવામાં અથવા બાંધવામાં આવ્યું હોય તે બાબતમાં;
- (ખ) અગાઉ જેની આકારણી કરવામાં આવી હોય તેવું કોઈ મકાન વધારવામાં આવ્યું હોય, ફરી બાંધવામાં આવ્યું હોય, ફરી બાંધકામ કરવામાં આવ્યું હોય અથવા તેમાં સુધારા અને વધારા કરવામાં આવ્યા હોય અથવા એવી રીતે સુધારો કરવામાં આવ્યો હોય કે જેથી કરીને તેની મૂડી કિંમત વધી જાય તે બાબતમાં;

- (ગ) અગાઉ જેની આકારણી કરવામાં આવી હોય તેવા કોઈ મકાન અથવા જમીનના ભાગલા પાડવામાં આવ્યા હોય તે બાબતમાં;
- (ઘ) જો કોઈ મકાન સંપૂર્ણતઃ અથવા અંશતઃ તોડી પાડવામાં આવ્યું હોય અથવા અન્યથા તેની ભાડાની કિંમત ઘટી ગઈ હોય, તે બાબતમાં.

**સ્પષ્ટીકરણ:-** એક મહિનાની મુદત, ઉપરના (ક), (ખ), (ગ) ની બાબતમાં મકાનનું કામ પૂરું થયાની તારીખ અથવા તેના ભોગવટાની તારીખ એ બેમાંથી જે વહેલું હોય તે તારીખથી અને (ઘ)ની બાબતમાં બનાવ બન્યાની તારીખથી ગણવામાં આવશે.

૮. નોટિસ મળ્યેથી આકારણી કરવા બાબત:- (૧) નિયમ ૭ હેઠળ લેખિત નોટિસ મળે, ત્યારે નોટિફાઈડ એરિયા સત્તામંડળે, પોતાને જરૂરી જણાય તેવી તપાસ કર્યા પછી, મકાનની આકારણી કરાવવી જોઈશે.
- (૨) આવી આકારણી કર્યા પછી, નોટિફાઈડ એરિયા સત્તામંડળે આવું મૂલ્યાંકન અલગ યાદીમાં નોંધવું જોઈશે અને વર્ષની સમાપ્તિ પછી, આકારણીમાં કરેલા આવા ફેરફારો પ્રમાણિત આકારણીની યાદીમાં નોંધવા જોઈશે.
૯. ઉત્તરાધિકાર બાબત તકરાર હોય ત્યારે આકારણી યાદીમાં માલિકના નામ બાબત:- આકારણીની યાદીમાં કોઈ મિલકતના માલિક તરીકે જેનું નામ દાખલ કર્યું હોય તે કોઈ વ્યક્તિના ઉત્તરાધિકાર સંબંધી કોઈ તકરાર હોય, ત્યારે ઉત્તરાધિકારના દાવેદારોમાંથી જે દાવેદાર ખરેખર ભોગવટાથી મિલકતનો કબજો ધરાવતા હોય તેના નામ આકારણી યાદીમાં ભોગવટેદાર તરીકે દાખલ કરવા જોઈશે અને તકરારની પતાવટ અથવા સક્ષમ કોર્ટેનો હુકમ રજૂ કરે ત્યાં સુધી વેરો તેની/તેમની પાસેથી વસૂલ કરવામાં આવશે.
૧૦. તબદીલ કરનારે અને તબદીલીથી લેનારે લેખિત નોટિસ આપવા બાબત:- કોઈ મકાન અથવા જમીનના સંબંધમાં, વેરા ભરવા માટે પ્રથમતઃ જવાબદાર કોઈ વ્યક્તિનો હક લેખિત લેખ દ્વારા અથવા અન્યથા તબદીલ થયો હોય, ત્યારે તબદીલ કરનારે અને તબદીલીથી લેનારે, તબદીલી કરવામાં આવી હોય તે પછી ત્રણ મહિનાની અંદર નોટિફાઈડ એરિયા સત્તામંડળને લેખિત નોટિસ આપવી જોઈશે, જેઓ પોતાને જરૂરી જણાય તેવી તપાસ કર્યા પછી, જમીન અને મકાન પર લેણા એકત્રિત વેરાની પૂર્વ-ચુકવણીને અધીન રહીને આકારણી યાદીમાં તબદીલ કરનારને સ્થાને તબદીલીથી લેનારનું નામ દાખલ કરવાનો હુકમ કરશે. ત્યાર પછી, તબદીલીથી લેનાર, એવી રીતે તબદીલ થયેલી મિલકતના સંબંધમાં લેણા થાય તેવા વેરાની ચુકવણી માટે જવાબદાર રહેશે.
૧૧. વારસદારોએ નોટિસ આપવા અને તેમની જવાબદારી બાબત:- કોઈ જમીન અને મકાનના માલિકનું મૃત્યું થાય તે પ્રસંગે, જેને મરહુમના મિલકતના હક વારસ તરીકે અથવા અન્યથા તબદીલ થાય તે વ્યક્તિની કર ભરવાની પ્રથમતઃ જવાબદારી થશે. આવી વ્યક્તિએ મરહુમના મૃત્યુની તારીખથી ત્રણ મહિનાની અંદર નોટિફાઈડ એરિયા સત્તામંડળને આવી તબદીલીની નોટિસ આપવી જોઈશે. નોટિફાઈડ એરિયા સત્તામંડળે પોતાને જરૂરી જણાય તેવી તપાસ કર્યા પછી, મરહુમના વારસદારોના નામો આકારણી યાદીમાં દાખલ કરવાનો હુકમ કરવો જોઈશે અને આવા વારસદારો વેરાની બાકી રકમ સહિત આખા વર્ષ માટેના લેણા નીકળતા વેરાની ચુકવણી માટે જવાબદાર થશે.
૧૨. નિર્ણય આપરી ગણવા બાબત:- વેરા અને તેને લગતી બીજી બાબતોના સંબંધમાં, નોટિફાઈડ એરિયા સત્તામંડળનો નિર્ણય આપરી ગણાશે.

Means lighting provided for use when the supply to the normal lighting fails.

**2.40 Emergency Lighting System**

Means the entire lighting system provided for use when the supply to the normal lighting fails including the standby power source.

**2.41 Enclosed Staircase**

Means a staircase separated by fire resistant walls and doors from the rest of the building.

---

**2.42 Escalator**

Means a power driven, inclined, continuous stairway used for raising or lowering passengers.

**2.43 Escape Route**

Means any well ventilated corridor, staircase or other circulations space, or any combination of the same, by means of which a safe place in the open air at ground level can be reached.

**2.44 Escape Lighting**

Means lighting provided to ensure that the escape route is illuminated at all material times when users are on the premise, or at times when the main lighting is not available.

**2.45 Exhibition Hall**

Means a large hall for holding exhibitions

**2.46 Existing Building**

Means such buildings which are licensed to perform their respective use.

**2.47 Existing Development/ Building/ Use**

Means a development, building, structure or its use as sanctioned, approved, regularized, authorized by the Competent Authority, existing prior to these Regulations.

**2.48 Exit**

Means a passage, channel or means of egress from any building, storey or floor area to a street or other open space of safety. These can be of three kinds i) Horizontal Exit Means an exit which is a protected opening through or around a fire wall or bridge connecting two or more buildings.(An arrangement which allows alternative egress from a floor area at or near the same level in an adjoining building or an adjoining part of the same building with adequate fire separation.) ii) Outside Exit Means an exit from a building to a public way, to an open area leading to a public way or to an enclosed fire resistant passage leading to a public way. iii) Vertical Exit Means an exit used for ascending or descending between two or more levels, including stairways, smoke-proof towers, ramps, escalators and fire escapes.

**2.49 External Wall**

Means an outer wall of a building not being a party wall even though adjoining a wall of another building and also means a wall abutting on an interior open space of any building.

**2.50 Farm House**

Means a plot of land including permissible construction in the area designated as agricultural use by the Competent Authority.

**2.51 Floor**

Means the lower surface in a storey on which one normally walks in a building, and does not include a mezzanine floor. Ground Floor is the floor at ground level with a direct access to a street or open space. The floor above it with minimum permissible height shall be termed as floor 1, with the next higher floor being termed as floor 2, and so on upwards.

---

**2.52 Floor Space Index**

Means the quotient of the ratio of the combined gross floor area of all floors including areas of all walls and columns except areas specifically exempted under these Regulations, to the total area of the building unit.

$$\text{FloorSpaceIndex (FSI)} = \frac{\text{TotalFloorArea including Walls and Columns of all Floors}}{\text{Area of Building Unit}}$$

**Areas Not Counted Towards Calculation of FSI**

1. Hollow Ground Floor: Spaces of Hollow Ground Floor provided for the purpose of parking with maximum clear height of 2.8mts.
2. Hollow Ground Floor can have provision for electric meter room, room for telephone distribution board, bathroom, water room, servant room, and security cabin and entrance foyer if the total area does not exceed 15sqm. This area shall not be considered towards computation of FSI.
3. All interior open to sky spaces, utility ducts in any form, shape and size required either by design or Regulations. However, an atrium shall be counted towards the computation of FSI.
4. Basement exclusively used for parking. Such basement shall have minimum height of 2.8mts, and maximum height of 3.8mts, measured from finished basement floor level to finished upper/plinth level. Only in case of mechanized parking, there is no restriction of maximum height or number of basement floors used for parking purpose.
5. In any marginal open space-weather sheds, sun breakers and horizontal or vertical projections shall be permitted up to 0.60mts. These projections may also be part of the façade articulation, but shall in no cases become a part of the habitable space.
6. Staircase:  
Staircase with maximum intermediate landing width equal to the width of stair,

Maximum landing width at floor level shall be twice the width of stair.

Staircase provided within an individual dwelling unit in an apartment building, shall be included in computation of FSI.

7. Lift, lift well with lift cabin, stair cabin, lift landing of lift well and water tank, including the walls. The width of the lift landing shall be considered equal to the width of the lift well including walls and the depth shall be maximum 2.0mts.

8. Refuge area provided for fire safety as per Performance Regulation 21.0  
 9. Electric room and electric substation as specified by Competent Electric Company.  
 The Basement area, only when used for parking purpose.

#### 2.52.1 Permissible FSI

Means the base FSI permitted by the Competent Authority as a matter of right.

#### 2.52.2 Chargeable FSI

Means the FSI available by payment

### 2.53 Fire Protection and Safety

#### 2.53.1 Automatic Sprinkler System

Means a system of water pipes with sprinkler heads within a building designed to activate automatically by heat to control and extinguish a fire by discharge of water. 3.0 DEVELOPMENT PERMISSION AND BUILDING USE PERMISSION

#### 2.53.2 Combustible Material

Means a material which burns itself or adds heat to a fire when tested for non-combustion.

#### 2.53.3 Down Comer

Means an arrangement of water pipes for fire fighting within a building. It consists of pipes connected to an overhead tank and a terrace pump with air release valve at the terrace level and landing valves. It can be charged with water from ground level by fire brigade on their arrival by making connection via fire brigade inlets provided at the bottom of such down comer.

#### 2.53.4 Dry Riser

Means an arrangement of water pipes for firefighting within a building. It consists of vertical rising mains/pipes with landing valves. It can be charged with water from ground level by fire brigade on their arrival by making connection via fire brigade inlets provided at the bottom of such dry riser.

**2.53.5 Fire Alarm System (also Emergency Alarm System)**

Means an arrangement of call points or detectors, sounders and other equipment for the transmission and indication of alarm signals working automatically or manually in the event of fire.

**2.53.6 Fire Lift**

Means a lift installed to enable fire services personnel to reach different floors with minimum delay, equipped with all necessary features.

**2.53.7 Fire Proof Door (also Fire Resistant Door)**

Means a self closing door or shutter fitted to a wall opening, and constructed and erected to check the transmission of heat and fire for a specified duration.

**2.53.8 Fire Pump (also Fire Booster Pump)**

Means a mechanical/ electrical device which boosts up the water pressure at the top level of a multi-storied building to supply high pressure water for fire fighting system.

**2.53.9 Fire Resistance**

Means a property of an element of building construction to withstand fire related conditions for a stated period. It is measured by some or all of the following criteria: Resistance to collapse in case of fire (minimum 2 hours) Resistance to penetration of flame and hot gases Resistance to temperature rise on the unexposed face up to a maximum of 180°C and / or average temperature of 150°C

**2.53.10 Fire Resistance Rating**

Means the duration for which a passive fire protection system can withstand a standard fire resistance test.

**2.53.11 Fire Separation**

Means the distance in meters, measured from the relevant external wall of the building to the external wall of any other building on the site or from other site, or from the opposite side of the street or other public space for the purpose of preventing the spread of fire.

**2.53.12 Fire Service Inlet**

Means a connection provided at the base of a building for pumping up water through in-built fire-fighting arrangements by fire pumps.

**2.53.13 Fire Stairs**

A vertical enclosure, with a stairway, having the fire endurance rating required by code and used for egress and as a base for fire fighting.

**2.53.14 Fire Stop**

Means a fire resistant material, or construction having a fire resistance rating of not less than the separating elements, installed in concealed spaces or between structural elements of a building to prevent the spread/ propagation of fire and smoke through walls, Horizontal and vertical Piping and cable ducts, ceilings and the like as per the laid down criteria and having fire resistance capacity of at least 2 hours

---

**2.53.15 Fire Tower**

Means an enclosed staircase which can only be approached from the various floors through landings or lobbies separated from both the floor area and the staircase by fire resistant doors and open to the outer air.

**2.53.16 Pressurization**

Means the establishment of a pressure difference across a barrier to protect a stairway, lobby, escape route, or room of a building from smoke penetration.

**2.53.17 Smoke-Stop Door**

Means a door for preventing or checking the spread of smoke from one area to another.

**2.53.18 Venting Fire**

Means the process of inducing heat and smoke to leave a building as quickly as possible by paths such that lateral spread of fire and heat is checked, fire fighting operations are facilitated, and minimum damage is caused by fire.

**2.53.19 Wet Riser**

Means a fire fighting arrangement within the building provided by vertical rising pipes permanently charged with water from a pressurized supply.

**2.53.20 Roof Exit**

Means a means of escape with access on to the roof of a building.

**2.54 Fitness center**

A health club (also known as a fitness club, fitness center, and commonly referred to as a gym) is a place which houses exercise equipment for the purpose of physical exercise.

**2.55 Footing**

Means a foundation unit constructed in brick work, stone masonry or concrete under the base of a wall column for the purpose of distributing the load over a large area.

**2.56 Foundation**

Means the part of the structure which is in direct contact with and transmitting loads to the ground.

**2.57 Front**

Means, as applied to a plot / Building Unit, the portion facing the road. In case of a plot abutting on more than one road, the front shall be decided by the Competent Authority considering the existing and future development trend of the surrounding area.

**2.58 Fuelling Station**

Means a place for retail business engaged in supplying and dispensing of fuel products to consumers, essential for the normal operation of automobiles.

---

**2.59 Gamtal**

Means all land that has been included by the Government/ Collector within the site of village, town or city on or before the date of declaration of intention to make a Town Planning Scheme or publication of Draft Development Plan. Such land shall not include any other land which may subsequently be included within the site of any village by the Government/Collector under the provision of Land Revenue Code.

**2.60 Garage-Private**

Garage-Private means a building or a portion thereof designed and used for the parking of vehicles.

**2.61 Garage-Public**

Garage-Public means a building or portion thereof, designed other than as a private garage, operated for gain, designed and/or used for repairing, servicing, hiring, selling or storing or parking motor-driven or other vehicles.

**2.62 Grey water**

Means Waste water generated from sinks, tubs, showers and washing which can be recycled and use for WC flush, Landscape irrigation etc (excluding potable water).

**2.63 Ground Coverage**

Means the area covered by a building on any floors including cantilevered portion, enclosed cut out (open to sky) if any, but except the areas excluded specifically under these Regulations.

**2.64 Ground Level**

Means the level of the crown of the existing adjacent constructed road or the existing ground level or the high flood level, whichever is higher as may be decided by Competent Authority. Note :-High flood level shall be decided by Competent Authority.

**2.65 Guiding Floor Material**

Means flooring material used to give the directional effect or warn a person at critical places and attract the attention of visually impaired persons. The material may be guiding by colour and brightness that is conspicuously different from that of the surrounding floor material or by texture that emits different sounds.

**2.66 Habitable Room**

Means a room occupied or designed for occupancy for human habitation and uses incidental thereto, including a kitchen if used as a living room, but excluding a bath-room, water closet compartment, laundry, serving and storing, pantry, corridor, cellar, attic, store-room, pooja-room and spaces not frequently used, height of such room shall not be less than 2.80 Mts. measured from finished floor to finished ceiling.

**2.67 Hazardous Material**

Means any of the following materials:

---

- (i) radioactive substances
- (ii) inflammable, combustible or explosive materials that may produce poisonous fumes or explosions on storage, handling, processing or manufacturing.
- (iii) corrosive, toxic, obnoxious alkalis or acids
- (iv) chemicals which may produce irritant, corrosive or poisonous gases on explosion

**2.68 Height of Building**

Means the vertical distance measured from the average ground level/ high flood level/plot level and up to the top of the finished level of the top most floor slab or in case of flat roofs up to the midpoint of the height of the slopping roof excluding the genuine stair cabin, water tank, and lift room. The height of the slopping roof shall be taken as an average height of the relevant floor. Note :-High flood level shall be decided by competent authority

**2.69 Height of a Room**

Height of a Room means the vertical distance measured from the finished floor surface to the finished ceiling/slab surface. The height of a room with a pitched roof means the average height between the finished floor surface and the bottom of the eaves and the bottom of the ridge.

**2.70 High Rise Building**

Means Building having Height more than 16.5 above average road level.

**2.71 Home Occupation**

Means a customary home occupation other than the conduct of an eating or a drinking place offering services to the general public, customarily carried out by a member of the family residing on the premises without employing hired labour, and for which there is no display to indicate from the exterior of the building that it is being utilised in whole or in part for any purpose other than a residential or dwelling use and in connection with which no article or service is sold or exhibited for sale except that which is produced therein, which shall be non-hazardous and not affecting the safety of the inhabitants of the building and the neighborhood, and provided that no mechanical equipment is used except that as is customarily used for purely domestic or household purposes and /or employing licensable goods.

**2.72 Hostel**

An establishment that provides inexpensive food and lodging for a specific group of people, such as students, workers, or travellers.

**2.73 Hotel**

Means a premise with rooms and accessory facilities for lodging people offered in return for payment with or without maids. It may include accessory facilities like laundry cafeteria, restaurant, swimming pool, banquet hall, convention hall, etc.

**2.74 Laboratory**

Means the agency permitted to test the samples of industrial wastes or waste.

**2.75 Lift / Elevators**

---

Means a mechanically-guided car, platform or transport for persons and materials between two or more levels in a vertical or substantially vertical direction.

**2.76 Local authority**

Means the municipal corporation/ nagarpalika/ nagarpanchayat/ grampanchayat or the urban/area development authority as the case may be.

**2.77 Loft**

Loft shall mean an intermediate floor between two floors with a maximum height of 1.2 mt; which is constructed and adopted for storage purpose. The loft if provided in a room shall not cover more than 30% of the floor area of the room.

**2.78 Low Rise Building**

Means Building having Height Up to 16.5 above average road level.

**2.79 LPG Delivery Centre**

Means a premise used for retail outlet booking, storage and delivery of gas cylinders to customers.

**2.80 Margin**

Means space fully open to sky provided at the plot level from the edge of the building wherein built-up area shall not be permitted except specifically permitted projections under this regulation.

**2.81 Means of Egress**

Means a continuous and unobstructed way of travel from any point in a building or structure to a place of comparative safety.

**2.82 Mezzanine Floor**

Means an intermediate floor between two floors overhanging or overlooking a floor beneath.

**2.83 Mixed-Use Building**

Means a building with more than one use in different portions of the building.

**2.84 Motel**

Means an establishment that provides short-term and long-term lodging usually located with good access to the state and national road network.

**2.85 Multilevel Parking**

Means a multi-storey car park (also called a parking garage, parking structure, parking ramp, or parking deck) is a structure designed specifically to be for automobile parking and where there are a number of floors or levels on which parking takes place. It is essentially a stacked car park.

**2.86 Multiplex**

Means a complex with an integrated entertainment and shopping centre/complex having at least three cinema halls with total minimum seating capacity of 450 seats, set up in a plot having an area of 3500

---

sq.mt. or above. The multiplex may include retail outlets, showrooms, restaurant, fast food outlet, video games parlours, bowling alleys, health spa / centres and other recreational activities.

**2.87 Museum**

A building in which objects of historical, scientific, artistic, or cultural interest are stored and exhibited.

**2.88 Natural Hazard**

Means the probability of occurrence within a specific period of time of a potentially damaging natural phenomenon.

**2.89 Natural Hazard Prone Areas**

Means areas likely to have moderate to high intensity of earthquake, cyclonic storm, significant flood flow or inundation, landslides/mud flows/avalanches, or any other natural hazard. Note: Moderate to very high damage risk zones of earthquakes are as shown in Seismic Zones III, IV and V specified in IS:1893; moderate to very high damage risk zones of cyclones are those areas along the sea coast of India prone to having wind velocities of 39 m/s or more as specified in IS:875(Part 3;) and flood prone areas in river plains (unprotected and protected) are indicated in the Flood Atlas of India prepared by the Central Water Commission.

**2.90 Neighborhood Centre and Civic Centre**

Means a centre including any of the following activities: sectoral shopping centre, market, office building, cinema, small hospital, playground, swimming pool, Town hall, open air theatre, civic and cultural facilities, library, higher secondary school, parking plots, public utility and service buildings such as post office, fire station, police station, religious building and building of public uses, Institutes for Social defense.

**2.91 Non-Combustible Material**

Means a material not liable to burn or add heat to a fire when tested for combustibility in accordance with the IS-3808-1966 Method of Test for Combustibility of Building Materials.

**2.92 Non-potable water**

Means the use of water for non domestic consumption like car washing, toilet flushing, gardening, construction purposes, landscaping, irrigation uses is for bidden by virtue of powers vested with government.

**2.93 Occupancy or Use**

Occupancy or Use means the principal occupancy in an approved building for which a building or a part of it is used or intended to be used, including contingent subsidiary occupancies; mixed occupancy building being those in which more than one occupancy are present in different portions of the building.

**2.94 Occupant Load**

Means number of persons for which the means of egress of a building or portion thereof is designed.

---

**2.95 Occupier**

For the purpose of these regulations means either as an owner, on rent or on lease in any other way;

**2.96 Open Space**

Means an area forming an integral part of the plot, left permanently open to sky.

**2.97 Parapet**

Means a low wall or railing built along the edge of roof of a floor.

**2.98 Parking Space**

Means an enclosed or unenclosed covered or open area required as per regulation related to parking to park vehicles. Parking spaces shall be served by a driveway connecting them with a street or alley and permitting ingress or egress of vehicles.

**2.99 Permission**

Means a valid permission or authorisation in writing by the Competent Authority to carry out development or a work regulated by the Regulations.

**2.100 Persons on Record**

Architect, Engineer, Structural Designer, Clerk of Works, Fire Protection Consultant & Developer registered with the Competent Authority and undertaking the responsibility for the particular work as prescribed by the Appropriate Authority.

**2.101 Planetarium**

A domed building in which images of stars, planets, and constellations are projected for public entertainment or education

**2.102 Playfield**

Means a field used for playing sports or games which are open to sky. Generally, playing fields are wide expanses of grass, dirt or sand without many obstructions. There are varieties of commonly used fields, including fields for cricket, football, hockey, basketball, tennis, golf etc.

**2.103 Plinth**

Means the portion of the external wall between the level of the street and the level of the first storey above the street.

**2.104 Porch**

Means a covered surface supported on pillars or otherwise for the purpose of a pedestrian or vehicular approach to a building exclusive of marginal space.

**2.105 Premises**

Means either A property which is held under a separate card of title or for which a separate title card may be issued and in respect to which a building plans have been or may be issued, or A building which

---

is in possession as an individual unit by a cross-lease, unit title or company lease and for which a certificate of title is available. or c Land held in public ownership, for a particular purpose, or Separately assessed to local authority taxes, individual unit within building.

**2.106 Pre-treatment**

Means any processing of industrial waste or waste designed to reduce any characteristic in waste, before discharge to the waste water system.

**2.107 Prohibited industrial waste**

Means a industrial waste having physical and chemical characteristics in excess as decided by GPCB.

**2.108 Public Library**

Means a library that is accessible by the public and is generally funded from public sources and run by Municipal Corporation or other government, semi government organizations

**2.109 Public Purpose**

The expression of "Public Purpose" includes:

**2.110 Refuge Area**

Means an area where persons unable to use stairways can remain temporarily and await instructions or assistance during emergency evacuation situation.

**2.111 Retention of Non-conforming Activity**

Means an activity or use which is allowed to continue, notwithstanding its non-conforming nature in relation to the use permitted in the adjoining or surrounding area.

**2.112 Restaurant**

Means a commercial establishment where meals are prepared and served to customers

**2.113 Road/Street**

Means any highway, street, service road lane, pathway, alley, stairway, passageway, carriageway, footway, square place or bridge, whether a thoroughfare or not, over which the public have a right of passage or access or have passed and had access uninterruptedly for a specified period, whether existing or proposed in any scheme, and includes all bunds channels, ditches, storm-water drains, culverts, sidewalks, traffic islands, road-side trees and, hedges retaining walls, fences, barriers and railings within the street lines.

**2.114 Road/Street Level or Grade**

Means the officially established elevation or grade of the centre line of the street upon which a plot fronts, and if there is no officially established grade, the existing grade of the street at its mid-point.

**2.115 Road/Street Line**

Means the line defining the side limits of a road/street.

---

**2.116 Road Width or Width of Road / Street**

Means the whole extent of space within the boundaries of a road when applied to a new road/street, as laid down in the city survey, development plan, Town Planning Scheme or prescribed road lines by any act or law. The clear average width of the

existing carriage way and footpaths only on which the building or plot line abuts. The average width shall be computed by taking length of street between two extreme points on building unit abutting the street at right angles to the direction of such streets excluding the steps projections, forecourts, open areas of other spaces in front of the building erected or intended to be erected. However in case where a regular line of street is prescribed by the Competent Authority, such width shall be considered for the purpose of computing building height.

**2.117 Row House**

Means a residential building, often of similar or identical design, situated side by side and joined by common walls

**2.118 Secondary School**

Means a school for children starting from standard 9th up to 10th.

**2.119 Service Apartment**

Means a type of furnished apartment available for short-term or long-term stays, which provides amenities for daily use

**2.120 Service Road**

Means a road/lane provided at the front, rear side of a plot for service purposes

**2.121 Sewerage system**

Means all types of sewer, appurtenances, pumping stations, storage tanks, waste water treatment facility plants, marine outfalls and other related structures owned by the urban local body and used for the reception, treatment and disposal of waste water and also termed as "waste water system"

**2.122 Shop**

Means a building or part of a building where goods or services are sold

**2.123 Shopping Center or Commercial Center**

Shall mean a group of shops, office and/or stalls not less than 10 in number designed to form a market.

**2.124 Shopping Mall**

Means a mercantile establishment consisting of complex of shops representing leading merchandisers; usually includes restaurants and a convenient parking area.

**2.125 Slum Rehabilitation**

Means the Rehabilitation And Development carried out as per The Rehabilitation and Redevelopment Act -2010 as amended by time to time subject to this regulation.

---

**2.126 Solar assisted water heating system**

Means a device to heat water using solar energy as heat source.

**2.127 Stair Cover**

Means a structure with a covering roof over a staircase and its landing built to enclose only the stairs for the purpose of providing protection from the weather, and not to be used for human habitation.

**2.128 Storey**

Means the portion of a building included between the surface of any floor and the surface of the floor next above it, or if there be no floor above it, then the space between any floor and the ceiling next above it.

**2.129 Temporary Structure**

Means structures erected for temporary purpose or ceremonial occasions such as tents, hutments, shaminana, etc.

**2.130 Tenement Building**

Means residential building constructed in an independent building unit in a semi detached manner, each dwelling unit is being designed and constructed for separate occupation with independent sanitary provisions

**2.131 Theatre**

Means a building designed for the performance of plays, operas or motion-picture shows etc.

**2.132 Township**

Means parcel of land owned by a Township Developer subject to Residential Township Act 2009 as amended by time to time subject to this regulation.

**2.133 Travel Distance**

Means the distance to be travelled by a user from any point in a building to a protected escape route, external escape route or final exit.

**2.134 Trunk Infrastructure**

Means a higher order development infrastructure supplied by the local Government or State infrastructure provider and primarily intended to provide network distribution and collection functions or provide services shared by a number of developments.

**2.135 University**

Means an institution of higher education and research which grants academic degrees in a variety of subjects and provides both undergraduate education and postgraduate education.

---

**2.136 Use**

Means the principal occupancy in an approved building for which a building or a part of it is used or intended to be used, including contingent subsidiary occupancies.

**2.137 Ventilation**

Means the supply of outside air into, or the removal of inside air from an enclosed space.

**2.138 Waste**

Means any water with matter in solution or suspension, domestic wastewater, or liquid waste and includes sewage for the purpose of these regulations.

**2.139 Water Closet (W.C)**

Means a privy with an arrangement for flushing the pan with water, but does not include a bathroom.

**2.140 Water Course**

Means a natural channel or an artificial channel formed by draining or diversion of a natural channel meant for carrying clear, storm and waste water.

**2.141 Water Tank**

Means a natural existing low lying grounds forming a natural water body or wherein ~~rain water gets collected and/or plots~~ designated as Talav under the revised development plan or any other legitimate records.

**2.142 Warehouse**

Means a building the whole or a substantial part of which is used or intended to be used for the storage of goods whether for storing or for sale or for any similar purpose. It is neither a domestic nor a public building, nor merely a shop if so used not a store attached to and used for the proper functioning of a shop.

**2.143 Window**

Means an opening other than a door, to the outside of a building, which provides all or part of the required ventilation.

**2.144 Residential Building**

These shall include any building in which sleeping accommodation is provided for normal residential purposes with or without cooking or dining or both facilities, except any building classified under Institutional Buildings.

**2.145 Educational Buildings**

These shall include any building used for school, college, other training institutions for day-care purposes involving assembly for instruction, education or recreation for not less than 20 students.

---

**2.146 Institutional Buildings**

These shall include any building or part thereof, which is used for purposes, such as medical or other treatment or care of persons suffering from physical or mental illness, disease or infirmity; care of infants, convalescents or aged persons and for penal or correctional detention in which the liberty of the inmates is restricted. Institutional buildings ordinarily provide sleeping accommodation for the occupants.

**2.147 Assembly Buildings**

These shall include any building or part of a building, where number of persons not less than 50 congregate or gather for amusement, recreation, social, religious, patriotic, civil, travel and similar purposes, for example, theatres, motion picture houses, assembly halls, auditoria, exhibition halls, museums, skating rinks, gymnasiums, restaurants, places of worship, dance halls, club rooms, passenger stations and terminals of air, surface and marine public transportation services, recreation piers and stadia, etc.

**2.148 Business Buildings**

These shall include any building or part of a building which is used for transaction of business (other than that covered by Mercantile Buildings and part of buildings covered by 3.1.1.1 of NBC); for keeping of accounts and records and similar purposes, professional establishments, service facilities, etc. City halls, town halls, court houses and libraries shall be classified in this group so far as the principal function of these is transaction of public business and keeping of books and records.

**2.149 Mercantile Buildings**

These shall include any building or part of a building, which is used as shops, stores, market, for display and sale of merchandise, either wholesale or retail.

**2.150 Industrial Buildings**

These shall include any building or part of a building or structure, in which products or materials of all kinds and properties are fabricated, assembled, manufactured or processed, for example, assembly plants, industrial laboratories, dry cleaning plants, power plants, generating units, pumping stations, fumigation chambers, laundries, buildings or structures in gas plants, refineries, dairies and saw-mills, etc.

**2.151 Storage Buildings**

These shall include any building or part of a building used primarily for the storage or sheltering (including servicing, processing or repairs incidental to storage) of goods, ware or merchandise (except those that involve highly combustible or explosive products or materials) vehicles or animals, for example, warehouses, cold storage, freight depots, transit sheds, storehouses, truck and marine terminals, garages, hangers, grain elevators, barns and stables. Storage properties are characterized by the presence of relatively small number of persons in proportion to the area. Any new use which increase the number of occupants to a figure comparable with other classes of occupancy shall change the classification of the building to that of the new use, for example, hangars used for assembly purposes, warehouses used for office purposes, garage buildings used for manufacturing.

---

**2.152 Hazardous Buildings**

These shall include any building or part of a building which is used for the storage, handling, manufacture or processing of highly combustible or explosive materials or products which are liable to burn with extreme rapidity and or which may produce poisonous fumes or explosions for storage, handling, manufacturing or processing which involve highly corrosive, toxic or noxious alkalis, acids or other liquids or chemicals producing flame, fumes and explosive, poisonous, irritant or corrosive gases; and for the storage, handling or processing of any material producing explosive mixtures of dust which result in the division of matter into fine particles subject to spontaneous ignition.

## Section B Procedural Regulation

### 3.0 DEVELOPMENT PERMISSION AND BUILDING USE PERMISSION

#### 3.1 Development Permission Required

Subject to provisions of Section 26, 27, 28, 34 and 49 of the GTPUD Act 1976, no person shall undertake any building or development activity without obtaining a Development Permission prior to commencement of building or development activity. A Development Permission shall mean Permission for development granted by the Competent Authority.

Prerequisite to applying for a Development Permission shall be, having the land approved by the Competent Authority as 'Building Unit' or 'Building Units'.

#### 3.2 Development Permission Not Required

No Development Permission shall be required for undertaking building works listed in Schedule 1.

#### 3.3 Grant of a Development Permission

Grant of a Development Permission by the Competent Authority shall mean an acceptance by the Competent Authority that the design requirements of the proposed building, for which Development Permission has been granted, conforms to these Development Regulations, and that the person holding the Development Permission may undertake proposed development or construction of the proposed building within the limits of the Development Area in conformity with the Development Plan Proposals. It does not constitute acceptance of correctness, confirmation, approval or endorsement of:

(a) Title, ownership, and easement rights of the building unit for which the building is proposed

(b) Variation in area from recorded areas of a building unit

(c) Workmanship, soundness of material and structural safety of the proposed building

and shall not bind or render the Competent Authority liable in any way in regard to (a), (b) and (c) above.

##### 3.3.1 Liability

Notwithstanding any Development Permission granted under the Act and these Regulations, any person undertaking any development work shall continue to be wholly and solely liable for any injury or damage or loss whatsoever that may be caused to anyone in or around the area during such construction and no liability whatsoever in this regard shall be cast on the Competent Authority.

#### 3.4 Design Requirements

Design Requirements of the following aspects of a building shall be mandatory and may be examined by the Competent Authority for ensuring compliance of the building to these Development Regulations.

1. Permissible Ground Coverage

2. Permissible Floor Space Index

3. Permissible Height and the various floors

---

4. Permissible Open Spaces enforced under these Regulations-Common Plot, arginal Open Spaces, Set-backs and other open spaces.
5. Permissible Uses of Land and Buildings
6. Arrangements of stairs, lifts, corridors and parking
7. Minimum requirement of sanitary facility
8. Minimum Common Facility
9. Required light and ventilation
10. Minimum requirement of Fire Prevention and Safety, and N.O.C. from Chief Fire Officer as applicable

### **3.5 Lapse of Development Permission**

A Development Permission shall mean to have lapsed:

- 1 If construction of the building is not commenced within the period stipulated in Regulation No. 6.5.2
- 2 If Building Use Permission has been granted as stipulated in Regulation No. 3.10

### **3.6 Cancellation of Development Permission**

Cancellation of a Development Permission by the Competent Authority shall mean that the Development Permission shall no longer be valid, and that the permission granted by the Competent Authority to undertake construction stands withdrawn.

The Development Permission if secured by any person by any misrepresentation or by producing false documents, such Development Permission will be treated as revoked and any fees paid for such development deemed to have been forfeited.

Following Cancellation of a Development Permission, construction may no longer be undertaken on the building unit for which the Development Permission was granted. A Notice of Cancellation of Development Permission shall be issued in writing by the Competent Authority.

### **3.7 Unauthorized Building**

Any building or development, requiring a Development Permission, undertaken without grant of Development Permission, or undertaken after the Development Permission has lapsed, or, after the Development Permission has been cancelled, revoked or suspended, shall be deemed to be an Unauthorized Building.

#### **3.7.1 Dealing with Unauthorized Building**

If the Competent Authority deems the construction of any building to be an Unauthorised Construction, it may, by a written notice, require the person undertaking construction of the building to stop the same forthwith. If the person carrying out such work or doing such thing is not the owner at the time of giving such notice, such person shall be liable for carrying out the requisitions of the Competent Authority.

In case of unauthorised development, the Competent Authority shall:

---

If within the period specified in such written notice, the requisitions contained therein are not carried out by the said person or owner, as the case may be, the Competent Authority may remove or undo such thing and the expenses thereof shall be paid by such person or owner as the case may be. The cost(s) of undertaking these measures shall be paid by the said person.

If such building is not stopped forthwith, the Competent Authority may direct the person undertaking such construction to be removed from the premises, may seal the building unit, and may cause such necessary measures including police intervention to ensure that the person does not re-enter the building unit without written permission of the Competent Authority. Permission to re-enter the building premise shall only be granted for the purpose of carrying out any work of reinstatement.

In cases where development has already started/commenced on site without obtaining Development Permission, but where this development is in accordance with these Regulations, the Competent Authority may grant Development Permission on the merits of each individual case. Such development will be considered unauthorised and over and above the Development Permission Scrutiny fees as leviable and stipulated in Schedule 3, penalty shall be charged as per Schedule 6.

### **3.8 Procedures for Obtaining, Revising and Revalidating Development Permission**

#### **3.8.1 Obtaining a Development Permission**

On receipt of a duly completed application for Development Permission, the Competent Authority shall scrutinize the application in detail before grant of Development Permission, to verify whether the design and specifications of the proposed building comply with these Regulations.

The procedure for obtaining a Development Permission is specified in Regulation No. 5.1.

#### **3.8.2 Revising a Development Permission**

Changes or revisions in the sanctioned design and specification of a building may be if a Revised Development Permission is obtained before construction is undertaken on the portion of the building that deviates from the Sanctioned Design Requirements.

If there are deviations from the sanctioned design and specification of a building during the course of construction, the owner should apply for a Revised Development Permission for the building unit or part of building unit as the case may be. The modified Design Requirements may be examined by the Competent Authority for ensuring compliance of the building to these Development Regulations. No deviations in contravention of the provisions of the act, and/or these regulations shall be permitted.

Procedures for obtaining a Revised Development Permission are specified in Regulation No. 5.2.

#### **3.8.3 Revalidating a Development Permission**

A Development Permission may be revalidated provided procedural requirements for revalidating a Development Permission are met with.

A Development Permission that may lapse due to non-commencement of work, may be revalidated for a period of one year. The revalidated period shall in no case exceed three years in the aggregate that is for a total period of four years.

The procedures for revalidating a Development Permission are specified in Regulation No. 5.3.

---

**3.9 Building Use Permission Required**

It is mandatory to obtain a Building Use Permission from the Competent Authority prior to occupancy or use being made of any building.

**3.10 Development Permission to Lapse on Grant of Building Use Permission**

A Development Permission shall lapse for a building, or for a portion of a building, for which a Building Use Permission has been granted. A Development Permission that has lapsed on account of grant of a Building Use Permission shall not be revalidated.

**3.11 Grant of Building Use Permission**

Grant of a Building Use Permission by the Competent Authority shall mean an acceptance that the construction of the building has conformed to the sanctioned design requirements and that the Owner may use the building in conformity with the Sanctioned Use of the building.

Grant of a Building Use Permission does not constitute acceptance of correctness, confirmation, approval or endorsement of and shall not bind or render the Competent Authority liable in any way in regard to:

**3.12 Revocation of Building Use Permission**

Revocation of a Building Use Permission shall mean that the Building Use Permission is no longer valid and that the Competent Authority has withdrawn the permission granted to make use of the building.

After the Revocation of a Building Use Permission, use may no longer be made of the building for which the Building Use Permission has been revoked. Notice of Revocation of a Building Use Permission shall be issued in writing.

**3.13 Unauthorized Use of Building**

Use of any building or part of a building, without a Building Use Permission or in a manner that does not conform with its Sanctioned Use or after a Building Use Permission has been revoked, shall be deemed to be Unauthorized Use of Building.

The Competent Authority may declare the use of any building to be an Unauthorized Use if it deems the building to be unsafe for habitation or if its use poses a danger to public health or safety.

**3.13.1 Dealing with Unauthorized Use of Building and Unsafe Buildings**

If the Competent Authority deems the use of any building or part of a building to be an Unauthorised Use of Building, it shall, by a written notice, communicate the reason and require the person making unauthorised use of building to stop the same. This written notice may be affixed to any part of the premise and shall be deemed a sufficient intimation to the occupier of such building or part of building.

If unauthorised use is not stopped, the Competent Authority may direct the person making such use to be removed from the building and may cause such necessary measures including police intervention to be taken to ensure that the person does not re-enter the building without written permission of the Competent Authority. The owner or occupier may be directed to restore by repairs, demolish or carry out any other modifications. The cost(s) of undertaking these measures shall be paid by the said person.

If a use of a building or part of a building is deemed to be Unauthorized Use solely on account of a Building Use Permission not having been obtained prior to use being made of the building or part of a building and if the said use of building is in conformity with Development Regulations prescribed in Section C – Planning Regulations and with Section D – Performance Regulations, the Owner may apply for a

---

Building Use Permission. Further use of building or part of a building may be undertaken after obtaining a valid Building Use Permission. Penalty for undertaking such Unauthorized Use of building or part of a building shall be payable before a Building Use Permission is granted and is stipulated in Schedule 16.

### **3.14 Procedure for Obtaining Building Use Permission**

#### **3.14.1 Building Use Permission**

The Competent Authority, on receipt of Notice of Completion of Construction and a duly completed application for Building Use Permission, shall inspect the constructed building before granting a Building Use Permission, to verify its compliance to the sanctioned design and specifications within 21 days from the date of receipt of the application.

#### **3.14.2 Permission to Change a Sanctioned Use of a Building**

No building or premises shall be changed or converted to a use other than the sanctioned use without prior permission of the Authority in writing. Change of use not in conformity with these regulations shall not be permissible.

The Sanctioned Use of a building may be changed provided that the new use complies with these regulations.

The procedure for changing the Sanctioned Use of a building or part of a building is specified in Regulation No. 7.2.

### **3.15 Relaxation**

#### **3.15.1 Grant of Relaxation**

Grant of a Relaxation shall mean grant of permission to deviate from a specific Regulation. In the case of plot owned by:

- i) Competent authority
- ii) Government
- iii) Government undertakings

The Competent Authority may for reasons to be recorded in writing relax or waive any of the regulations in the public interest. Provided that no relaxation or waive of any of the development regulations concerning maximum built-up-area on any floor, common plot, cop, marginal open space, provisions of buildings taller than 25mts, F.S.I. and parking shall be made.

Notwithstanding anything contained in foregoing regulations in case where these regulations cause hardships to the owners because of their application to the alterations not involving addition to the existing structures erected prior to the coming into force of these regulations, the competent authority after considering the merits of each individual case may relax or waive, for reasons to be recorded in writing and regulation without causing any adverse effects on the fire safety requirements for the buildings. Provided that this relaxation shall not be made in any regulations for buildings taller than 25mts.

In the case of existing building units for which the layout and sub-division may have been approved by a Competent Authority; or building units affected by road widening; and by the Development Plan proposals made in the Development Plan, if the Competent Authority is of the opinion that such building units have become incapable of reasonable development unless all or any of the requirements of Plan-

---

ning Regulations are suitably relaxed or waived the Competent Authority may, for reasons to be recorded in writing, relax the requirement of the above mentioned regulations.

No relaxation shall be made in any of the regulations meant for any building unit having height more than 25mts. Irrespective of provisions made in sub clause 27.1, 27.2 & 27.3, in case of development for religious building, e.g. temple, church, Mosque, Agiari etc. up to 0.6 or less FSI only.

Competent Authority may waive special provisions for buildings taller than 25mts with reasons to be recorded. Provided that no relaxation or waiver in any of the regulations concern in margin, parking, opens space, common plot and maximum built-up area shall be made.

### **3.15.2 Procedure for Obtaining a Relaxation**

The procedure for obtaining a Relaxation is specified in Regulation No. 8.0.

### **3.16 Development Undertaken on Behalf of Government and Appropriate Authority**

Where an appropriate authority intends to carry out development of land for its own purpose in the exercise of its powers under any law for the time being in force, such development shall be in conformity with the development plan and of the regulations relating to construction of buildings.

As per the provisions of Section 39 of the Act and Rule 15 of the Rules, the Office-in-Charge of a Government Department shall inform in writing to the Competent Authority of the intention to carry out development for its purpose along with such development or construction along with other required documents and drawings as stipulated in Schedule 21.

7. Regulations identified for Local Area Plan, when prepared for an area, shall prevail over these Regulations.

## 10.0 GAMTAL AREA

The following regulations are applicable for Gamtal areas.

### 10.1 Minimum Area of a Building Unit

- a. Minimum area of a Building Unit when subdivided shall be 40sq.mts with no side less than 3.0mts in width.
- b. In case of redevelopment construction permission shall be granted in building unit with area less than 40sq.mt.

### 10.2 Permissible Uses

#### Uses permitted as per Regulation no. 9.2.1

1. ~~The types of uses permissible on a Building Unit shall be regulated according to the area of the Building Unit as mentioned below:~~

Table 10-1 : Permissible land use in Gamtal

No.	Minimum Building Unit m <sup>2</sup>	Building Use Permission
1	40	Small Cottage Industries, Workshop for Repairing of Household Appliances, Clinic, Restaurant.
2	250	Flat, Bank, Tenement, Hotel, Religious Places, Community Hall, Nursing Home or Hospital up to 20 Bed Capacity.
3	500	Service Station and Petrol Pump.
3	750	Opera House, High School and Lodging House.

1. ~~Further the types of uses permissible on a Building Unit shall be regulated according to the Road Width as mentioned below:~~

- a. ~~For Residential with 8 or more Unit~~

- i. ~~Minimum Road width shall be 6 Mts.~~
- ii. ~~Space between two buildings shall be 3 Mts.~~
- iii. ~~Front Side and Back margin should be 3 Mts.~~

- b. ~~For Other than Residential Uses shall be permitted on road width of 9 Mts. Or more.~~

#### 10.3.1 Relaxation in Built-up and FSI

The Competent Authority shall permit the built-up and F.S.I. of any plot or a Building Unit on the basis of its original area, if the owner of such a land is prepared to release the affected land by road widening

or for construction of new road without claiming any compensation, as applicable on a case-by-case basis.

#### 10.4 Ground Coverage

In case of building unit having area 125 Sqmts or more, maximum permissible ground coverage should be 80%.

#### 10.5 Building Height

1. The maximum permissible height shall not be more than 9 m.
2. Parapet of 1.15mts shall be excluded from the height consideration. Height up to 2.4mts for the following shall not be taken in to consideration in determining the total height of building-stair-case cabin, water storage tank, parapet, lift well, lift cabin with machine room above, as per the requirements of lift inspector. Height up to 2.4 mts from beam bottom in case of Hollow Plinth shall not be considered in determining the total height.

#### 10.6 Setback and Margies

The Setback of the Building be regulated according to the width of the road on which it abuts and as under:

Table 10-3 : Setback and Margins in Gamtal Area

No.	Road Width	Setback	Margins
1	Upto 3m	0.75m	-
2	3m to 6m	1.50m	-
3	6m and less than 12m	2.50m	2.0
4	12m and less than 18m	3.50m	3.0
5	18m and Above	4.50m	6.0

Note:

1. Land available from setback will vest in road, after payment of compensation.
2. Road/Street having width less than 3mts and length more than 30mts, above Note No. 1 shall not apply.
3. In case of plot having less depth/width or become unable to develop due to this regulation shall be considered by Authority on case to case basis.

Table 10-4 : Margin for Residential and non-residential Uses other than Industrial Use

Sr. No.	Plot Area m <sup>2</sup>	Margins		
		Front	Rear	Side
1	40 to 90	2.5	1.5	1
2	91 to 200	3	2	2.5 any one side
3	201 to 500	4.5	3	3 any one side
4	501 to 1000	4.5	3	3 any one side
5	>1000	4.5	3	3.0 both side

#### 10.7 Open Space:

##### 10.7.1 Open to Sky Space:

Open space shall be provided for natural light and ventilation in conformity with the following Regulations based on the dimensions of the Building Unit and the proposed building height, whichever is higher shall be applicable.

#### **10.7.2 Regulation based on Building Unit**

##### **DIMENSIONS:**

1. For any building unit having depth 9.0mts or more from its front open space, an open to sky space of 5.6sq.mts from plinth level shall be provided for every 9mts depth. If the width of the building unit is up to 4.5mts, then size of this open to sky space shall be 3.0sq.mts with no side less than 1.5mts.
2. If the depth of the building unit does not exceed 18mts and has openings at least on two sides over a street or open to sky space of 2.4mts or more in width, then above provision shall not be applicable.

#### **10.7.4 General Requirement for the Open to Sky space**

1. Every exterior or interior, open space shall be kept free from any erection thereon and shall be kept open to sky with suitable and sufficient access.
2. No open drain except for rain water shall be constructed in any open space required by these Regulations.
3. Every such interior or exterior open air space, unless the latter is a street, shall be maintained for the benefit of such building exclusively and shall be entirely within the owner's own premises.
4. No construction work on a building shall be allowed if such work operates to reduce an open air space of any other adjoining building belonging to the same owner to an extent less than what is prescribed by any of these Regulations in force at the time of the proposed work to further reduce such open space if it is already less than what is prescribed.
5. Every open space, whether exterior or interior or a set-back provided in pursuance of any Regulation, or under an agreement lodged with the Authority shall be paved and be always kept free from any erection thereon and open to the sky, except 23cms cornice or 30cms eave or grill with opening not less than 8 X 8cms and no weather shade or other protection shall overhang or project over the said open space so as to reduce the width to less than the minimum provided under these Regulations. No open drain except for rain-water shall be free structure in any open space required by these Regulations.

#### **10.8 Common Plot**

Common Plot shall be provided based on Planning Regulation 11.9, as applicable.

#### **10.9 Parking:**

Parking spaces for vehicles shall be provided within the Building Unit for every new Building and /or extension in existing building constructed for the first use and /or when the use of old building is changed to any of the uses mentioned in Planning Regulation 11.10.

Note: For Building Unit with area less than 60sq.mts for residential use, parking shall not be required.

#### **10.10 Basement:**

1. One level of basement may be provided with adequate structural safety during construction such as shoring and strutting and as per Performance Regulation 23.0
  2. Road side margin of 4.5mts shall be provided.
  3. Other than road side margins of 3.0mts shall have to be kept from adjoining property/ boundary for construction of basement.
  4. Basement shall be allowed for parking only if the area of Building Unit is more than 500sq.mts.
-

**10.11 Addition to Existing Structure:**

1. The addition shall comply with the Regulations for construction of a new building.
2. For detached and semi-detached dwelling units, extension/additions shall be allowed based on the permissible FSI, new margin requirements shall not be enforced. Any such extension/addition shall conform to these Regulations.
3. For all other Buildings, additions/extensions shall be allowed in conformity with these Regulations including minimum margin requirements under these Development Regulations.

**11.0 OTHER THAN GAMTAL**

The following regulations are applicable for the following zones: Residential 1&2, Commercial, Transit Oriented Zone, Institutional Zone/Public Purpose and Industrial.

**11.1 Permissible Use**

The specific type of building use permissible on a Building Unit shall be regulated by the road width it abuts on and the area of the Building Unit.

**11.1.1 Permissible Uses by area of Building Unit**

1. The types of uses permissible in a Building Unit shall be regulated according to the area of Building Unit as under:

Table 11-1 : Permissible Use by Road in other than Gamtal Area

No.	Minimum Area Sq. Mts.	Building Uses Permissible
1	200	Twin Residential Units, Flour Mill
2	300	Workshop, Dispensary, Post Office, Bank, Maternity Home, Hall, Hotel & Restaurant, Infant School
3	350	Community Hall & Shopping Centre
3(A)	400	Low Rise Tenements, Apartments Only For Vallabh vidhyanagar
4	500	Low Rise Tenements, Apartment
5	1000	Primary School, Kg School, Motor Garage, Petrol pump With or Without Service Station
6	1200	Hotels
7	1500 and Above	Row House, Tenements, High School, Cinema Theater, Factory Mill ( In case of mill or Factory can be constructed on 50% of the area)

\* Note \_ - Building unit required as per building uses.

**11.1.2 Permissible Uses by Road width**

1. The types of uses permissible in a Building Unit shall be regulated according to the width of the road on which it abuts as under:

Table 11-2 : Permissible Use by Road in other than Gamtal Area

No.	Building Uses Permissible	Required minimum Road Width m
1	Primary Schools	6.0 to 12
2	Residential Building with 8 or more Dwelling Units	7.5
3	Business Centre, Restaurant, Hospital, Nursing Home, Post Office, Bank, Showroom and Low Rise Building	9.0

3.A	Business Centre, Restaurant, Hospital, Nursing Home, Post Office, Bank, Showroom	12.0
4	Cinema, Theater, Petrol pump With or Without Service Station	18.0

### 11.2 Restriction of Construction Activity in vicinity of certain area.

1. No Construction activity shall be allowed in the bed of water bodies like river, or nala, and in the Full Tank Level (FTL) of any lake, pond. Water tanks and water course.
2. The above water bodies and courses shall be maintained as recreational / Green buffer zone, and no building activity other than recreational use shall be carried out within
3. No Construction will be permitted in 100 meters from the River edge.
4. 30 meters distance of building construction from the boundary of Lakes of area 10 Ha and above and 9 meters from the boundary of lakes of area less than 10 Ha. This may be developed as Green Buffer/recreational area.
5. 15 meters distance of building construction from the boundaries of major Canal. This may be developed as Green Buffer/recreational area.
6. 6 meters distance of building construction from the defined boundary of Nalas, Storm water drains, etc.
7. In case of sites in vicinity of High Tension Electricity transmission lines besides taking other safety precautions, clearance distance and other stipulation of the respective authority shall be complied with.
8. In case of sites in the vicinity of National Highway and State Highway, clearance distance and other stipulations of the respective authority shall be complied with.
9. In case of sites in the vicinity of oil/gas pipelines, clearance distance and other stipulations of the respective authority shall be complied with.
10. Distance shall be maintained between Railway boundary and building line in accordance with the Railway Manual.
11. The above greenery/landscaping and development shall conform to the guidelines.

### 11.3 Development of Land

#### 11.3.1 Approach Road to Plot

1. In Case of More than two internal road and Subdivision of the building unit, and required two or more than two approach road, distance between the two approach road should be minimum 45mts.
2. No approach road should be allowed on the junction. If the adjacent road width is equal or more than 12mts, the approach Road shall be located at a minimum distance of 15mts. from the corner of the building unit at the junction. If the length of the road side edge is less than 15mts, the approach road shall be provided at the farthest end from the junction.

#### 11.3.2 Internal Roads

The width of the internal roads in a layout for Residential and other than Residential

Uses shall be regulated as under:

Table 11-3 : Minimum width of the Road required

No.	Length of Road (meters)	Width of road for Residential Use (m)	Width of road for Non-Residential Use (m)
1	Up to 150m	7.5	9.0
2	Above 150m and up to 300m	9.0	12.0
3	Above 300m and up to 450m	10.5	15.0
4	Above 450m	12.0	18.0

\* Note : In T.P. Scheme No. Anand 1 to 7 Internal Road should be as per sanctioned DCR of TPS.

### 11.3.3 General Requirements for Internal Roads

1. The Internal Road shall be provided up to common entrance and all staircases of each individual building.
2. Internal road width shall be measured in length from the point of its origin to the next wider road it meets.
3. In the case of a land-locked plot, which is surrounded on all sides by other plots with no access to any street or road, the Competent Authority may enforce access through any adjoining plots or plot which shall be nearest to the street or roads to the land locked plots, at the cost of owner of the land lock plot and such other conditions as may be prescribed by the Competent Authority.
4. Where there is no town planning scheme, for a building unit abutting on a Government Nalia Road, the right of way/plot boundary shall be considered as minimum 9.0mts from the centre line of such Nalia Road. Margin of 6.0mts shall be considered from this imaginary plot boundary thus established, as the case may be, and prescribed by the Competent Authority.

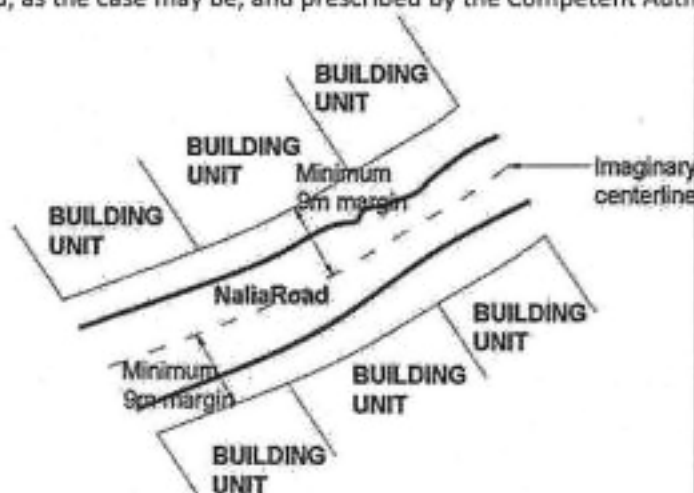

Figure 11-1:- Shows Margins From Nalia road

5. In cases where the road is in continuation with any private road in the adjoining estate or any public road continuous to the estate, the length of the adjoining road of the public road shall be added to the length of the internal road for the purpose of determining the width of such road.
6. Curves at the junction: The curves shall be provided at the junction of roads as prescribed below:

Table 11-4 : Regulation for Culdisceck on the Road

Width of the road in meters	Radius of road curvature for Non-Residential Use (mts)
7.5 or less	4.5
More than 7.5 and up to 18	6.0
More than 18	7.5

Note: The width of the wider road shall be taken into consideration in determining the radius of the curvature at the junction of roads of different widths.

1. The shape of the plots and the junction of the roads, at the corners shall be designed as directed by the Competent Authority.
2. The alignment of the internal road or roads shall be regulated to be in continuation of the public or private roads continuous to the applicant's Building Unit; but in case of termination of an internal road or roads; a turning circle with diameter of 13.5mts or 12mts. x 6 mts. turning "T" shall be required at the cul-de-sac.
3. The Development Permission shall be regulated as per the proposed road network by the Appropriate Authority in the areas except T.P. scheme area and Agricultural Zone.

#### 11.3.4 Amalgamation and Subdivision of Building Unit

The owner or developer shall be required to get the land approved by the Competent Authority as 'Building Unit' or 'Building Units' before amalgamation or subdivision of the land. Development Permission shall not be granted without fulfillment of this requirement.

#### 11.3.5 Amalgamation and Subdivision of Building Unit with Existing Structures

In the case of building units with existing buildings, its sub-division or amalgamation shall not be approved unless it fulfils all the requirements under these Regulations.

#### 11.3.6 Layout for Amalgamation and /or Subdivision of Building Unit

1. In case of subdivision, the depth of Building Unit shall not exceed twice the width of the proposed Building Unit fronting on the road. However, this condition of ratio will not be applicable if the length of the smaller side of the subdivided Building Unit is equal or more than 10.50mts.
2. Amalgamation of Building Unit abutting on a road with width equal or more than 18.00 mts, shall be permitted if depth of the building unit shall not exceed three times the frontage of the building unit abutting on road.
3. In the cases of building units with existing building, its sub-division or amalgamation shall not be approved unless it fulfils all the requirements under these Regulations.

Figure 11-2:- Shows minimum dimension of Building Unit

**11.3.7 Area and Dimension of a Building Unit**

1. Minimum area of a Building unit shall be 100sq.mts.
2. The ratio of width to the depth of the Building Unit shall not be more than 3.
3. The above condition of the ratio is not applicable if the smallest side of the Building unit is 10.5mts or more in length.
4. For Building unit of 250 Sq Mts. or less, No sides shall be less than 9mts.
5. Building unit of 250 Sq Mts. or less shall not be allowed to develop on road width of 18 Mts. or more.
6. Appropriate Slab culvert must be given on approach road in case of open drain passing in front of the building unit.

**11.3.8 Development on kabrastan, burial ground etc.**

The land occupied by the graveyards, kabrastans, burial grounds, crematoria and allied actions which are marked with green verge in the Development Plan shall not be allowed to be built upon and shall be kept permanently open.

**11.4 Floor Space Index (FSI)****11.4.1 Permissible Floor Space Index (FSI)**

1. The maximum permissible FSI shall be regulated as per Planning Regulation 9.2.
2. Area covered by Atrium shall not be counted towards computation of FSI.

**11.4.2 Relaxation in Floor Space Index (FSI)**

In case of building units affected by road widening or construction of new road, the owner may claim compensation or FSI from the Competent Authority for the surrendered land. In case of FSI, the Competent Authority shall permit the FSI of any such land / plot or Building Unit on the basis of the original boundary of the Building Unit. This is subject to conformity with all other requirements mentioned in these Regulations as per the new boundary.

**11.5 Building Height****11.5.1 Maximum Permissible Height**

1. The Maximum Permissible Building Height shall be regulated according to the width of the road on which it abuts and as prescribed below:

Sr.No.	Road Width	Permissible Height
1	9.00 to 18 mt	16.5 mt
2	18 mt and above	Up to 30.00 mt

2. The height of Building shall be measured from the Ground level of the Building unit to the top of the building.
3. Parapet of 1.15mts shall be excluded from the height consideration. Height up to 2.4mts for the following shall not be taken in to consideration in determining the total height of building-stair-case cabin, water storage tank, parapet, lift well, lift cabin with machine room above, as per the requirements of lift inspector.

4. At the time of permitting the height and use for development of building units along the over-bridge or under-bridge, total width of the DP/TP Road shall be considered.
5. For high rise building minimum plot area required shall be 1500sqmt or more.

### 11.6 Margins

#### 11.6.1 Margins for Residential and Non-Residential Uses other than Industrial Use

Table 11-5 : Margins for Residential and Non-Residential Uses other than Industrial Use

Sr.No.	Plot Area m <sup>2</sup>	Margins

No.-	Building Height-	Required Margins (in meters)-
1-	Low-Rise	3.0-
2-	High-Rise	6.0-

**11.6.3 Margins for Industrial Buildings**

Clear minimum margin along the periphery of the Building Unit and the clear minimum distance between two detached structures shall be as stated below:

1. For Building Unit with area up to 1500 sq.mts ~~6mts from all side~~ 1000 sq.mts 4.5 from all side.
2. For Building Unit with area more than 1500 sq.mts ~~10mts from all side~~ 1000 sq.mts 6.0 from all side.

**11.6.4 Permissible Use in Margins**

1. Ancillary uses such as parking garage, servant quarter, w.c. and bathroom shall be permitted in detached or semi-detached Residential Building Unit (Excludes apartments /tenements) subject to the following conditions:
  - a) Such construction shall be considered as a part of the permissible FSI of the Building Unit
  - b) Such construction shall be allowed in either one corner of the rear marginal space. This construction shall in no case cover more than half the length of the side.
  - c) Maximum permissible ground coverage of such construction shall be 10.0 sq.mts
  - d) Maximum permissible height for such construction shall be 3.0 mts from the level of the Building Unit
1. Doors, windows or projections shall not be permitted along the common wall of the adjoining property. No rainwater from the roof shall be drained in the adjoining property.
2. Partition wall shall not be allowed in the margins except on common boundary of semi-detached building and along the Building Unit boundary up to a maximum height of 1.5mts.
3. Underground water tank, percolation well, surface water tank up to 1.5mts in height from ground level, bore well and pump room with a maximum size of 1.5mts X 1.5mts and with a maximum height of 1.8mts for detached and semi-detached residential use only.
4. Electrical substation transformer room, Box-type transformer, meter room according to the norms of the Competent Electric Company shall be permitted in other than Road margin of the building unit.
5. For Building Units for all uses other than Industrial and Institutional Use, a structure for security cabin of maximum dimensions of 2.0mts x 2.0mts with maximum height of 2.4mts shall be permitted in the front margin. The area of such construction shall be counted towards computation of FSI.
6. For Industrial and Institutional use, a security cabin structure up to a maximum Ground Coverage area of 10sq.mts with maximum height of 2.4mts shall be permitted in the front margin. Such a structure shall be at a minimum distance of 4.5mts from the Building. The area of such construction shall be counted towards computation of FSI.
7. In any marginal open space, weather sheds sun breakers horizontal or vertical projections shall be permitted up to 0.60mts. These projections may also be part of the façade articulation at various levels, but shall in no cases be at the floor level such that they become a part of the ha-

bitable space. Such projects shall not be allowed at the ground level only above a height of 2.4m from the ground level.

8. In case of detached and semi-detached dwelling unit-a 1.00m wide, open, cantilever stair with maximum 2.00m landing space at floor level shall be permitted except in road side margin.

#### 11.6.5 Restricted Use in Margins

1. The marginal open spaces as required shall be kept permanently open to sky.
2. This space shall not be used for stocking materials or loose articles for the purpose of trade or otherwise, putting up fixed or movable platforms.
3. The sunk in lower ground floor or basement provided for the purpose of light/ ventilation shall not be permitted in the marginal open space.
4. No difference shall be permitted in the ground level of the marginal space of the building (in cases where the permitted margin of the basement is lesser than the permitted margin of the super structure).

#### 11.7 Permissible Ground Coverage

##### 11.7.1 Ground Coverage for Residential Buildings

Table 11-7 : Permissible Ground Coverage for Residential Buildings

No.	Plot Area	Maximum Ground Coverage
1	50 to 90	60%
2	91 to 200	50%
3	> 200	45%

Note: for High Rise Building Maximum Permissible Ground Coverage – 40%

##### 11.7.2 Permissible Ground Coverage for Commercial and Industrial Buildings

1. For Commercial buildings, Ground coverage will be 40% permitted.
2. For Industrial building Ground coverage will be 50% permitted.

#### 11.8 Internal Open to sky space (Duct) for Light and Ventilation

The minimum area and width of any interior open space used for light or ventilation of the rooms shall be as per table:

Table 11-8 : Internal Open Space

No.	Height of Buildings In Meter	Size of Ventilation Shaft in Square Meter	Minimum one side of Shaft In meter
1	Up to 12	2.8	1.2
2	More than 12 up to 18	4.0	1.5
3	More than 18 up to 24	5.4	1.8
4	More than 24 up to 30	8.0	2.4
5	Above 30	9.0	3.0

**11.9 Common Plot****11.9.1 Minimum Area of Common Plot**

Common Plot to be provided based on the uses of Building Unit as stated in the following Regulations:

Table: CommonPlot

No.	Use	Area of the Building Unit	Minimum Required Area of Common Plot	Minimum Area for one Common open Plot (sq.mts)	Minimum Side of the all Plot in meter
1	Residential	<del>More than 1500sq.mts</del> More than 2000 sq.mts	10% of the area of Building Unit or 200sq mts which ever is more.	<del>350</del> 200 for Building unit less than 3500 sq.mts.	<del>12</del> 10.5
2	Commercial	<del>More than 665sq.mts</del> More than 2000 sq.mts	<del>30% of the area of Building Unit.</del> 10% of the area of Building Unit Min. 250 sq.mts	500	15 10.5
3	Mix Use (Residential and Commercial)	<del>More than 665sq.mts</del> More than 1500 sq.mts	<del>30% of the area of Building Unit.</del> 10% of the area of Building Unit or 250 sq mts which ever is more.	500	15 10.5
4	Industrial	More than 5000sq.mts and up to 20,000sq.mts	8% of the area of Building Unit or 400 sq mts which ever is more.		12
		20,000 sq.mts and above	1,600 sq.mts +6 %of the area exceeding 20,000 sq.mts		12
5	Other than Residential, Commercial and Industrial	2,000 sq.mts or more	20 %-10% of the Building Unit Area	<del>350</del> 250	12
6	For All Uses	More than 10,000sq.mts	Additional 10 % as per Regulation 11.9.2.107	<del>350</del> 250	12

**11.9.2 General Requirements for Common Plot**

1. The Common Plot area shall be exclusive of approaches and Road Side margin.
2. The area of the Common Plot shall not be deducted for consideration of the FSI of a Building Unit.
3. No construction is permissible in the Common Plot except Electric substation, over and underground water tank and pump room, security cabin, community/ Society common amenities shall be allowed to be constructed in the Common Plot subject to the following requirements:

- a. Maximum Ground Coverage of 15% of the respective Common Plot.
  - b. Maximum Height of construction shall be 7.5mts from the level of the Building Unit except in the case of overhead water tank, where more height may be permitted.
  - c. Community/ Society common facility shall be permitted only on a Common Plot having a minimum area of 500sq.mts or more with an internal approach road of minimum width of 7.5mts. The area of this Community/Society common facility shall be considered towards computation of FSI of the Building Unit.
  - d. Such a building shall be required to maintain the minimum margin requirements between buildings with respect the adjacent buildings as per Regulation 11.6.6.
4. In cases where layout or subdivision of Building Unit is sanctioned with provision of required Common Plot, Common Plot shall not be insisted in case of sub division of such sub divided new building unit and / or amalgamation of such sub plots and / or further development of such sub divided new building unit irrespective of its area.
  5. The Owner shall be required to give an undertaking that the Common Plot shall be used exclusively for the residents / occupants of the Building unit. On sanction of the Development Permission, the Common Plot shall deem to have vested in the society/ association of the residents/ occupants. The Common Plot shall not be sold to any other person.
  6. 30 percentage of the common open plot should be left permeable and not permitted to covered by pavers block or any hard material.
  7. For a Building Unit having area of 10,000sq.mts or more an additional 6% area of the Building Unit shall be provided for thick plantation. This area shall be exclusive of the margins and common plot. The area demarcated for this shall have a minimum dimension of 1.5mts The types of trees shall be selected such that they are shade giving trees.
  8. Common Plot shall not be allowed within Atrium.

#### 11.10 Parking

Parking spaces for vehicles shall be provided within the Building Unit for every new Building and /or extension in existing building constructed for the first use and /or when the use of old building is changed to any of the uses mentioned in the table below:

No.	Type of Use	Minimum Parking Required	Visitor's Parking and Remarks
1	Residential Building-Detached/ Semi Detached/ Plotted Development	(a) 1 car parking – for more than 125 sq.mts and up to 300 sq.mts of Total Utilised FSI area. Additional 1 car parking for every 100sq.mts additional FSI area.	10%, of the required parking space as mentioned in (a)&(b) shall be provided as Visitors parking
	Flats / Apartments	(b) 20% of Total Permissible FSI	
2	Residential Mixed Use (Residential + Commercial)	(c) for respective Residential use-parking shall be provided as above (a) or (b) as the case may be (d) for respective Commercial use-parking shall be provided 50% of used Total Utilised FSI	10% of Residential parking requirement (c) and 20% of the Commercial parking in (d) shall be provided as Visitors parking.
3	Assembly Building	50% of Total Utilised FSI	20% of the required parking shall be provided as visitors parking
3a	Assembly-Stadium	1sq.mts per person of the Total stadium capacity	

4	Mercantile, Business, Religious & Institutional Buildings	50% of Total Utilised FSI	In case of Hospitals and nursing homes, additional parking of Ambulance shall be provided at the ground level. 20% of the required parking shall be provided as visitors parking
5	Industrial, Storage, High Hazard Buildings	10% of the Total Utilised FSI	Nil
6	Educational	(a) Primary Schools – 25% of the Total Utilised FSI (b) Secondary & Higher Secondary Schools – 40% of the Total Utilised FSI (c) Colleges and coaching classes – 40% of the Total Utilised FSI	Facility for drop-off and pickup shall be provided within the premise. 10% of the required parking shall be provided as visitors parking

Note: In case the maximum permissible FSI is not utilised, for any extension/additions in the future, additional parking shall have to be provided as required for this additional utilised FSI.

#### 11.10.1 General Requirements for Parking

1. Parking requirement for a Mixed Use development shall be calculated on prorated basis of the FSI consumed specific to the different uses.
2. In cases where more parking space is requested, the Competent Authority may grant the permission for providing parking in basement or at upper floors with specific conditions.
3. Parking as Visitors parking shall be provided at the ground level only.
4. 50% of all required parking shall be provided for cars.
5. Parking layouts and minimum size requirements shall be provided as prescribed in Section D: Performance Regulation No. 20.2.
6. In cases where misuse of parking space is noticed, the use of the entire building shall be discontinued by the Competent Authority. Building use shall be permitted only after the required parking spaces are provided. High penalty shall be levied considering the period of misuse of the parking space and the benefit derived out of misuse as decided by the Competent Authority from time to time.
7. For multi-level parking, a ramp shall be necessary.
8. Parking shall not be allowed within or at Atrium level.

#### 11.11 Basement

In a Building Unit, the Basement shall be permitted on the following conditions:

##### 11.11.1 Margins

No Basement shall be permitted in the required Road side marginal space. However, the margins for the side and rear margins shall be 3.0mts from the Building Unit/Plot boundary. Basement shall be permitted under common plot, internal road and internal marginal space for exclusive use of parking only.

##### 11.11.2 Extent

1. Basement shall not be allowed for the purpose of parking for Building Units with area less than 600 sq.mts.

- Basement may be provided in one level or more. The Competent Authority may permit a multi-level basement if the parking space available at ground level and in first basement (basement level-1) is not sufficient, for reasons stated in writing by applicant.

#### 11.11.3 Height

Maximum Height of the Basement shall be 3.8mts from finished basement floor level to finished upper level and minimum height shall be 2.8mts.

#### 11.11.4 Use

Permitted uses in Basement are: parking, safe deposit vault, A.C. Plant, storage other than inflammable material, MRI or X-Ray room in hospital, Sewage Treatment Plant. No habitable use shall be permitted in the basement.

- Any use other than parking is permitted only in basement level-1 up to a maximum area of 15% of the total ground coverage of the basement floor. This non-parking area shall be calculated towards the computation of FSI.

#### 11.11.5 Services

No water connection or drainage connection shall be permitted in the Basement. In no case shall a connection with normal drainage line be provided in the Basement.

#### 11.12 Addition to Existing Structure:

- The addition shall comply with the Regulations for construction of a new building.
- For approved, individual, existing, detached and semi-detached dwelling units, permissible upper floors may be permitted as per sanctioned margins, staircase and projections.

#### 11.13 Development of Building Unit in Existing Chawls

Subject to the following conditions, owners of individual rooms of existing authorized chawls may be permitted to make alterations or to construct additional floors:

- Additional Ground coverage area on ground floor shall not be permitted.
- Subject to other Regulations, owners of individual rooms may construct two additional floors over the ground floor.
- While permitting first floor or the second floor, no objection shall be taken regarding F.S.I., built-up area and number of tenements in regard to the existing ground floor constructions.
- Individual owners shall have to provide water closet and bathrooms.

#### 11.14 Development on Open Space Plots

- 20% of the "Open Space Plots" provided under TP Schemes may be utilised for the construction with required margins for the common/institutional/community use with basement, ground floor or a floor on Hollow Ground Floor.

2. In case the building is on Hollow Ground Floor, in addition to the stair cabins and ramps, 5% of the total permissible built-up area of this plot shall be allowed to be built-upon for the construction for store room, watchman's cabin, toilet etc. at the ground level. The rest of the "Open Space Plot" shall be left to open to sky.

## **12.0 SPECIAL PLANNING AREA**

### **12.1 Special Commercial and Knowledge Node (Special Zone-I)**

#### **Knowledge and Institutional Zone (KZ)**

Local Area Plan, including measures for road widening, parking management and pedestrianization, shall be prepared for this Zone.

##### **12.1.1 Permissible Uses**

The types of uses permissible in a Building Unit shall be: Residential-4&5, Assembly-1,2, Institutional - 1, Mercantile-1,2&3, Storage, Parks, Transport, Hospitality, Sports and Leisure, Temporary Use

##### **12.1.2 Development of Land**

As per provisions of Planning Regulation 11.3

##### **12.1.3 Minimum Building Unit**

The Minimum Building Unit shall be 3500sq.mts.

##### **12.1.4 Floor Space Index (FSI)**

1. Base FSI shall be available as per Zoning Table in Planning Regulation 9.2. Additional FSI shall have to be purchased by payment to the Competent Authority as time to time decided by the Competent Authority.

##### **12.1.5 Maximum Permissible Height**

Maximum height of the building should be 30m in this zone, The competent Authority may give leave on this regards on case to case basis.

##### **12.1.6 Margins**

As per provisions of Planning Regulation 11.6

##### **12.1.7 Permissible Ground Coverage**

Entire Area available after providing for the required margins, Common plot and other Regulations may be utilized for construction of the super structure subject to maximum 45%.

##### **12.1.8 Internal Open Space**

As per provisions of Planning Regulation 11.8

##### **12.1.9 Common Plot**

As per provisions of Planning Regulation 11.9

##### **12.1.10 Parking**

As per provisions of Planning Regulation 11.10

##### **12.1.11 Basement**

---

As per provisions of Planning Regulation 11.11

## **12.2 Special Zone - II**

### **12.2.1 Permissible Uses-**

The types of uses permissible in a Building Unit shall be: Residential 1, 2, 3 & 5, Assembly 1, 2, 3, 4, 5, Institutional 1, Mercantile 1, Parks, Transport, Hospitality, Sports.

### **12.2.2 Development of Land-**

As per provisions of Planning Regulation 11.3

### **12.2.3 Minimum Building Unit-**

The Minimum Building Unit shall be as per Planning regulation 11.

### **12.2.4 Floor Space Index (FSI)-**

1. The Maximum Permissible FSI of a Building Unit shall be 1.2. Regulation 9.2

### **12.2.5 Maximum Permissible Height-**

Maximum Permissible Building Height should be 16.5.

### **12.2.6 Margins-**

As per provisions of Planning Regulation 11.6

### **12.2.7 Permissible Ground Coverage-**

Entire Area available after providing for the required margins, Common plot and other Regulations may be utilized for construction of the super-structure.

### **12.2.8 Internal Open Space-**

As per provisions of Planning Regulation 11.8

### **12.2.9 Common Plot-**

As per provisions of Planning Regulation 11.9

### **12.2.10 Parking-**

As per provisions of Planning Regulation 11.10

### **12.2.11 Basement-**

As per provisions of Planning Regulation 11.11

---

**12.3 Student Housing and Educational Zone (Special Zone - III)**  
**Residential- Affordable Housing Zone (RAH)****12.3.1 Permissible Uses**

The types of uses permissible in a Building Unit shall be: Residential-1, 2, 3&5, Assembly-1,2,3, 4, 5, Institutional, Mercantile, Parks, Transport, Hospitality, Sports.

**12.3.2 Development of Land**

As per provisions of Planning Regulation 11.3

**12.3.3 Minimum Building Unit**

The Minimum Building Unit shall be as per Planning regulation 11.

**12.3.4 Floor Space Index (FSI)**

1. The Maximum Permissible FSI of a Building Unit shall be 1.2. Regulation 9.2

**12.3.5 Maximum Permissible Height**

There is no restriction on the Maximum Permissible Building Height subject to clearance from the Airport Authority.

**12.3.6 Margins**

As per provisions of Planning Regulation 11.6

**12.3.7 Permissible Ground Coverage**

Entire Area available after providing for the required margins, Common plot and other Regulations may be utilized for construction of the super structure.

**12.3.8 Internal Open Space**

As per provisions of Planning Regulation 11.8

**12.3.9 Common Plot**

As per provisions of Planning Regulation 11.9

**12.3.10 Parking**

As per provisions of Planning Regulation 11.10

**12.3.11 Basement**

As per provisions of Planning Regulation 11.11

---

**13.0 Agricultural Zone**

As per provisions of Planning Regulation 11.11-

**13.1—For General Agriculture Zone****13.1.1—Margins**

Margins shall be applicable as per Planning Regulation 11.6 and at a distance as specified in Performance Regulation 27.0 in case of water body.

**14.1.2—Permissible Uses, FSI, Ground Coverage and Maximum Permissible Height**

Table: General permission

No.	Permissible Use	FSI	Ground Coverage	Maximum Permissible Building Height	Remarks
1-	Farmer's House*	0.1	5%	8mts	Single Building shall only be permitted. Minimum Area of any block no./ survey no./ Hissa no. shall be 4000 sq.mts No sub-division of land shall be allowed.
2-	Agro-based Uses	0.0 5-	5%	15mts	No sub-division of land shall be allowed.
3-	Poultry Farm	0.2 5-	25%	10mts	The height shall be counted from the ground level up to the ridge level of the roof. No sub-division of land shall be allowed.
4-	Religious, Educational, Hospital, Slaughter House, Cold Storage, Transport-related activities and Truck Terminal, Govt/Semi Govt/FCI Godowns and Warehouses, Development Activities related to Tourism approved by Govt. Tourism Dept.	0.4 5-	15%	15mts	No sub-division of land shall be allowed.

\* Land owner who is constructing the house for own residential purposes.

Agro-based Industries such as Poultry Farm, Cold Storages, Ware Houses, Pulse Mill, Flour Mill etc. shall be permissible in building unit having access with Pakka road. It shall not be in building unit abutting to State Highways, National Highways and Ring Road.

**13.1.1 Minimum Area of a Building-unit**

1. Minimum Area of any block no./ survey no./ Hissa no./ FP no. for one farm house shall be 4000 sq.mts
2. No sub-division of land shall be permitted.

**13.1.2 Margins**

1. Road-side Margin shall be minimum 30mts from the boundary of Building-unit.

2. Side and Rear Margins shall be applicable as per Planning Regulation 13.6.
3. Minimum distance from any water body shall be maintained as specified in Performance Regulation 27.1.

**13.1.3 Margins**

Common Plot is not required for Building-units in General Agriculture Zone.

**13.1.4 Permissible Uses, FSI, Ground Coverage and Maximum Permissible Height**

No.	Permissible Use	FSI	Ground Coverage	Maximum Permissible Building Height	Remarks
1.	Dwelling-1	0.1	5%	8mts	1. Only one farm house per Building-unit shall be permitted. 2. Minimum Area of any block no./ survey no. / Hissa no. / FP no. shall be 4000 sq.mts
2.	Agriculture-1 & 2, Sports & Leisure, Parks, Assembly-4	0.1	5%	15mts	Minimum area any block/survey no./Hissa No./ FP No. shall be 5000 sqmtr. Except Public utility & public Institutions.
3.	Religious, Educational1&2, Institutional, Agriculture-3, Industrial3, Transport, Storage, Public Utility, Public Institutional	0.45	15%	15mts	Minimum area any block/survey no./Hissa No./ FP No. shall be 5000 sqmtr. Except Public Utility & Public Institutions

## 14.0 FUELLING STATIONS

Building Units for use as Fuelling Stations shall comply with Petroleum Rules 1976 under the Petroleum Act 1934.

### 14.1 Area and Frontage

1. The minimum area and frontage of a Building Unit for a Fuelling Station or Fuelling cum Service Station shall be as follows:

Table: Minimum Area of Building unit and mFront Margin

No.	Fuelling Station Type	Minimum Area of Building Unit	Minimum Frontage on Road Side
1	Fuelling Station (without Service Station)	1000sq.mts	30mts
2	Fuelling with Service Station	2000sq.mts	30mts

### 14.2 Location

1. Fuelling Station shall be permitted only on Road width of 18mts and more in any Zone.
2. The location of Fuelling Station or Fuelling with Service Station shall be at a distance of 50mt, away from the junction of two or more roads. The minimum distance shall be computed from the boundary line of the Building Unit to the edge of the road as indicated in the illustration.
3. In the case the Station is provided along a main road which has a service road or a marginal access road, the access to the Station should be provided from the service road or the marginal access road and not from the main road.

### 14.3 Ground Coverage

Maximum Allowable Ground Coverage for Fuelling Station and Fuelling with Service Stations shall be 45% of the Building Unit including the area of the canopy.

### 14.4 Margins

#### 14.4.1 For Fuelling Station:

1. Road side margin from canopy to the plot boundary shall be as per Planning Regulation 13.6.1 subject to minimum 6.0mts. On all other sides, margin from canopy to the plot boundary shall be 4.5mts and 6.0mts in the case of canopy having height up to 6.0mts and more than 6.0mts from ground level respectively.
2. Marginal distance from curb site (Fuelling Pedestal) to the plot boundary towards main road shall be minimum 9.0mts and for other sides of the plot, it shall be 6.0mts.
3. Administrative building for the petrol pump shall have minimum margin of 3.0mts on other than road side and as per Planning Regulation 11.6.3. Zero margins can be provided towards canopy but minimum 6.0mts clear drive way shall be provided to any curb site.

4. Minimum 6.0mts clear drive way shall be maintained between every curb site (fuelling pedestal).
5. Minimum width of access road shall be 6.0mts.

#### 14.4.2 For Fuelling Station with Service Station:

1. Road side margin form canopy to the plot boundary shall be as per Planning Regulation no 13.6.1 subject to minimum 6.0mts and all other sides shall be 6.0mts. Provision of above (2) and (4) in Planning Regulation 16.3.1 will remain the same.
2. While building of service station can have zero margins towards canopy, subject to minimum 6.0mts towards road side and 3.0mts towards other sides of the plot.
3. Clear 6.0mts drive way between curb site (Fuelling pedestal) and service station building shall be provided.
4. Minimum width of access road shall be 6.0mts.

#### 14.5 Height

The maximum allowable height shall be 7.5mts.

#### 14.6 Floor Space Index

Subject to other Regulations

#### 14.7 Common Plot

Common Plot shall not be required

#### 14.8 Parking

Every Fuelling Station and Fuelling with Service Station should provide minimum parking spaces on the basis of the Building Unit Area as stated in the table below:

Table: Parking Requirement

No.	Fuelling Station/ with Service Station	Minimum Parking Requirement
1	Fuelling Station up to 1000sq.mts	3 cars and 5 two-wheelers
2	Fuelling Station more than 1000sq.mts	For every 500 sq.mts more than 1000sq.mts, additional parking for 1car and 2 two-wheelers shall be required.

#### 14.9 Basement

No basement shall be allowed.

### 15.0 ADVERTISING DISPLAY & COMMUNICATION INFRASTRUCTURE

Permission shall be required for any nature of outdoor Advertising Display Infrastructure or Communication Infrastructure as per Schedule 18. This is applicable for but not limited to Billboards with Liquid Crystal Display Board (LCD) Light emitting diodes (LED), Kiosks, Wall Signs, Glass display, Vehicles (non-mechanical and mechanical etc.)

#### 15.1 Advertising Display Infrastructure:

##### 15.1.1 Billboards in Marginal Space

1. One Billboard is permitted in the marginal open space up to 500sq.mts area of the Building Unit, up to a maximum of two Billboards per Building Unit.
2. The Billboards shall be permitted in the marginal space of the Building Unit as under:
3. Parallel to Road: NOC shall be required from the affected Owner / Occupants of the rear side of the Billboard.

4. Perpendicular to the Road: NOC shall be required from the adjoining Owner of the adjacent Building Unit.
5. Lighting may extend beyond the stipulated maximum height of for the billboards erected on ground.

Table: Regulation for Billboard

Location	Road Width	Max. Billboard Size	Margin			Min. Ground Clearance	Max. Height
			Road Side	Between Building & Billboard	Between two Billboards		
Parallel to the Road	18.0mts and More	6.0mts x 3.0mts (WxH)	1.5mts	4.5mts (AV-KUDA area) 3.0mts (ULB area)	4.5mts	3.0mts	7.0mts
Perpendicular to the Road	18mts and less than 30mts	9.0mts x 4.5mts	1.5mts	3.0mts	4.5mts	3.0mts	10.0 mts
	30mts and above	27.0mts x 6.0mts	1.5mts	3.0mts	4.5mts		

**15.1.2 Billboards on Roof tops / Terrace**

1. On Roof Tops: Maximum permissible height, 9mts, of the Billboard shall be considered over and above the permissible height of the Building.
2. No Roof top Billboards shall extend beyond the Building line of the building on which it is erected, nor shall it extend beyond the roof in any direction.
3. Lighting may extend beyond the stipulated maximum height of for such billboards
4. Before Installing Billboard more than 2mts X 2mts Structural stability certificate from structural Engineer should be submitted to the Authority with the height from the ground to the topmost part of the billboard and dimension and design of the billboard with dimensions.

**15.1.3 Billboards on Public Roads**

1. The Billboards on Public Roads shall be regulated as under:
2. Any Video Display Billboard shall be located at a minimum distance of 50.0 mts from the intersection of two or more roads. This distance shall be calculated from the corner of the road, starting from the end of the curvature up to 50 mts.

**15.1.4 Billboards on Walls**

1. Such Billboards shall be regulated as under: The total area of the sign shall not exceed 25 percent of the total area of the facade on which the sign is erected. The facade of the building shall be subdivided into blocks of uniform height and the area of the sign erected on particular block shall not exceed 25 percent of the area of that block.
2. No wall sign shall extend above the top of the wall or beyond the ends of the wall to which it is attached.
3. At any place where pedestrians may pass along a wall, any wall sign attached there to shall not project more than 7.5 cms. There from within a height of 3.0 mts measured from the level of such place.
4. Lighting reflectors may project 2.4 mts beyond the face of the wall provided such reflectors are at least 4 m above the footpath level, but in no case shall such reflectors project beyond a vertical plane one meter inside the kerb line.

5. Before Installing Billboard more than 2mts X 2mts Structural stability certificate from structural Engineer should be submitted to the Authority with billboard and dimension and design of the billboard.

#### **15.1.5 Temporary Billboards & Banners**

Banners, Billboards and several other kinds of signs other than on-premise signs shall be only temporarily permitted with prior permission from Competent Authority.

#### **15.1.6 Billboards in Urban Renewal Project Areas**

These Billboards must confirm with these Regulations and with the urban renewal plan or special restrictions for the area, which may include additional Regulations or requirements.

#### **15.1.7 Heritage Buildings and Precincts**

The Competent Authority can deny the permission on the grounds of protecting the ambience of heritage buildings and precincts.

#### **15.1.8 General Restrictions:**

Billboards will be restricted in the following scenarios:

1. Any Billboard which may obstruct the vision required for safe traffic movement.
2. Any Billboard which in the opinion of the Competent Authority is likely to be confused with authorized traffic signs or signals.
3. Any Billboard containing the word "Stop" , "Look" , "Danger" or other similar word that might mislead or confuse the travelers.
4. Any Billboard that is attached to or printed on a rock or other natural objects.

6. Any Billboard that is prohibited or restricted for the purpose of public appearance under state or national law.
7. Any Billboard with over hang over public property which obstructs access or egress from any building.

#### **15.1.9 Fees and Deposits**

Fees and Deposits shall be as per time to time notified by Competent Authority.

### **15.2 Communication Infrastructure**

Following provisions shall apply for Communication infrastructures such as for Post & Telegraph, Telephone, Wireless, Broadcasting, Cellular Mobiles, Internet, "V" Set and other similar forms of communication.

#### **15.2.1 Location:**

The communication infrastructure shall be either placed on the building roof tops or terraces at a distance of minimum 1.5mts from the parapet, or on the ground or open space within the premises subject to other Regulations.

---

**16.0 MINING, QUARRYING AND BRICK KILN**

The following Regulations shall govern Mining, Quarrying and Brick Kiln operations and shall form conditions of the development permission.

1. Any mining, quarrying and brick kiln operations without any blasting shall be permitted within a distance of 75mts from the boundary of any public road, railway line, canal, transmission line or any other building.
2. No mining, quarrying and brick kiln operations which involves blasting shall be permitted within a distance of 200mts from any public road, railway line, canal, transmission line or any other building.
3. No building operations shall be permitted on the plot on which mining and quarrying and brick kiln operations have been permitted, without the prior approval of the authority.
4. The mining, quarrying and brick kiln shall be permitted for a stipulated period not exceeding three years from the date of development permission at a time and shall be so prescribed in the development permission.
5. The mining, quarrying and brick kiln operations shall not cause any nuisance to people in the vicinity.
6. The mining, quarrying and brick kiln operations below the average ground level shall be permitted only for the extraction.
7. For Brick Kiln, every manufacturer of clay bricks, tiles or blocks shall use at least 25% of fly ash.

**17.0 SPECIAL DEVELOPMENTS****17.1 Regulations for the Rehabilitation and Redevelopment of the Slums (SLUM POLICY) as per Annexure 1A**

**Section D Performance Regulation****20.0 BUILDINGS AND INFRASTRUCTURE****20.1 Architectural Elements****20.1.1 Boundary Wall/ Compound Wall****For all Buildings other than Industrial:**

1. The height of a boundary wall towards the front shall not exceed 1.5mts from the crown of the adjacent road and 1.8mts from the crown of the adjacent road for all other sides of the building unit.
2. For building units at junction of roads, a grill fence shall be provided with the following provisions:  
At least 50% perforation in the grill.

The base of the fence shall not exceed 0.8mts from the level of the crown of the adjacent road for a length of 9mts. from the corner of the building unit at the junction.

**For Industrial Buildings:**

1. The height of a boundary wall on all sides shall not exceed 3mts from the crown of the adjacent road.

**20.1.2 Boundary Gate/ Compound Gate**

1. Boundary gate shall not open outward and shall be provided with a means to prevent the gate from opening outward on the pavement or road.
2. For building units at junction of roads, the following shall be applicable:  
A gate shall not be permitted on the curvature of the boundary wall.

If the adjacent road width is equal or more than 12mts, the opening in the boundary wall shall be located at a minimum distance of 15mts. from the corner of the building unit at the junction. If the length of the road side edge is less than 15mts, the opening in the boundary wall shall be provided at the farthest end from the junction.

**20.1.3 Level of Building Unit**

The level of the Building shall be established with respect to the average ground level or High flood level, as may be applicable. This level shall in no cases be lower than the crown level of the road in front.

Provided that in the case of a building unit, the level of which is lower than the crown of the road in front and which in the opinion of the Competent Authority, could be drained off in the storm water drainage and sewer, the Competent Authority may permit a suitable lower level.

**20.1.4 Paving in Building Unit**

Maximum of 50% of the total open space including marginal open spaces and common plot of a building unit shall be paved. The remaining shall be permeable for rain water percolation.

**20.1.5 Access Path**

1. Access path from the building unit entry to the building entry shall have a minimum width of 1.8mts with an even surface and devoid of steps.
  2. In case of a sloping access path, the gradient shall not be less than 1:12
- For all Buildings other than detached and semi-detached dwelling units:

1. Minimum one entrance shall be provided that is accessible by disabled.
2. Minimum width of the access path shall be 1.2mts.
3. In case of sloping access path or ramp:
  - a. The gradient shall not be greater than 1:12.
  - b. Minimum width of ramp shall be 1.2mts and the maximum continuous length shall be 9mts. Such ramp shall have 800mm high hand rail on both sides extending 300mm beyond top and bottom of the ramp. Minimum gap from the adjacent wall to the hand rail shall be 50mm.
  - c. Entrance landing shall be providing adjacent to ramp with the minimum dimension 1.2mts x 1.5mts.
  - d. The surface material shall adequately guide visually impaired by using colour and brightness that is different from the surrounding floor material or by using 'guiding floor material' that emits different sounds
  - e. Finishes shall have a non-slip surface with a texture traversable by a wheel chair.
  - f. Curbs, wherever provided, should blend to a common level.
4. For stepped approach:
  - a. Minimum width shall be 1.35mts.
  - b. Size of tread shall not be less than 300mm. and maximum riser shall be 150mm.
  - c. The steps shall not have abrupt (square) nosing.
  - d. Maximum number of risers on a continuous flight without landing shall be limited to 12.
  - e. The stepped approach shall be provided with 800mm high hand rail on both sides. Hand rails shall extend 300mm on the top and bottom flight of the steps.
  - f. All steps edges shall have a contrasting colour band of 50mm width stretched entirely across the step width. The edges should also be non-slippery.

#### 20.1.6 Plinth

1. The plinth of the habitable area of any building shall be at a minimum height of 0.45mts from the established level of the building unit.
2. The building may be permitted on hollow plinth at the ground level with the following provisions:
  - a. Has maximum height of 3.5mts from finished ground level to finished floor level and minimum height shall be 3.0mts from finished ground level to finished floor level and is free of enclosures except for staircase.
  - b. Is used for parking.
  - c. This area can have provision for electric meter room, room for telephone distribution board, bathroom, water room, servant room, security cabin and entrance foyer up to a maximum the built-up area of 15 sq.mts. Such structure shall have a minimum plinth of 0.3mts.

#### 20.1.7 Entrance

For all buildings other than detached and semi-detached dwelling units, entrance with the following specifications shall be provided:

1. Minimum clear opening of the entrance door shall be 900mm and shall not be provided with a step that obstructs the passage of a wheelchair user.
2. Level difference at threshold shall not exceed 12mm.
3. Manual doors should incorporate kick plates 300mm high to withstand impact of wheelchair footrest where doors are glazed.

4. Door handle and locks should be positioned between 900-1000mm above floor and must enable the user to operate it with a single hand.

#### 20.1.8 Minimum Clearance Height in Buildings

##### 1. For Residential or Commercial Buildings:

- All habitable spaces shall have minimum height of 2.9mts between finished floor levels
- All circulation and service spaces such as verandah, bathroom, washroom, toilet, passage, puja room, store room and stair cabin shall have a minimum clearance height of 2.1mts.

- For Industrial Uses or Buildings, all habitable spaces shall have a minimum clearance height of 3.0mts.

- In case of folded roof, minimum clearance height shall be 3.0mts (measured from the lowest point of the fold).
- In case of sloping roof, minimum clearance height shall be 2.2mts (measured from the lowest point of the roof). The average height of the room shall not be less than the minimum clearance height applicable according to the building use and stipulated above.
- In case of trussed roof, minimum clearance height shall be measured from the floor level to the bottom of the tie beam and shall be 2.8mts.
- For Hollow Plinth: Spaces of hollow plinth for the purpose of parking with maximum height of 3.5mts from finished ground level to finished first floor level and minimum height shall be 3.0mts from finished ground level to finished first floor level

7. **For Basement:** Basement exclusively used for parking shall have minimum height of 2.8mts, and maximum height of 3.8mts, measured from finished basement floor level to finished plinth level.

#### 20.1.9 Loft

Loft may be allowed in a room at a minimum height of 2.1mts from the floor level if the area does not exceed 30% of the area of the enclosing room.

#### 20.1.10 Basement

1. Basement is allowed within a building unit as per specifications in Section C: Planning Regulations. The usage of basement to conform to Section C: Planning Regulation 13.11.4.
2. The area available after providing the required margins may be utilized for basement. It may be provided at two levels, provided that the parking space available at ground level and in first basement level is not sufficient and the reasons are convincingly communicated to the Competent Authority in writing.
3. Basement in a building shall have a minimum clearance height of 2.8mts.
4. If basement is used for parking, a minimum number of two ramps shall be provided with width and slope as specified in Performance Regulation 13.1.14. These ramps should be preferably provided at opposite ends. Such ramps shall not be permitted in any marginal space.
5. In cases where the permitted margin of the basement is lesser than the permitted margin of the super structure, no level difference shall be permitted in the marginal space of the building. Such marginal space shall be open to sky and motorable with at least 40 ton load bearing capacity.
6. For basement, necessary shoring and strutting including sheet piling shall be required.
7. Provision for drainage or water supply shall not be permitted in the basement.
8. Material used for construction of basement shall be fire resistant. Wood or any other combustible material shall not be used as structural members of a basement.
9. Access to the basement to be provided as per Performance Regulation 13.1.13, 13.1.14 and 13.12.
10. For buildings with more than two lifts, minimum two lifts shall be provided to access the lowest level of basement.

#### 20.1.11 Railings

1. A railing/parapet with a minimum height of 1.15mts from the finished floor level shall be provided to ensure safety at all accessible edges of a building such as roof edges, terrace, balcony, floor edges or any large openings.
2. The height of railing/parapet shall not exceed 1.3mts measured from the unfinished floor level.
3. The maximum dimension of the railing/parapet perforations shall not exceed 0.15mts in any case.

4. In buildings meant for predominant use by children, it will be necessary to suitably alter the height of the hand-rail and other fittings & fixtures.

#### 20.1.12 Terrace

Terrace of a building shall be accessible by a common staircase and be free from partitions.

#### 20.1.13 Staircases

Staircase in a building and its specifications shall be determined as mentioned in the table below:

Table: Staircase

	Use	Height of Building (m)	Staircase		
			Min. Flight Width (m)	Min. Tread (mm)	Max. Riser (mm)
1.	Residential- detached and semi-detached	Three Floors Up to 12m	1.0	250	200
2.	Residential- apartments	Up to 15m	1.2	250	180
2a.	Residential- apartments	More than 15 up to 25m	1.5	250	180
2b.	Residential- apartments	More than 25m	2.0	300	160
3a.	Educational	Up to 25m	1.5	300	160
3b.	Educational	More than 25m	2.0	300	160
4a.	Institutional	Up to 25m	1.5	300	160
4b.	Institutional	More than 25m	2.0	300	160
5a.	Commercial	Up to 25m	1.5	300	160
5b.	Commercial	More than 25m	2.0	300	160
6	Assembly	For all heights	2.0	300	160
7a.	Hospitality	Up to 15m	1.5	300	160
7b.	Hospitality	More than 15m	2.0	300	160
8	Industrial	For all Heights	1.5	300	160

#### 1. Staircase for Basement:

- The staircase to the basement shall have the same width as the regular staircase leading to upper floors.
- Any staircase leading to the basement shall not be made of wooden or other combustible material.
- A staircase shall be provided from the lowest level of the basement as a means of access or exit at a travel distance mentioned in the table below:

Table: stair Travel Distance

Building Use	Travel Distance (meters)
Residential Use	30
Commercial Use	25
Hazardous Use	20

#### 2. Staircase for all Buildings other than detached and semi-detached dwelling units:

- a. Separate staircase shall be provided if the ground floor or any other floor in a residential building is used for non-residential purpose.

#### 20.1.14 Ramp

##### 1. Ramp for Vehicular Access

- a. Minimum width and radius for a ramp for two-wheelers, cars and trucks, respectively are specified in the table below:

Table: Ramp

Vehicle	Minimum width of ramp (meters)	Minimum radius of inner curve (meters)
Two-wheeler	2.0	1.5
Car	3.25	2.0
Truck	6.0	3.0

- b. The maximum slope of ramp shall be 1:7.  
 c. The ramp shall not be provided within the minimum required margins.  
 d. A level platform of width equal to ramp width and length of minimum 4.5mts. shall be provided at end of the ramp at ground level and basement level.  
 e. Ramps for vehicular access shall not be permitted in the marginal space.  
 f. A minimum clear height of 2.6mts shall be maintained at all points on the ramp.  
 g. For parking in basement/s, the number and width of ramp shall be provided as specified below:

Table: Requirement of Ramp

Area of Basement	Number of Ramps	Width of Ramp
≤500 sq.mts	1	3.25mts
>500 sq.mts	1	6.5mts
	2	3.25mts each

3. **Ramp for Pedestrians in all buildings other than detached and semi-detached dwelling units:**  
 a. The minimum width of the ramp shall be 1.2mts, 1.5mts and 1.8mts for the ramp length of 3.6mts, up to 9mts and more than 9mts respectively.  
 b. A landing shall be provided of 1.5mts depth for every 9mts length of the ramp.  
 c. The slope of a ramp shall not exceed 1 in 12.  
 d. Surface of the ramp shall be slip-resistant and the edge of the ramp shall be protected with a minimum height of 100mm.  
 e. Handrails on the ramps shall be on both sides at two levels; at 700mm and 900mm, both ends shall be rounded, grouted and extended 300mm beyond top and bottom of ramp.  
 f. Entrance landing shall be provided at the starting and ending level of the ramp with the minimum length equal to 1.8mts.  
 g. Ramps shall lead directly to outside open spaces at ground level or courtyards or other safe places.  
 h. Ramps for pedestrian access shall not be permitted in the marginal space.

#### 20.2 Parking

##### 20.2.1 Parking to be provided

In any building, provision for parking shall be made as per requirements specified in Section C: Planning Regulations.

1. Parking for disabled people shall be provided for all buildings and facilities other than detached and semi-detached dwelling units.

#### 20.2.2 Design of Parking for Cars

Parking layout for cars in all buildings shall conform to the following specifications:

1. Minimum dimension of a space provided for parking a car shall be 2.5mts x 5.5mts.

Car parking and access lane

2. Each car parking space should be connected to the street providing access to the building unit by means of an access/exit lane.
3. Minimum width of the access/exit lane for single-sided parking shall be 3mts and for double-sided parking layout, the minimum width of the access lane shall be 5.5mts.
4. A minimum clear height of 2.6mts shall be maintained at all points in the parking space and access/exit lanes.
5. Minimum provision of one accessible car parking space shall be provided for disabled people for every 25 car parking spaces or less. This accessible car parking space shall:
  - a. have a minimum width of 2.5mts.
  - b. have a 1.2mts side transfer bay. This can be shared by two successive parking bays.
  - c. be located within 30mts from the main entrance of the building
  - d. have appropriate signages indicating that the space is reserved for wheel chair that are conspicuously displayed as specified in Regulation.

Handicapped accessible car  
parking with transfer bays

- e. have guiding floor materials or have a device to guide visually-impaired persons with audible signals or any other devices which serves the above purpose.
6. Parking reserved for visitors shall be provided at ground level only.

#### 20.2.3 Design of Parking for Two-Wheelers

Parking layout for two-wheelers in all buildings shall conform to the following specifications:

1. Minimum dimension of a space provided for parking a two-wheeler shall be 0.90mts x 2.0mts.
2. Each two-wheeler parking space should be connected to the street providing access to the building unit by means of an access/exit lane. Minimum width of the access/exit lane shall be 2.0mts.
3. A minimum clear height of 2.6mts shall be maintained at all points in the parking space and access/exit lanes.

#### 20.2.4 Design of Parking for Trucks

Parking layout for trucks in all relevant buildings shall conform to the following specifications:

1. Minimum dimension of a space provided for parking a truck shall be 4.0mts. X 8.0mts.
2. Each truck parking space should be connected to the street providing access to the building unit by means of an access/exit lane. Minimum width of the access/exit lane shall be 6.0mts.

**20.3 Lighting**

Adequate natural and artificial lighting as published in the National Building Code of India, Part VIII – Building Services, Section I, shall be provided in all parts of a building to the satisfaction of the Competent Authority.

**20.4 Ventilation****20.4.1 Ventilation of Rooms**

Every habitable and usable room shall be equipped for adequate ventilation by provision of windows and/or ventilators that open directly into an open space or semi-open space such as courtyard or verandah. The size of such an open space shall be minimum one-tenth of the floor area of the room.

The aggregate of all openings including doors, windows and ventilators in a room shall be minimum one-seventh of the floor area of the room.

Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code and to the satisfaction of the Competent Authority.

**20.4.2 Ventilation of Basement**

Every basement shall be ventilated adequately for its respective use. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

**20.4.3 Ventilation of Bathrooms and Water Closets**

Every bathroom and water closet shall be ventilated adequately.

At least one of the walls of a water closet or bathroom or sanitary block shall have an opening of minimum 0.25 sq.mts. for each unit of w.c or bathroom. Such opening shall open into an open space with minimum width of 0.9mts. Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

**20.4.4 Ventilation of Staircase for detached and semi-detached dwelling units:****1. For ventilation by windows:**

Every staircase shall be ventilated adequately from an open air space with a minimum area of 1 sq.mts. The aggregate area of all windows provided shall be at least 1.2 sq.mts at each stair landing or floor in the enclosing wall of the staircase which abuts on such 1 sq.mt. open air space.

**2. For mechanical ventilation:**

Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

**20.4.5 Ventilation of Industrial Buildings**

---

Every usable room shall be equipped for adequate ventilation by provision of windows, ventilators, sky-lights or artificial means.

For natural ventilation, every room in such building shall be lit and ventilated by adequate number of windows, ventilators and sky lights exclusive of doors having clear opening not less than 1/7th of the floor area abutting on open air space of width not less than 1/3rd of the height of the part of the building abutting such open space.

Any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

#### **20.4.6 Ventilation of Special Buildings**

Every auditorium or halls shall be naturally lit and ventilated by doors, ventilators and windows abutting on an interior or exterior open air space which shall not be less than 1/5th of the total floor area.

Any deficiency shall be compensated by use of mechanical system such as exhaust fans or air-conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

##### **1. Change of ventilation system**

No permission shall be granted to convert an existing air-conditioned theatre to a non-air-conditioned theatre.

#### **20.5 Heating and Air Conditioning**

Adequate heating and air conditioning as published in the National Building Code of India, Part VIII – Building Services, Section 3-Air Conditioning, shall be provided in all parts of a building and to the satisfaction of the Competent Authority.

##### **20.5.1 Air-Conditioning of Special Buildings**

Auditorium or cinema halls shall be air-conditioned as per following specifications:

1. Temperature Range-22 to 26.5 degrees Celsius (72° F to 80° F).
2. Change of Air per hour-approximately 10 times.
3. Relative Humidity-50 to 60%
4. Fresh Air Requirement-7.5 CFM per person.

#### **20.6 Water-related Requirement**

##### **20.6.1 Water Storage Tank**

Water storage tank shall be maintained to be perfectly mosquito-proof condition, by providing a properly fitting hinged cover and every tank more than 1.50 mts. in height shall be provided with a permanently fixed non-ferrous metal ladder to enable inspection by anti-malaria staff.

##### **20.6.2 Drinking Water Supply for Disabled**

In all buildings other than residential buildings, suitable provision of drinking water shall be made for the disabled near the special toilet provided under Performance Regulation 20.9.2.

---

**20.7 Signage**

Signage directly pertaining to the use of the building may be erected on the plot.

For all Buildings other than detached and semi-detached dwelling units:

Signages pertaining to the internal building uses shall be provided. Such signage shall comply with the following:

1. The size of lettering shall not be less than 20mm to enable easy legibility.
2. Public Address System may also be provided in busy public areas.
3. The symbols or information should be in contrasting colour and properly illuminated to help people with limited vision to differentiate amongst primary colours.
4. International symbol mark for wheel chair as shown below be installed at the lift, toilet, staircase, parking areas etc., that have been provided for the disabled.

For educational, institutional and government buildings-information board in Braille shall be installed on a wall near the entrance at a suitable height. It should be possible to approach them closely. To ensure safe walking, there should not be any protruding sign which creates obstruction in walking.

**20.8 Letter Box**

In all case of building having more than two floors including ground floor a letter box for each separate unit shall be provided at ground floor level to facilitate easy mail delivery.

**20.9 Sanitation**

Minimum sanitary accommodation shall be provided for all proposed buildings and additions and extensions to existing buildings.

**20.9.1 For Residential Buildings**

The minimum sanitary requirement for a residential dwelling unit shall be one water closet.

**20.9.2 For All Buildings other than Residential**

1. Minimum one special water closet shall be provided for the use of physically disabled persons with provision of wash basin and drinking water at the ground level.  
Minimum size of toilet shall be 1 mts. x 1.75 mts.

Minimum width of door shall be 900mm with outward door swing.

Suitable arrangement of vertical or horizontal hand rails with 50mm clearance from the wall shall be provided.

W.C. seat shall be 500mm from the floor.

2. Water closets shall be provided for each gender. The number of water closets shall be decided on the basis of the maximum number of building users of that gender at any time and as specified in the table below:

Table: Public Utility in Building

Building Use	Rate for No. of Users	No. of Users	Min. No. of Urinals	Min. No. of Water Closets	Min. No. of Washbasins
Educational	1 user per 1sq.mts		5 or 1 per 50 male users or less, whichever is more	2 or 1 per 200 users or less per gender, whichever is more	
Business	1 user per 4sq.mts	<20	1 may be provided	1 WC per gender each	
	per carpet area	21100	1 per 25 male users or less	1 per 25 users or less per gender	
		101500	1 per 50 male users or less	1 per 50 users or less per gender	
		>500		1 per 100 users or less per gender	
Industrial and Storage	1 user per 25sq.mts of carpet	1-100	1 per 100 male users or less	1 per 25 users or less per gender	
	area	>100	1 per 50 male users or less	1 per 50 users or less per gender	
Special Buildings	1 user per seat		1 per 75 users or less	1 per 100 users or less per gender	1 per 200 users or less

3. All such water closets and urinals shall be provided in common and accessible locations of the building.
4. These sanitation facilities shall be provided with signage indicating the use and the intended users' gender as per Regulation no. 20.7.

#### 20.9.3 For Industrial Buildings and Storage Buildings

Washing space of minimum area of 4sqm shall be provided and equipped with sufficient number of taps.

#### 20.9.4 For Educational Buildings

Competent Authority may enforce the distribution of the above sanitary facilities to be provided at each floor of the building.

#### 20.9.5 For Special Buildings

1. The number of water closets shall be decided on the basis of the number of seats provided.
2. Water closets shall be provided for each gender, apportioned suitably.

**20.10 Drainage**

The manner in which it is intended to connect the drainage system of a building to a public sewer shall be subject to approval by the Competent Authority.

Regulations for construction, maintenance, and control of drains, sewers, drainage and sewage works of any description within Development Area shall be as per the norms of Gujarat Pollution Control Board.

**20.10.1 Provision of Septic Tank, Seepage Pit and Soak Well**

In the case where there is no drainage facility available for the land to be developed, the owner shall provide septic tank, soak pit or soak well for disposal of sewage and waste water.

1. 1 Location and sub-soil dispersion: A sub-soil dispersion system shall not be closer than 12mts to any source of drinking water, such as a well, to mitigate the possibility of bacterial pollution of water supply. It shall also be as far removed from the nearest habitable building is economically feasible but not closer than 2mts to avoid damage to the structure.
2. Dimensions and Specifications:
  - a. Septic tank shall have a minimum inner width of 75cms. a minimum depth of -meter below the water level and a per capital minimum liquid capacity of 85 litres. The length of the tanks shall be least twice the width.
  - b. Septic tanks may be constructed of brick work, stone masonry, concrete or other suitable material as approved by the competent authority..
  - c. Under no circumstances should effluent from a septic tank or allowed into an open channel drain or body of water without adequate treatment.
  - d. The minimum normal diameter of the pipe shall be 100mm. Further at junction of pipes in manholes, the direction of flow from a branch connection should not make an angle exceeding 45 degrees with the direction of flow in the main pipe.
  - e. The gradients of land-drains, under-drainage as well as the bottom of dispersion trenches and soak wells should be between 1:300 and 1:1400.
  - f. Every septic tank shall be provided with a ventilating pipe of at least 50mm diameter. The top of the pipe shall be provided with a suitable cage of mosquito proof wire mesh. The ventilating pipe shall extend to a height which would cause no smell or nuisance to any building in the area. Generally, the ventilating pipe should extend to a height of about 2mts above the septic tank building when it is located closer than 15mts.
  - g. When the disposal of a septic tank effluent is to a seepage pit, the seepage pit may be of sectional dimension of 90cms and not less than 100cms in depth below the inner level of the inlet pipe. The pit may be lined with stone, brick and concrete blocks with dry open joint which should be backed with at least 7.5cms of clean coarse aggregate. The lining above the inlet level should be narrowed to reduce the size of the R.C.C. cover slabs. Where no lining is used, especially near trees, the entitle pit should be filled with loose stones. A masonry ring should be constructed at the top of the pit to prevent damage by flooding of the pit by surface run off. The inlet pipe should be taken down to a depth of 90cms from the top an anti-mosquito measure.
  - h. When the disposal of septic tank effluent is to a dispersion trench, the dispersion trench shall be 50 to 100cms wide, excavated to a slight gradient and shall be provided with a layer of shed gravel or crushed stones 15 to 25cms deep. Open, joined pipes placed inside the trench shall be made of unglazed earthenware clay or concrete and shall have a minimum internal diameter or 70 to 100mm. Each dispersion trench should not be longer than 30mts and trenches should not be placed closer than 1.8mts to each other.

The above mentioned Regulations shall be subject to modification form time to time as required by Gujarat Pollution Control Board/ Competent Authority.

**20.11 Electrical Infrastructure**

Adequate electrical infrastructure as published in the National Building Code of India, Part VIII -Building Services, Section 2-Electrical Installations, shall be provided in all buildings to the satisfaction of the Competent Authority.

#### **20.12 Lifts and Elevators**

Lift shall not be required for buildings with height less than 15mts.

Lift shall be provided for buildings taller than 15mts height as prescribed below:

##### **20.12.1 For Buildings exceeding 13mts height**

1. One lift shall be provided in all buildings having a height above 15.0mts from the established building unit level.
2. For buildings with height above 25.0mts, minimum two lifts shall be provided. One of these shall be a fire lift, to be provided in conformity with Fire Safety Regulations
3. For buildings with more than two lifts, minimum two lifts shall be provided to access the lowest level of basement.
4. For residential buildings above 15mts: one lift for every twenty dwelling units of all the floors above 15mts shall be provided or as required as per height requirements, whichever is more.
5. For non-residential buildings above 15mts: one lift per 1000 sq.mts or part thereof of built-up area shall be provided, whichever is more.
6. Lift shall be provided from the ground level or lower level.
7. Minimum capacity of the lift shall be for eight persons.
8. Minimum area for a passenger lift car shall be 2.2sq.mts with a clear door opening with minimum width of 900mm. A clear landing area in front of the lift doors shall have minimum dimensions of 1.8mts x 1.8mts.
9. A handrail of 600mm length shall be provided at a height of 1mts from the floor of the lift car.
10. The duration of an automatic closing lift door shall be minimum 5 seconds with a maximum closing speed of 0.25 m/sec.
11. The interior of the lift cabin shall be equipped with a device that audibly indicates the floor level reached and whether the door of the cabin is open or closed.
12. Number and type of lifts to be provided in different types of buildings shall conform to standards specified in the National Building Code of India, Part VIII -Building Services, Section 5- Installation of Lifts and Escalators.

All lifts shall also meet fire prevention and safety requirements specified in Performance Regulation No. 21.2.6, 21.3.5, 21.3.6 and 21.4.3, as applicable on the basis of height of the building.

#### **20.13 External Facade**

On the external facade of any building, the glazed surface area of the façade shall be provided up to a maximum of 50%, with the provision of safety railing up to sill level.

#### **20.14 Display Structures**

1. The size and location of permitted billboards along roads shall be permitted as prescribed in Section C: Planning Regulations 17.0.
  2. Every billboard shall be designed as per the requirements for structural safety as prescribed in Regulations 23.8.
  3. Billboards on roof tops are not permitted unless the entire roof is constructed with non-combustible materials.

## 21.0 FIRE PREVENTION AND SAFETY

### 21.1 Requirement for Fire Safety Professionals in Buildings

#### 21.1.1 Fire Protection Consultant on Record (FPCOR)

FPCOR shall be necessary in all buildings listed in Schedule 21. The minimum qualifications for Fire Protection Consultant shall be decided by the Chief Fire Officer as listed in Schedule 7. Suitable persons shall be registered with the Chief Fire Officer.

#### 21.1.2 Fire Officer

The minimum qualifications for Fire Officer shall be decided by the Chief Fire Officer. Suitable persons shall be registered with the Chief Fire Officer.

#### 21.1.3 Fire Men

The minimum qualifications for Fire Men shall be decided by the Chief Fire Officer. Suitable persons shall be registered with the Chief Fire Officer.

#### 21.1.4 Applicability of Fire Safety Professionals

The applicability of the fire safety professionals for buildings is provided in the table below on the basis of the height, use and area of the proposed building as applicable:

Table: Fire Safety

Building Use	Criteria	Fire Protection Consultant	Chief Fire Officer's Opinion and Special Fire Safety Provisions	Fire Men	Fire Officer
Residential	Building Height up to 15mts	Not Required	Not Required	Not Required	Not Required
	Building Height > 15mts	Required	Not Required	Not Required	Not Required
	Building Height > 25mts	Required	Required	Required	Not Required
Mixed-Use or Business	Building Height >15mts	Required	Required	Required	Not Required
Hospitality, Educational,	Building Height >12mts to 25mts	Required	Required	Required	Not Required
Institutional, Mercantile	Building Height > 25mts	Required	Required	Required	Required
Special Building,	Building Height > 12mts	Required	Required	Required	Not Required
Storage Building,	Total Built Up Area up to 5,000 sq.mts	Required	Required	Required	Not Required
Wholesale market	Total Built Up Area > 5,000 sq.mts	Required	Required	Required	Required

Light Industrial,	Total Built Up Area up to 2,000 sq.mts	Required	Not Required	Required	Not Required
General Industrial	Total Built Up Area >2,000 sq.mts and up to 5,000 sq.mts	Required	Required	Required	Not Required
	Total Built Up Area > 5,000 sq.mts	Required	Required	Required	Required
Hazardous, Special	Total Built Up Area up to 500 sq.mts	Required	Required	Required	Not Required
Industrial	Total Built Up Area > 500 sq.mts	Required	Required	Required	Required
Religious Building	Total Built Up Area > 2,000 sq.mts	Required	Required	Required	Not Required
Fuelling Station	All Buildings	Required	Required	Required	Not Required
All uses	Building Height > 45mts	Required	Required	Required	Required

### 21.2 General Fire Prevention Provisions

The applicability of these regulations shall be for all building types unless specified otherwise.

#### 21.2.1 Open Space:

For all buildings other than detached and semi-detached dwelling units, the marginal space adjacent to the building shall be open to sky and motorable with at least 40 ton load-bearing capacity. Rescue/ fire fighting vehicles should be able to approach all sides of the building. The entrance gates from the street shall not be less than 3.5 mts in width.

#### 21.2.2 Corridors and Passageways:

The minimum clear width of corridors and passageway in a building other than detached dwelling unit shall be as under:

Table: Corridors and Passageways

Length of corridor (in m)	Width of corridor (meters)	
	Residential	Non-Residential
Up to 6	1.0	1.2
Up to 9	1.2	1.5
Up to 15	1.2	2.0
More than 15	1.5	2.5

1. For every additional length of 9mts. or part thereof, the width of the corridor shall be increased by 300mm per additional length of 1.0mt or part thereof up to a maximum length of 3mts.
2. Corridor shall be clear of any obstructions. No projection in any form shall be allowed up to a height of 2mts from floor level.

3. In case of any level difference in a corridor, a slope shall be provided with gradient not more than 1:12. In such case, guiding floor material shall be provided.

#### 21.2.3 General Exit Requirements:

1. An exit may be a doorway, corridor; passageway(s) to an internal staircase, or external staircase, or to a verandah or terrace(s), which have access to the street, or to roof of a building or a refuge area. An exit may also include a horizontal exit leading to an adjoining building at the same level.
2. Lifts and escalators shall not normally be considered as exits.
3. Every exit, exit access or exit discharge shall be continuously maintained free of all obstructions or impediments for full use in the case of fire or other emergency.
4. Every building meant for human occupancy shall be provided with exits sufficient to permit safe escape of occupants, in case of fire or other emergency.
5. In every building or structure, exits shall comply with the minimum requirements of this part, except those not accessible for general public use.
6. No building shall be so altered as to reduce the number, width or protection of less than that required.
7. Exits shall be clearly visible and the route to reach the exits shall be clearly marked and signs posted to guide the occupants of the floor concerned. Signs shall be illuminated and wired to an independent electrical circuit on an alternative source of supply. The colour of the exit signs shall be green.
8. The floors of area covered for the means of exit shall be illuminated to values not less than 1 ft candle (10 lux) at floor level. In auditoriums, theatres, concert halls and such other places of assembly, the illumination of floor exit/ access may be reduced during period of performances to value not less than 1/5 ft candle (2 lux)
9. Fire doors with 2 hour fire resistance shall be provide at appropriate places along the escape route and particularly at the entrance to lift lobby and stairwell where a funnel or flue effect may be created, inducing an upward spread of fire and smoke for Buildings with height more than 25mts and commercial buildings.
10. Exits shall be arranged that they may be reached without passing through another occupied unit.

#### 21.2.4 Staircase:

1. Staircase to abut an outer wall or be external part of the building with natural ventilation. All the space above the parapet wall shall be kept open.
2. All staircases shall be constructed of non-combustible materials throughout.
3. A staircase shall not be provided around a lift shaft unless provided with fire stop door of 1 hour rating at every floor level and no other openings in the inside walls.
4. Hollow combustible construction shall not be permitted.
5. No gas piping, electrical panels or AC ducts shall be allowed in the stairway. However service shafts/ ducts may be permitted. Electrical Shafts/ ducts shall have not less than 2hour fire resistance. For other service shafts/ ducts, the fire resistance shall be not less than 1hour.
6. No winders shall be provided except in case of individual dwelling unit.
7. The treads shall be constructed and maintained to prevent slipping.
8. All steps, edges must have a contrasting color band of 50mm width stretched entirely across the step width for uses other than residential use.
9. Railing: Continuous handrails shall be provided on both sides including the wall (if any) at two levels: upper at 850mm-900mm and lower at 700mm to be measured from the base of the middle of the treads to the top of handrails. Railing or parapet shall be provided in such a way that the width of staircase does not reduce. The maximum gap between balusters shall be 150 mm.
10. Soffit (underside/open area under the stairs) of the stairs and ramps should be enclosed or protected with rails or raised curbs or marked with a tactile surface

11. Headroom: The minimum headroom in a passage under the landing of a staircase and the staircase shall be 2.2mts.
12. No living space, store or other fire risk shall open directly into the staircase or staircases.
13. External exit door of staircase enclosure at ground level shall open directly to the open spaces.
14. The main and external staircases shall be continuous from ground floor to the terrace level.
15. Lifts shall not open in staircase.
16. Beams/ columns and other building features shall not reduce the head room/ width of the staircase.
17. Individual floors shall be prominently indicated on the wall facing the staircases.
18. In case of buildings with height up to 25mts, a separate staircase shall be required for access to the basement. Same staircase may continue to the basement, if such a staircase opens into an enclosure with a fire rating of 2 hours with fire safe doorway.

#### 21.2.5 Additional Staircase:

An additional staircase shall be required based on travel distance from the farthest point to the staircase on any floor. The provision of an additional staircase shall be subject to the requirements of travel distance being complied with as specified below:

Table: Travel Distance for Staircase

Building Use	Travel Distance (meters)
Residential Use	30
Commercial Use	25
Industrial / High Hazard Use	20

#### 21.2.6 Lifts

General requirements of lift shall be as follows:

1. Walls of lift shaft enclosures shall have a fire rating of 2h; lift shafts shall have a vent at the top of area not less than 0.5mx0.5 m.
2. Lift motor room shall be located preferably at the top of the shaft and separated from the shaft by the floor of that room.
3. Landing doors in lift enclosures shall have fire resistance of not less than 1 h.
4. The number of lifts in one row for a lift bank shall not exceed 4 and the total number of lifts in the bank (of two rows) shall not exceed 8. A wall of 2 hour fire rating shall separate individual shafts in a bank.
5. Lift car door shall have a fire resistance rating of half an hour. Lift car shall be ventilated from top and bottom side.
6. Collapsible gates shall not be permitted for lifts. They shall have solid doors with fire resistance of at least 1h.
7. If the lift shaft and lobby is in the core of the building, a positive pressure between 25 and 30 Pa shall be maintained in the lobby and a positive pressure of 50 Pa shall be maintained in the shaft. The mechanism for pressurization shall act automatically with the fire alarm; it shall be possible to operate this mechanically also.
8. Exit from the lift lobby, if located in the core of the building, shall be through a self-closing smoke stop door of half an hour fire resistance.
9. Grounding switch, at ground floor level, shall be provided on all the lifts to enable the fire service to ground the lifts.
10. Suitable arrangements such as providing slope in the floor of lift lobby shall be made to prevent water used during fire fighting etc, from entering the lift shafts.
11. A sign shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The sign shall also contain a plan for each floor showing the locations of the stairways.

12. Alternate source of power supply shall be provided for all the lifts through a manually operated changeover switch.
13. All lift shall be provided with ceiling hatch for rescue purpose.
14. Lift shall not normally communicate with the basement. If, however, lifts are in communication, the lift lobby of the basements shall be pressurized, with self-closing door.

#### 21.2.7 Portable Fire Extinguishers

Various types of fire extinguishers suitable for different classes of fires shall be provided in buildings. One unit of 5 kg Dry Chemical Powder (DCP), one unit of 4.5 kg of CO<sub>2</sub> shall be provided for every 1000 sq. mts. of floor area. This shall be required for all commercial buildings and for residential buildings with height more than 15 mts.

#### 21.2.8 Electrical Services

These shall conform to those given in C-1.12 Part 4 NBC Second revision and the IS: 1646-1999 and particular attention is drawn to the following:

1. The electric distribution cable/wiring shall be laid in a separate duct. The duct shall be sealed at every floor with non-combustible materials having the same fire resistance as that of the duct. Low and medium voltage wiring running in shaft and in false ceiling shall run in separate conduits.
2. Separate circuits for fire fighting pumps, lifts, staircases, corridor lighting and blowers for pressurizing system shall be provided directly from the main switch gear panel and these circuits shall be laid in separate conduit pipes, so that fire in one circuit will not affect the others. Such circuits shall be protected at origin by an automatic circuit breaker with it's no-volt coil removed. Master switches controlling essential service circuits shall be clearly labeled.
3. An independent and well ventilated electrical service room shall be provided on the ground level or first basement with direct access from outside or from the corridor for the purpose of termination of electric supply from the licensees' service and alternative supply cables. The doors provided for the service room shall have fire resistance of not less than 2 hours.

Note :-

1. If service room is located at the first basement, it should have automatic fire extinguishing system
2. Suitable circuit breakers shall be provided at the appropriate points.
3. Electric supply for fire pump/fire lift should be provided separately and not get switched off along with the main supply of building.

#### 21.2.9 Basement

These shall conform to those given in C-1.6 Part 4 NBC second revision and particular attention is drawn to the following:

1. The basement shall not open in to the staircase or lift well directly. The basements shall be provided with natural ventilations and more than one basement shall have mechanical smoke extraction installed with a capacity of one air change every 10 minutes.
2. The staircase of basements shall be of enclosed type having fire resistance of not less than 2 hours and shall be situated at the periphery of the basement to be entered at ground level only from the open air and in such position that smoke from any fire in the basement shall not obstruct any exit serving the ground and upper storeys of the building. It shall communicate with basement through a lobby provided with fire resisting self closing doors of one hour resistance. If the travel distance exceeds the desired level, additional staircases shall be provided at proper places.

3. Mechanical Ducted Extractors for smoke venting shall be designed to permit 6 air changes per hour in case of fire or distress call. For normal operations, air changes schedule shall be as given in part 8 NBC building services, section 3.
4. Discharge apparatus of all natural draft smoke vents shall be so arranged as to be readily accessible for opening by fire service personnel.
5. Use of basement for kitchen shall not be permitted. Building services such as, boiler rooms in basement shall comply with the provisions of the IE Act/ Rules.

#### **21.2.10 Air-conditioning**

1. Escape routes like staircases, common corridors, lift lobbies, etc, shall not be used as return air passage.
2. The ducting shall be constructed of substantial gauge metal as per IS: 655-1963-Specification for Metal Air Ducts.
3. Wherever the ducts pass through firewalls or fire walls or floors, the opening around the ducts shall be sealed with materials having fire resistance rating of the compartment.
4. The materials used for insulating the duct system (inside or outside) shall be of non-combustible material. Glass wool shall not be wrapped or secured by any material of combustible nature.
5. The air-handling units shall be separate for each floor and air ducts for every floor shall be separate and in no way inter connected with the ducting of any other floor.
6. If the air-handling unit serves more than one floor, the conditions given below shall be complied in addition to the recommendations above. Proper arrangements be way of automatic fire dampers, working on fusible link/or smoke detector principle for isolating all ducting at every floor from the main riser, shall be made. When the automatic fire alarm operates, the respective air-handling Units of the air-conditioning system shall automatically be switched off.
7. Where plenum is used for return air passage, ceiling and its fixtures shall be of non-combustible material.

#### **21.2.11 Electrical Sub-Stations**

1. The sub-station shall have separate fire resisting walls/surroundings and shall necessarily be located at the periphery of the floor having separate access preferably from fire escape staircase. The outside walls, ceiling and floor including doors and windows to the sub-station area shall be of 2h fire rating.
2. A sub-station or a switch-station with oil-filled equipment must not be located in the building. When housed inside the building, The transformer shall be of premises by walls/doors/cut outs having fire resistance rating of 4h.
3. The Sub-Station area needs to be maintained at negative air pressure and area in substation shall not be used as storage/dump areas.
4. No transformer shall be allowed inside the building.
5. Substation to be provided at rear corner of a building unit after leaving enough open space around the building for fire fighting requirements.

#### **21.2.12 Boiler and Boiler Room**

1. The boiler shall be installed in a fire resisting room of 4h fire resistance rating, and this room shall be situated on the periphery of the building and in no case in basement. dike shall be provided at the lower level.
2. Foam inlets shall be provided on the external walls of the building near the ground level to enable fire services or use foam in case of fire.
3. For Industrial Buildings the Boiler rooms shall be in a separate room or protected by bund walls at ground floor only.

#### **21.2.13 Automatic Sprinkler System**

---

Automatic Sprinkler System shall be provided for all the commercial buildings. Residential buildings are exempted from sprinklers on higher floors for buildings up to a height of 45mts. The system shall be required for basements for buildings of all heights.

#### **21.2.14 Ventilation**

All enclosures should have open able windows and vents to be opened in case of fire or smoke accumulation. If the floor or the building is centrally air-conditioned then a provision to stop the air handling unit should be provided and it shall be blocked by a damper and the same air duct should act as smoke extractors with the extraction fan switching on automatically, if a fire or smoke is detected.

### **21.3 Special Fire Prevention and Safety Provisions for Buildings Exceeding 25.0mts and Special Buildings**

As specified by the Fire Prevention and Safety Act, 1986, all buildings which are more than 25.0mts in height and Special Buildings shall provide fire prevention and safety provisions as prescribed specified by the Fire Authority in Performance Regulations 24.2 in addition to the following:

#### **21.3.1 Staircase:**

Staircase for buildings with height more than 25mts and special buildings shall comply with the following:

1. For Buildings with height more than 25mts all staircases shall terminate at the ground floor level and the access to the basement shall be by a separate staircase.
2. Staircase shall abut an outer wall or be external part of the building with natural ventilation.
3. Staircase shall be provided within a stairwell with a fire safe doorway of fire rating of 2 hours.

#### **21.3.2 General Exit Requirements**

Fire doors with 2 hour fire resistance shall be provide at appropriate places along the escape route and particularly at the entrance to lift lobby and stairwell where a funnel or flue effect may be created, inducing an upward spread of fire and smoke for Buildings with height more than 25mts and commercial buildings.

#### **21.3.3 Doorways:**

1. Every exit doorway shall open into an enclosed stairway compartmentalised from rest of building or a horizontal exit of a corridor or passageway providing continuous and protected means of egress.
2. No exit doorway shall be less than 1000 mm in width except assembly buildings where door width shall be not less than 2000 mm. All Doorways shall be not less than 2000 mm in height.
3. Exit doorways shall open outwards, that is, away from the room, but shall not obstruct the travel along any exit. No door, when opened, shall reduce the required width of stairway or landing to less than 900 mm. overhead or sliding doors shall not be installed.
4. In the case of building where there is a central corridor, the doors of rooms shall open outward and flush to the wall to permit smooth flow of traffic in the corridor.
5. Exit door shall not open immediately upon a flight of stairs. A landing equal to at least the width of the door(not less than 900mm) shall be provided in the stairway at each doorway. The level of landing shall be the same as that of floor, which it serves. Manual door should incorporate kick plate 300 mm high to withstand impact of wheelchair footrest where doors are glazed. Door handle and locks should be positioned between 900-1000 mm from floor level.
6. Exit doorways shall be open able from the side, which they serve without the use of a key.(panic bar)
7. Mirrors shall not be placed in exit doors to avoid confusion regarding the direction of exit.

**21.3.4 Horizontal Exits:**

Horizontal exit may be a doorway, a corridor, a passageway to an internal or external staircase or to an adjoining building or to a semi-open or open space.

1. The width of horizontal exit shall be same as for the exit doorways.
2. In a building with height more than 25mts and special buildings, a horizontal exit shall be equipped with at least one fire / smoke door of minimum two -hour fire resistance of self closing type. Further, It should have direct connectivity to the fire escape staircase for evacuation.
3. Where there is a difference in level between connected areas for horizontal exits, ramps, not more than 1 to 10 slope shall be provided; steps shall not be used.
4. Doors in horizontal exits shall be open-able at all times from both sides.
5. In a building with height more than 25mts. and special buildings, access to ramps from any floor shall be through a smoke-stop door.

**21.3.5 Lift**

For Buildings exceeding 25 mt. in height a lift shall terminate at the ground level and a separate lift to approach the basement shall be required.

**21.3.6 Fire Lift**

A dedicated fire Lift shall be required for all buildings exceeding 25 mts. The general requirements of fire lift shall be as follows:

1. To enable fire services personnel to reach the upper floors with the minimum delay, one fire lift per 1200 sq.mts of floor area shall be provided and shall be available for the exclusive use of the firemen in an emergency. In case of buildings with only two lifts, the second lift may be designated as a fire lift.
2. Fire lift shall terminate at the ground level.
3. It shall have loading capacity of not less than 545 KG (8 persons lift) with automatic closing doors of minimum 0.9m width.
4. The electric supply shall be on a separate service from electric supply mains in a building and the cables run in a route safe from fire, that is, within the lift shaft. Lights and fans in the elevators having wooden panelling or sheet steel construction shall be operated on 24 volt supply.
5. Fire fighting lift should be provided with a ceiling hatch for use in case of emergency.
6. In case of failure of normal electric supply, it shall automatically change over to alternate supply. For apartment houses, this changeover of supply could be done through manually operated changeover switch. Alternatively, the lift shall be so wired that in case of power failure, it comes down at the ground level and comes to stand-still with door open.
7. The operation of fire lift should be by a simple toggle or two-button switch situated in glass-fronted box adjacent to the lift at the entrance level. When the switch is on, landing call points will become inoperative and the lift will be on car control only or on a priority control device. When the switch is off, the lift can be used by the occupants in normal times.
8. The words 'Fire Lift' shall be conspicuously displayed in fluorescent paint on the lift landing door at each floor level.
9. The speed of the fire lift shall be such that it can reach the top floor from ground level within one minute.
10. Telephone or other communication facilities shall be provided in lift cars for building of height more than 25mts. Communication system for lifts shall be connected to fire control room for the building.

**21.3.7 Water Storage Tank**

---

1. Under ground water tank of at least 1,00,000 (one lakh) litres capacity and accessible for fire fighting vehicles. The covering slab shall be able to withstand the total vehicular load of 45 tons equally divided as a four point load when the slab forms a part of pathway/driveway.
2. Requirement of wet riser cum down-comer installation and capacity of fire pumps etc. shall be as per Table 23 part 4 NBC. Second revision. The requirements regarding size of mains/risers shall be as given in Table 24 part 4 NBC. Second revision. The wet risers shall be designed for zonal distribution ensuring that unduly high pressures are not developed in risers and hose pipes.

#### **21.3.8 Internal/Yard Hydrants, Hose Reels and Fire Service Inlet**

At least two yard hydrant and one fire service inlet shall be provided. One hydrant outlet, one hose reel, one set of on/off switch for the fire pump and a set of extinguisher shall be placed inside the building for every 1000 sq.mt floor area.

The system shall be with a 150mm. internal dia. Riser with hydrant landing valves at each floor (Base-ment/ground/all higher floors). An air vent valve at the top most level. The riser shall be of 'C' class pipes and welded to fine finish and coated with anti-corrosive paint and coloured RED. All hydrant valves used shall be of SS. The hydrant pipe shall also be connected to the bottom of the terrace tank with a NRV and a stop valve.

#### **21.3.9 Fire Alarm System**

Fire Alarm System with smoke detection alarm system shall be provided for all non residential building having height more than 25mts.

#### **21.3.10 Emergency Escape Lighting**

1. The emergency escape lighting shall be provided to be put on within one second of the failure if the normal lighting supply and shall be of independent of main supply.
2. Such Lighting shall be on separate circuits and be independently connected so that these can be operated by one switch installation on the ground floor easily accessible to fire fighting staff as any time irrespective of the position of the individual control of the light points, if any. It should be a miniature circuit breaker type of switch to avoid replacement of fuse in case of any crisis.
3. Escape lighting luminaries should be sited to cover the following locations: At each exit door, a) Near each staircase, b) Near any other change of floor level, c) Outside each final exit and close to it, d) Near each fire alarm call point, e) Near fire fighting equipment and, f) To illuminate exit and safety signs as required by the enforcing authority. Note: For the purpose of this clause 'near' is normally considered to be within 2mts measured horizontally.
4. Suitable arrangement shall be made by installing double throw switches to ensure that the lighting installed in the staircase and corridors does not get connected. Double throw switch shall be installed in the service room for terminating the stand-by supply.
5. Staircase and corridor lighting shall also be connected to an alternative source of supply which may be provided by battery that is continuously trickle charged from the electric mains.
6. Emergency lighting systems shall be designed to ensure that a fault or failure in any one luminaries does not further reduce the effectiveness of the system.
7. The luminaries shall be mounted as low as possible, but at least 2m above the floor level.
8. Sign are required at all exits, emergency exits and escape routes, which should comply with the graphic requirements of the relevant Indian standards.
9. Emergency lighting luminaries and their fitting shall be fire resistance type.
10. It is essential that the wiring and installation of the emergency lighting systems are of high quality so as to ensure their perfect serviceability at all times.
11. The emergency lighting system shall be capable of continuous operation for a minimum duration of 1 hour and 30 minutes even for smallest premises.

12. The emergency lighting system shall be well maintained by periodical inspections and tests so as to ensure their perfect serviceability at all times.

#### **21.3.11 Fire Exit Signages**

All exits, corridors and staircase shall have auto glow signs for people to escape in case of fires in darkness. Even the floors shall have guide marks guiding towards the staircase.

The exit sign with arrow indicating the way to the escape route shall be provided at a height of 1.8 m from the floor level on the wall and shall be illuminated by electric light connected to corridor circuits. All exit way marking signs should be flush with the wall and so designed that no mechanical damage shall occur to them due to moving of furniture or other heavy equipments. Further, all landings of floor shall have floor indicating the number of floor as per byelaws. The floor indication board shall be placed on the wall immediately facing the flight of stairs and nearest to the landing. It shall be of size not less than 0.5 m x 0.5 m.

#### **21.3.12 Smoke and Fire Venting**

The provisions for smoke and fire venting for industrial buildings with large floor areas shall conform to regulations given in annex D, Part4-NBC second revision.

The provisions for smoke and fire venting shall be provided for special buildings and for hotel and hospital building more than 25 m height.

#### **21.3.13 Service Ducts/Shafts**

1. The Electrical ducts shall have not less than 2h fire resistance and for other services ducts, the fire resistance shall be not less than 1h. All such ducts shall be properly sealed and fire stopped at all floor levels.
2. A vent opening at the top of the service shaft shall be provided having between one – fourth and one-half of the area of the shaft.
3. Refuse chutes shall have opening at least 1m above roof level for venting purpose and they shall have an enclosure wall of non-combustible material with fire resistance of not less than 2 hours. They shall not be located within the staircase enclosure or service ducts, or air-conditioning ducts. Inspection panel and doors shall be tight fitting with 1 hour fire resistance; the chutes should be as far away as possible from exits.

#### **21.3.14 Lightning Arrester**

The lightning protection for buildings shall be provided as given in Part 8-Building Services section 2 Electrical Installation NBC. Lightning arrestor shall be installed and properly earthed.

#### **21.3.15 Materials for Interior of Building**

Only materials conforming to class 1 flame spread classification as per IS: 12777-1989 shall be used. Materials which are combustible in nature and may spread toxic fumes / gases shall not be used for interior furnishings etc.

#### **21.3.16 Materials for External Glazing**

Glass of façade for building shall be of 1 hour fire resistance.

---

### **21.4 Special Fire Prevention and Safety Provisions for Buildings Exceeding 45.0mts and Special Buildings**

As specified by the Fire Prevention and Safety Act, 1986, all buildings which are more than 45.0mts in height and Special Buildings shall provide fire prevention and safety provisions as prescribed by the Fire Authority in Performance Regulations 24.2 and 24.3 in addition to the following:

#### **21.4.1 Staircase**

1. The staircase shall be of RCC construction & ventilated and shall be kept open except the parapet wall, all the space above the parapet wall shall be kept open.
2. The staircase shall be designed/ located at the exterior part of the building.
3. The width of the staircase shall not be less than 2 meters.
4. If the staircase is in the center of the building and is not ventilated then a fire escape staircase has to be installed on either sides of the building with travel distance not more than 30 meters. For such staircase with inadequate natural ventilation, any deficiency shall be compensated by use of mechanical system such as blowers, exhaust fans or air conditioning system according to the standards in Part VIII Building Services, Section-I Lighting and Ventilation, National Building Code, and to the satisfaction of the Competent Authority.

#### **21.4.2 Fire Escape Staircase:**

External Fire Escape Staircase shall be provided for buildings with height more than 45mts and special buildings if the safe travel distance for exit is not maintained. Such Fire Escape Staircases shall comply with the following:

1. Fire Escape Staircase to abut an outer wall or be external part of the building with natural ventilation.
2. Such staircases shall not have any opening to any part of the building.
3. External stairs shall have straight flight not less than 1250mm wide with 250mm treads and risers not more than 190mm. The number of risers shall be limited to 15 per flight.
4. No external staircase, used as a fire escape, shall be inclined at an angle greater than 45° from the horizontal.
5. The external staircase shall be constructed of non-combustible materials, and any doorway leading to it shall have the required fire resistance.
6. The route to the external stairs shall be free of obstructions at all time.
7. All external stairs shall be directly connected to the ground.
8. Handrails shall be of height not less than 700mm and not exceeding 850mm– 900mm. There shall be provisions of balusters with maximum gap of 150mm.

#### **21.4.3 Fire Lift**

1. All lifts of the building shall be Fire lifts and shall have a provision to ground in case of electrical failure and shall be installed with a panic button and a talk-back system.
2. The lift shall not be installed in the center of the building and the lift shaft shall be ventilated from the top with smoke extractors. The lift for the higher floors shall end at the ground level and not go to the basement.

#### **21.4.4 Ramp**

Access to ramps from any floor shall be through a smoke-stop door.

#### **21.4.5 Refuge Area**

Following provisions shall apply to refuge area in a building:

---

1. Refuge area shall be provided on the external walls/ periphery of the floor preferably on a cantilever projection, open to air at least on one side, protected with suitable railings and shall have direct access to fire ladder.
2. Minimum area of 15 sq mts. on external wall with minimum width of 0.75 mt at every 18 mts height ;for floor area up to 1000 sq. mts.
3. If floor area exceeds 1000 sq. mts., another Refuge Area on another end of the floor shall be provided.
4. For floors above 25mts and up to 39mts-One refuge area on the floor immediately above 25mts shall be provided.
5. For floors above 39mts-One refuge area on the floor immediately above 39mts and so on after every 15mts shall be provided.
6. Residential flats in multi-storeyed buildings with balcony, need not be provided with refuge area, however flats without balcony shall be provided with refuge area as given above.

#### 21.4.6 Skip Floor

The building shall have 10th & 18th floor as skip floors, where there shall be no enclosures allowed and can have some utilities installed but shall house a refuge room adjacent to the staircase.

The refuge room shall be of 2 hours fire resistance with 2 hours fire resistant self closing door, lighting, rest and drinking water facilities and the exterior wall of the room shall have door size glass opening for fire service ladders to approach.

#### 21.4.7 Control Room

For building height having more than 45m and floor area 3000 sq.mt and more on each floor, there shall be a control room on the entrance floor of the building with communication system (suitable public address system) to all floors and facilities for receiving the message from different floors.

1. Details of all floor plans along with the details of fire fighting equipment and installations shall be displayed in the fire control room.
2. The fire control room shall also have facilities to detect the fire on any floor through indicator board's connection- fire detection and alarm system on all floors.
3. The fire staff in charge of the fire control room shall be responsible for maintenance of the various services and the fire fighting equipment and installations in co-ordination with security, electrical and civil staff of the building.

#### 21.4.8 Ultra High-Pressure Fire Fighting System

1. The wet, ultra high pressure system shall comprise of a ultra high pressure ( six plunger, 150 lpm@100 bar) pump working at not more than 1000 rpm connected to an electric motor of 1000 rpm. Only, feeding a 25mm. SS. Pipe of seamless construction and joints shall be argon welded.
2. Each floor (Basement/ ground/all higher floor) shall have a 16mm.dia.R-II hose with 40 lpm. Fog gun working at 100 bar pressure and be able to give a throw of 20 meters. There shall be a hose reel at each floor & shall be located at easily approachable place and shall be long enough to reach the extreme end of the floor.
3. The pump shall be fed by a 10,000 liters water tank containing clean drinking quality soft water. The high pressure pump along with the tank may be located at the ground / basement/terrace level there shall be appositve feed to the pump. The discharge line at the pump shall be fitted with a pressure regulator and a high pressure by-pass valve to make the system safe.
4. A quick release adaptor at the ground floor shall be installed where fire service vehicle can be connected to the high pressure system line.

#### 21.4.9 Hydrant System

The Hydrant System shall not be required if an Ultra High Pressure Fire Fighting System is installed.

#### **21.4.10 Automatic Sprinkler System**

Automatic Sprinkler System shall be provided for all the building having height more than 45 m and building having basement used for car parking. Residential buildings are exempted from sprinklers on higher floors but must for basements and commercial floors.

1. The entire building (each floor including the basement, ground and all higher floors) shall be sprinkled.
2. One sprinkler head ( 57 degree Celsius for every 10 sq. meters, only A separate line for the sprinklers shall be installed and connected to the base of the terrace tank with a shut-off valve and a NRV.
3. The sprinkler system shall be fed from the underground tank with a separate pump and a sprinkler system installed with a gong valve (TYCO or similar type) and an Electrical flow switch for automatic operation.
4. Farthest end at each floor shall have a drain valve for the system to be tested.
5. The pump supplying water to the sprinkler system shall be of 1,50,000 liters capacity. Riser or down comer for the sprinkler shall have hydrant valves and a fire service inlet to the risers

#### **21.4.11 Other Automatic Fire Extinguishing System**

For requirements for other fire extinguishing systems like Automatic Medium/High Velocity Water Spray or emulsifying System, Fixed Foam Installations, Co2 Extinguishing Systems and systems using Halon Alternatives, reference shall be made to sections 5.1.8, 5.1.9, 5.1.10 and 5.3 of part 4 NBC second revision draft as required for special risk.

#### **21.4.12 Compartmentation**

1. The building shall be suitably compartmentation so that fire/ smoke remains confined to the area where fire incident has occurred and does not spread to the remaining part of the building.
2. All floors shall be compartmented with area not exceeding 750 m<sup>2</sup> by a separation wall with 2 h fire rating. For floors with sprinklers the area may be increased by 50 percent.
3. In long buildings, the fire separation walls shall be at distances not exceeding 40m.
4. For departmental stores, shopping canters and basements, the area may be reduced to 500 m<sup>2</sup> for compartmentation. Where this is not possible, the spacing of the sprinklers shall be suitably reduced.
5. When reducing the spacing of sprinklers, care should be taken to prevent spray from one sprinkler, impeding the performance of an adjacent sprinkler head.

#### **21.4.13 Emergency Power Supply**

For every building having height more than 45 m, a stand-by electric generator shall be installed to supply power to staircase and corridor lighting circuits, fire lifts, the stand-by fire pump, pressurization fans and blowers, smoke extraction and damper systems in case of failure of normal electric supply.

The generator shall be capable of taking starting current of all the machines and circuits stated above simultaneously. If the stand-by pump is driven by diesel engine, the generator supply need not be connected to the main electrical pump. Where parallel HT/LT supply from a separate sub-station is provided with appropriate transformer for emergency, the provision of generator may be waived in consultation with Authority.

#### **21.4.14 Electric Supply and Installation**

---

1. Electric supply to the High pressure Fire pump, Fire Lift and Sprinkler pump shall be supplied parallel to the building supply and should not get cut-off if the supply to the building is switched off.
2. All the electric wiring used shall be of 900 volt grading and connected to each enclosure through a MCB for a particular load.
3. Electric cable/wires used shall be of 700 volt grading with Mechanical circuit breaker and earth Leak Circuit Breaker(MCB and ELCB).

### **21.5 Fire Prevention and Safety Provisions during Construction**

Adequate fire prevention and safety measures as published in the National Building Code of India, Part VII – Construction Practices and Safety, shall be provided in all buildings during construction in a manner that the Fire Protection Consultant on Record deems necessary.

### **21.6 Fire Safety of Existing Buildings**

1. The Competent Authority shall have the assessment of fire safety of an existing building/structure damaged/undamaged carried out at stipulated periodical intervals through expert(s) chosen from a panel of experts identified by the Competent Authority.
2. The owner/developer/occupant on advice of such expert(s) shall carry out such repair/restoration and strengthening/retrofitting of the building found necessary so as to comply with the safety standards laid down in the national building code and the Indian standards as specified.
3. In case, the owner/developer/occupant does not carry out such action, the Competent Authority or any agency authorized by the competent authority may carry out such action at the cost of owner/developer/occupant.
4. The Competent Authority shall specify the period within which such compliance is to be carried out.
5. The Competent Authority may also direct the owner/developer/occupant, whether the building could be occupied or not during the period of compliance.

### **21.7 Classification of Buildings for Fire Prevention and Safety Provisions**

#### **21.7.1 Classification of Buildings**

The types of construction according to fire resistance shall be classified in to four categories as per Table 1 given under 3.3.1 Part 4 NBC –second revision:

- 1 Type 1 construction
- 2 Type 2 construction
- 3 Type 3 construction
- 4 Type 4 construction

#### **21.7.2 Fire Resistance Test**

The Fire resistance test for structural elements shall be done in accordance with IS-3808:1979.

#### **21.7.3 Steel Framed Construction**

Load bearing steel beams and columns of buildings having total covered area of 500 m<sup>2</sup> and above shall be protected against failure/ collapse of structure in case of fire. This could be achieved by covering the exposed steel supporting members by suitable fire resistance rated materials like concrete, vermiculite(Hydrous silicate of Aluminium, Magnesium or Iron) etc as per IS-15103:2002.

### **22.0 SPECIAL BUILDINGS**

The following regulations shall be applicable for all Special Buildings in addition to the other performance regulations.

### 22.1 Visibility

Auditorium or cinema halls shall provide minimum visibility requirements as per following specifications:

1. The seat nearest to the screen shall not be nearer than the effective width of the normal picture (ratio 1:1.33). This distance shall be  $\frac{3}{4}$  in case of cinema scope and other wide angles techniques and one half in case of 70mm presentations.
2. The elevation of the balcony seats shall be such that line of sight is not inclined more than 30° to the horizontal.
3. The seats should preferably be staggered side-ways in relation to those in front, so that a spectator in any row is not looking directly over the head of the person immediately in front of him.
4. The position and height of the screen shall be regulated in such a way that the maximum angle of the line of vision from the front seat to the top of the screen shall not exceed 50°.

### 22.2 Mixed Occupancy

1. Places of assembly in buildings of other occupancy, such as all rooms in hotels, restaurants in stores and assembly rooms in schools, shall be so located, separated or protected as to avoid any undue danger to the occupants of the place of assembly from a fire/smoke originating in the other occupancy. No mixed development shall be permitted with the buildings having height more than 45m. OR Commercial and residential use shall be separated by provision of skip floor/service floor.
2. Every place of assembly, every tier of balcony, and every individual room used as a place of assembly shall have exits sufficient to provide for the total capacity therein as required such that door width for assembly building shall not be less than 2000 mm. for every 600 person.
3. Every place of assembly shall have at least four separate exits as remote from each other as practicable.
4. At least one row of seating area shall be made accessible by ramps or elevators for disabled visitors.
5. Clear aisles not less than 1.2m in width shall be formed at right angles to the line of seating in such number and manner that no seat shall be more than seven seats away from an aisle.
  - a. Rows of seats opening to an aisle at one end only shall have not more than seven seats. Under the condition, where all these aisles do not directly meet the exit doors, cross-aisles shall be provided parallel to the line of seating so as to provide direct access to the exit, provided that not less than one cross aisle for every 10 rows shall be required. The width of cross-aisles shall be minimum of 1 m. Steps shall not be placed in aisles to overcome differences in levels, unless gradient exceeds 1 in 10.
6. The fascia of boxes, balconies and galleries shall have substantial railings not less than 1000mm high above the floor. The railings at the end of aisles extending to the fascia shall be not less than 1000 mm high for the width of the aisle or 1100mm high at the foot of steps.
7. Cross aisles except where the backs of seats on the front of the aisle project 600mm or more above the floor of the aisle shall be provided with railings not less than 900mm high.
8. No turnstiles or other devices to restrict the movement of persons shall be installed in any place of assembly in such a manner as to interfere in any way with the required exit facilities.
9. In theatres and similar places of public assembly where persons are admitted to the building at a time when seats are not available for them are allowed to wait in lobby or similar place until seats are available, such use of lobby or similar space shall not encroach upon the required clear width of exits. Such waiting shall be restricted to areas separated from the exit ways by substantial permanent partition or fixed rigid railing not less than 105cm high. Exits shall be provided for such waiting spaces on the basis of 1 person for each 0.3m<sup>2</sup> of waiting space/ area. Such exits shall be in addition to exits specified for the main auditorium area and shall conform in construction and arrangement to the general rules of exits given above.

10. No display or exhibit shall be so installed or operated as to interfere in any way with access to any required exit, or with any required exit sign.
  - a. All displays or exhibits of combustible material or construction and all booths and temporary constructions in connection therewith shall be so limited in combustibility or protected so as to avoid any undue hazard of fire which might endanger occupants before they have opportunity to use the available exits, as determined by the authority.
11. Places of assembly in buildings of other occupancy may use exits common to the place of assembly and the other occupancy, provided the assembly area and the other occupancy are considered separately, and each has exits sufficient to meet the requirements of the code.
12. Exits shall be sufficient for simultaneous occupancy of both the place of assembly and other parts of the building, unless authority determines that the simultaneous occupancy will not occur.
13. At least half the required means of exit shall lead directly outdoors or through exit ways completely separated from exits serving other parts of the building.
14. The decoration of place of assembly shall be of non-flammable materials. Fabrics and papers used for such purpose shall be treated with an effective flame retardant material. Stage settings made of combustible materials shall likewise be treated with fire retardant materials of class 1 flame spread.
15. Seats in places of public assembly, accommodating more than 300 persons, shall be securely fastened to the floor except as permitted in (o) below. All seats in balconies and galleries shall be securely fastened to the floor, except that in nailed-in enclosures like boxes with level floors and having not more than 14 seats, the seats need not be fastened. Tapestry of the seats shall be fire resistance.
16. Chairs not secured to the floor may be permitted in restaurants, night clubs and other occupancies where fastening of seats to the floor may not be practicable, provided that in the area used for seating, excluding dance floor, stage, etc, there shall be not more than one seat for each 1.4m<sup>2</sup> of floor area and adequate aisles to reach exits shall be maintained at all times.
17. Seats without dividing arms shall have their capacity determined by allowing 450 mm per person.
18. The spacing of rows of seats from back shall neither be less than 850 mm nor less than 700mm plus the sum of the thickness of the back and the inclination of the back. There shall be a space of not less than 350mm between the back of one seat and the front of the seat immediately behind it as measured between plumb lines.
19. Rooms containing high-pressure boilers, refrigerating machinery other than domestic refrigerator type, or other service equipments subject to possible explosion shall not be located directly under or adjacent to required exits. All such rooms shall be effectively cut off from other parts of the building and provided with adequate vents to the outer air.
20. All rooms or areas used for storage of any combustible material or equipment, or for painting, refinishing, repair or similar purposes shall be effectively cut off from assembly areas or protected with a standard system of automatic sprinklers. They shall be located away from staircases.
21. Every stage equipped with fly galleries, grid irons and rigging for movable theater type scenery shall have a system of automatic sprinklers over and under such stage areas or spaces and auxiliary spaces, such as dressing rooms, store rooms and workshops. The proscenium opening shall be provided with a fire-resisting curtain, capable of withstanding a lateral pressure of 4 kN/m<sup>2</sup> over the entire area. The curtain shall have an emergency closing device capable of causing the curtain to close without the use of power and when so closed, it shall be reasonably tight against the passage of smoke.
22. The stage roof of every theatre using movable scenery or having a motion picture screen of highly combustible construction shall have a ventilator or ventilators in or above it, openable from the stage floor by hand and also opening by fusible links or some other approved automatic heat/ smoke actuated device, to give a free opening equal to at least one-eighth the area of the floor of the stage.

23. The proscenium wall of every theatre using movable scenery or decorations shall have exclusive of the proscenium opening, not more than two openings entering the stage, each not to exceed 2 m<sup>2</sup> and fitted with self-closing fire resistant doors.
24. Automatic smoke vents actuated by smoke detectors shall be installed above the auditorium or theatres, including motion picture houses, with capacity of 8 air change per hour.

### 22.3 Institutional Buildings

These shall conform to those given in 6.3 Part 4NBC second revision, and particular attention is drawn to the following:

1. In building or sections occupied by bed-ridden patients where the floor area is over 280 m<sup>2</sup>, facilities shall be provided to move patients in hospital beds to the other side of a smoke barrier from any part of such building or section not directly served by approved horizontal exits or exits from first floor (floor 2) of a building to the outside.
2. Not less than two exits of one or more of the following types shall be provided for every floor, including basements, of every building or section:
  - a. Doors leading directly outside the building.
  - b. Stairways
  - c. Ramps.
  - d. Horizontal Exits and
  - e. Fire Escape Staircase.
3. All required exits as per table in Performance Regulation 24.2.2 of corridor width.
4. No building constructed in whole or in part of combustible materials shall be used to confine inmates in cells or sleeping quarters, unless automatic sprinkler protection is provided.

### 21.4 Public Safety

Closed Circuit Television (CCTV) Network shall be installed in public areas of assembly buildings and other places of entertainment as per protocols laid down by the Appropriate Authority.

## 23.0 STRUCTURAL SAFETY

### 23.1 Applicability

The following structural and seismic safety regulations shall apply to all buildings.

### 23.2 Structural Stability and Maintenance of Existing Buildings

1. The Competent Authority shall have the assessment of structural safety of an existing building/structure damaged/undamaged carried out at stipulated periodical intervals through expert(s) chosen from a panel of experts identified by the Competent Authority.
2. The owner/developer/occupant on advice of such expert(s) shall carry out such repair/restoration and strengthening/retrofitting of the building found necessary so as to comply with the safety standards laid down in the national building code and the Indian standards as specified.
3. In case, the owner/developer/occupant does not carry out such action, the Competent Authority or any agency authorized by the Competent Authority may carry out such action at the cost of owner/developer/occupant.
4. The Competent Authority shall specify the period within which such compliance is to be carried out.
5. The Competent Authority may also direct the owner/developer/occupant, whether the building could be occupied or not during the period of compliance.

### 23.3 Additions and Alterations to Existing Buildings

An alteration or addition to an existing building that is not structurally independent shall be designed and constructed such that the entire structure conforms to the structural and seismic safety requirements for new buildings, unless the following three conditions are complied with:

1. The alteration or addition complies with the requirements for new buildings.
2. The alteration or addition does not increase the seismic forces in any structural element of the existing building by more than 5% unless the capacity of the element subject to the increased force is still in compliance with the requirements for new buildings.
3. The alteration or addition does not decrease the seismic resistance of any structural element of the existing building unless the reduced resistance is equal to, or greater than, that required for new buildings.

#### **23.4 Change of Use of Buildings or Part of a Building**

When a change of use results in a structure being reclassified to a Higher Importance Factor (I) as defined in the IS: 1893-2002 "Criteria for Earthquake Resistant Design of Structures (Fifth Revision)", the building shall conform to seismic requirements for a new building with the Higher Importance Factor.

#### **23.5 Structural Safety Provisions during Construction**

1. The quality of all materials and workmanship shall conform to accepted standards and Indian Standard Specifications and Codes as included in Part V: Building Materials and Part VII Constructional Practices and Safety, National Building Code of India.
2. All borrow pits dug in the course of construction and repair of buildings, embankments, etc. shall be deep and connected with each other in the formation of a drain directed towards the lowest level and properly stepped for discharge into a river, stream, channel or drain, and no person shall create any isolated borrow pit which is likely to cause accumulation of water that may breed mosquitoes.
3. Alternative materials, method of design and construction and tests:-The provisions of the regulations are not intended to prevent the use of any material or method of design or construction not specifically prescribed in them provided any such alternative has been approved. Nothing of the provisions of these regulations is intended to prevent the adoption or architectural planning and layout conceived as an integrated development scheme. the competent authority may approve any such alternative if it conforms to the provisions of the relevant parts of the national building code, regarding material, design and construction, and the material, method, or work offered is, for the purpose intended, at least equivalent to that prescribed in these regulations in quality, strength, compatibility, effectiveness, fire and water resistance, durability and safety.
4. All buildings shall be constructed on quality control requirements.
5. In case of buildings under construction based on approved building permission, structural safety requirements shall have to be observed. However, due to such structural work of strengthening/retrofitting in the event of natural disaster if certain setbacks and margin get reduced, special permission may be granted by the Competent Authority on case to case basis.

#### **23.6 Structural Safety Tests**

Whenever there is insufficient evidence of compliance with the provisions of the regulations or evidence that any material or method of design or construction does not conform to the requirements of the regulations, in order to substantiate claims for alternative materials, design or methods of construction, the competent authority may require tests, sufficiently in advance, as proof of compliance. these tests shall be made by an approved agency at the expense of the owner as follows :-

1. Test Methods:-test methods shall be as specified by the regulations for the materials or design or construction in question. if there are no appropriate test methods specified in the regulations, the competent authority shall determine the test procedure. for methods or tests for building materials, reference shall be made to the relevant Indian standards as given in the national building code of India published by the bureau of Indian standards.
  2. Test result to be preserved:-copies of the result of all such tests shall be retained by the Competent Authority for not less than two years after the acceptance of the alternative material the testing of the materials as per Indian standards shall be carried out by laboratories approved by the competent authority on this behalf.
-

The laboratory/agency shall work out in consultation with the construction agency a testing programme of materials such as cement, steel and quality of concrete including its mixing, laying and strength at site as well as in the laboratory.

This should cover various stages of construction from foundation to completion as per regulation. the laboratory shall maintain a duly authenticated report in a bound register, copy of which will be submitted to the construction agency, which will in turn forward the testing report to the competent authority.

### **23.7 Design for Structural and Seismic Safety**

#### **23.7.1 Design Standards**

The structural design of foundations, elements of masonry, timber, plain concrete, reinforced concrete, pre-stressed concrete and structural steel shall conform to:

1. The provisions of the National Building Code of India, Part VI -Structural Design (Section – 1 Loads, Section – 2 Foundation, Section – 3 Wood, Section – 4 Masonry, Section – 5 Concrete and Section – 6 Steel), and,
2. The following Indian Standards:

#### **Structural Safety:**

1. IS. 456. 2000 "Code of Practice for Plain and Reinforced Concrete"
2. IS. 800. 1984 "Code of Practice for General Construction in Steel"
3. IS 875 (Part 2). 1987 "Design loads (other than earthquake) for buildings and structures" Part 2 Imposed Loads
4. IS 875 (Part 3). 1987 "Design loads (other than earthquake) for buildings and structures" Part 3 Wind Loads
5. IS. 883. 1966 "Code of Practice for Design of Structural Timber in Building"
6. IS. 1904. 1987 "Code of Practice for Structural Safety of Buildings. Foundation"
7. IS1905. 1987 "Code of Practice for Structural Safety of Buildings. Masonry Walls" **Seismic Safety:**
8. IS: 1893-2002 "Criteria for Earthquake Resistant Design of Structures (Fifth Revision)"
9. IS:13920-1993 "Ductile Detailing of Reinforced Concrete Structures subjected to Seismic Forces -Code of Practice"
10. IS:4326-1993 "Earthquake Resistant Design and Construction of Buildings -Code of Practice (Second Revision)"
11. IS:13828-1993 "Improving Earthquake Resistance of Low Strength Masonry Buildings - Guidelines"
12. IS:13827-1993 "Improving Earthquake Resistance of Earthen Buildings -Guidelines"
13. IS:13935-1993 "Repair and Seismic Strengthening of Buildings -Guidelines"
14. "Guidelines for Improving Earthquake Resistance of Buildings", by Expert Group, Government of India, Ministry of Urban Affairs & Employment, published by Building Materials and Technology Promotion Council, 1998.

#### **Cyclone/ Wind Storms:**

15. IS 875 (3): 1987 "Code of Practice for Design Loads (other than Earthquake) for Buildings and Structures, Part 3, Wind Loads"
16. "Guidelines (based on IS 875 (3). 1987) for Improving the Cyclonic Resistance of Low-rise Houses and Other Building", by Expert Group, Government of India, Ministry of Urban Affairs & Employment, published by Building Materials and Technology Promotion Council, 1998.

Note: Wherever an Indian Standard including those referred to in the National Building Code or the National Building Code is referred, the latest revision of the same shall be followed except specific criteria, if any, mentioned above against that Code.

#### **23.7.2 Structural Design Basis Report**

A Structural Design Basis Report (SDBR) shall be prepared for all buildings specified in Schedule 23 and submitted along with the Notice of Commencement of Construction as specified in Regulation 6.5.1. The format for the Structural Design Basis Report is specified in Form No. 43.

#### **23.8 Structural Safety of Display Structures**

Every display structure such as billboard shall be designed to ensure safety and be installed in compliance of National Building Code.

### **24.0 ENVIRONMENTAL MANAGEMENT**

#### **24.1 Minimum Distance from Water body**

1. Minimum clearance of 30mts shall be provided between the boundary of the bank of a river where there is no embankment and any development work or part thereof.
2. Minimum clearances of 15mts to be provided between the embankment of a river and any building or part thereof or any other clearance as may be prescribed under any other general or specific orders of Government and appropriate Authority whichever is more.
3. Minimum clearances of 9mts shall be provided between the boundary of any other water body such as lake (talav), canal or nala and any building or part thereof.
4. Where a water course passes through a low lying land without any well defined bank, the applicant may be permitted by the Competent Authority to restrict or re-direct the water course to an alignment and cross section determined by the Competent Authority.

#### **24.2 Rain Water Management**

##### **24.2.1 Rain Water Disposal**

The roof (terrace) of a building and the remaining area of the building unit shall be provided with an effective rain water drainage system so as to ensure that the rain water is not discharged into adjacent building units and no dampness is caused in any walls or foundation of adjacent buildings.

Rain water pipes shall be affixed to the outside of the walls of the building or in recesses or formed in such walls or in such other manner as may be approved by the Competent Authority.

No roof or terrace abutting on a public street shall be constructed without providing sufficient number of down take pipes and such pipes shall be so fixed as to discharge the rain water at a level not higher than 0.6 meter above the street level.

The manner of channeling rain water discharge from a building unit to a public storm water drain, if available, shall be determined by the Competent Authority.

##### **24.2.2 Rain Water Harvesting**

Rain water harvesting is mandatory for all buildings with ground coverage 80 sq.mts and above. The system of storm water drainage and storage in reservoirs and recharge should conform to one of the following specifications:

- a. For Buildings with ground coverage above 80 sq.mts and below 500sq.mts: Percolation Pit or Bore Recharge shall be provided in the marginal space around the building. Such pits shall be
-

filled with small pebbles, brick jelly or river sand and covered with perforated concrete slabs as illustrated below:

- b. For Buildings with ground coverage above 500sq.mts and up to 1500 sq.mts: Percolating Well with Rain Water Harvesting System shall be provided as illustrated below:

- c. For Buildings with ground coverage above 1500 sq.mts and up to 4000 sq.mts: Percolating Well with Rain Water Harvesting System shall be provided as for every 4000sq.mts as illustrated below:

Note: Water Retention Pond or any equivalent water harvesting system may be permitted as an alternative to multiple percolating wells, on specific review and approval by the Competent Authority.

#### 24.2.3 Rain Water Storage

For all building units with area more than 1000sq.mts, Rain water storage tank shall be mandatory with adequate storage capacity.

#### 24.3 Solid Waste Management

All buildings shall provide facilities for solid waste management. Standards and specifications of facilities shall conform to the following requirements:

##### 24.3.1 Solid Waste Bin for Residential Use

1. Community bin shall be provided in the road-side marginal open space.
2. The size of the bin container shall be calculated at the rate of 10 litres capacity per dwelling unit with a maximum size of bin of 80 litres. The numbers of bins shall be calculated on the basis of total no. of dwelling units/tenements.

##### 24.3.2 Solid Waste Bin for Non-Residential Use

1. Community bin shall be provided in the road-side marginal open space.
2. The size of the bin container shall be calculated at the rate of 20 litres capacity per 100sq.mts of floor area with a maximum size of bin of 80 litres.

3. The bin shall be provided with an air-tight lid.
4. For Hospitals, Hotels and Restaurants-disposal of solid waste shall be carried out as per the norms decided by the Competent Authority from time to time.
5. For Clubs, Community Halls and Party Plots-garbage container shall be provided with a minimum capacity of 4 tonnes. Such a container shall be placed along a paved area abutting the road of minimum dimensions of 6mt by 7.5mt. For such a place, used according to provision of this regulation, Competent Authority can collect security deposit from the plot owner as may be decided time to time.

## 24.4 Grey-water Recycling

### 24.4.1 Applicability

1. Any owner applying for approval for construction of a new set of buildings of category and total built-up area mentioned below shall make provision for reuse of recycled water:

Table: Building use Area

No.	Building Use	Built-up Area (sq.mts)
1	Hospitals and Nursing Homes	More than 5,000
2	Hospitality: Hotels, Lodges, Guest houses	
3	Hostels for Schools, Colleges, Training Centres	More than 10,000
4	Community Centre, Banquet Halls, and similar uses	
5	Commercial	
6	All hazardous, water-polluting, chemical industries	

### 24.4.2 Provisions of Recycling System

The applicant shall along with his application submit the designs, plans, calculations and the references used for the calculations etc to provide the system to recycle the grey water. Such system shall include the provisions to facilitate the following:

1. Treated grey water is pumped to a separate tank on the roof from where grey water will be supplied to water closets, garden taps, car washing taps etc.
2. Only water from water closets should be let in to sewerage system.
3. Wherever arrangements from reuse of recycled water is provided additional arrangements for carrying the excess grey water to the sewerage system may also be provided.
4. In a nature or manner or in a way that shall not constitute a nuisance of foul gases or cause a public hazard or otherwise in compliance of these regulations.
5. The recycled water shall be used for non potable, no contact purposes within premises and shall not be connected to sewage/waste water system of local authority. However the waste generated by the recycle plant can be connected to local authority sewer network if it is of the accepted quality as mentioned in Regulation.
6. Separation of grey water:  
The wastes from toilets in the premises will be separated from grey water that is of bath room and kitchen wastes by means of separate down take discharge system.

The grey water shall be recycled by providing recycling plant and shall be reused for non-potable purposes after storing the same in distinctly separate tank by means of purple colored down take pipes.

The water quality shall conform to standards of non potable water. The recycled water shall be tested once in six months and results shall be made available to competent authority whenever demanded.

The make-up connection to the system will be done at the collection tank of the treated water, through a free fall if from Municipal water connection.

7. Separate plumbing for grey water:

a. Every developer/owner shall provide the newly constructed building with the provision of down take plumbing for grey water, recycling water plant, storage and reuse fitting before selling the building.

8. Reuse of water strictly for not potable non-contact use.

The reuse of water will be strictly for not potable use by means of providing a distinctly separate reuse system coloured in purple. The non-contact uses shall be restricted to toilet flushing, drip irrigation of trees/shrubs, sub surface irrigation of lawns and recharge of ground water.

There shall not be cross-connection of fitting of the potable and not potable water at any point. The recycled water system shall be maintained at a lower operating pressure than that of the potable water system. Precautions should be taken to prevent cross contamination.

#### 24.4.3 Quality of Water and Treatment

1. The water generated after treatment should be safe for its use for flushing toilets, gardening etc.
2. The company or the agency engaged for installation of system for recycling of waste water shall preferably confirm ISO:14000.
3. Provision may be made for checking the quality of recycled water with Water testing laboratory with Municipal Corporation or Water Supply and Sewerage Board.
4. The testing of wastes and the submission of the results shall be done in a manner in accordance with the terms and conditions prescribed by the Municipal Commissioner or Gujarat Pollution Control Board (GPCB) / Competent authority.

#### 24.4.4 General Provisions

1. Mandatory disclosure: regarding changes: An occupier of premises shall inform the competent authority of any change in the quality, nature or quantity of the wastes discharged from his plant or premises the manner of their discharge of water immediately if the change is likely to cause discharge of water in variation or violation of license under these regulations.
2. Corrective action. In the event it is found any person violating the provisions of these regulations, the competent authority or Gujarat Pollution Control Board shall issue notice and after inquiry and personal hearing take necessary corrective action.
3. Dispute Resolution All the disputes arising in the enforcement of this by these rules shall be referred to Municipal Commissioner who in turn will resolve the disputes in advise with his authorized technical officer or any experts and intimate to the occupier / owner / developer. The decision of the Municipal Commissioner will be final and binding on the occupier.
4. List of Authorized Laboratories shall be as authorised by Gujarat State Pollution Control board or the Municipal corporation
5. Characteristics of effluent water quality from the Grey Water Recycling plants shall be as approved by the Gujarat Pollution Control Board.

#### 24.4.5 Enforcement of Regulations

---

1. In case of proposed/intending /under redevelopment properties, the occupier/ developer/ owner will submit an application to the competent authority with details of proposed 'grey water reuse system ' along with the application for demand of water permission to connect the Grey Water/sewage to municipal sewage system.
